FOREWORD

FOREWORD

Dear Student,

Rwanda Basic Education Board is honored to present to you Music, Dance and Drama book for Senior Three which serves as a guide to competence-based teaching and learning to ensure consistency and coherence in the learning of Music, Dance and Drama subject. The Rwandan educational philosophy is to ensure that you achieve full potential at every level of education which will prepare you to be well integrated in society and exploit employment opportunities.

The government of Rwanda emphasizes the importance of aligning teaching and learning materials with the syllabus to facilitate your learning process. Many factors influence what you learn, how well you learn and the competences you acquire. Those factors include quality instructional materials available, assessment strategies for the learners among others. Special attention was paid to activities that facilitate learning process develop your ideas and make new discoveries during concrete activities carried out individually or with peers.

In competence-based curriculum, learning is considered as a process of active building and developing knowledge and meanings by the learner where concepts are mainly introduced by an activity, a situation or a scenario that helps the learner to construct knowledge, develop skills and acquire positive attitudes and values.

For effective use of this textbook, your role is to:

- Work on given activities which lead to the development of skills
- Share relevant information with students through presentations, discussions, group work and other active learning techniques such as role play, case studies, investigation and research in the library, from the internet or from your community.
- Participate and take responsibility for your own learning.
- Draw conclusions based on the findings from the learning activities.

To facilitate you in doing activities, the content of this book is self-explanatory so that you can easily use it by yourself, acquire and

assess your competences. The book is made of units whereby each unit comprises: the key unit competence, followed by the introductory activity before the development of Music concepts that are connected to real world situation.

I wish to sincerely extend my appreciation to REB staff who organized the editing process of this textbook. Special gratitude also goes to lecturers, teachers, illustrators and designers who supported the exercise throughout. Any comment or contribution would be welcome to the improvement of this textbook for the next edition.

Dr. MBARUSHIMANA Nelson

Director General, REB

ACKNOWLEDGEMENT

ACKNOWLEDGEMENT

I would like to extend my sincere appreciation to everyone who contributed to the refinement of the Music, Dance and Drama in Senior Three. This achievement would not have been possible without the active involvement of various stakeholders.

Special thanks go to Rwanda Basic Education Board (REB) staff; subject experts; university lecturers and teachers for their valuable work in the writing of this textbook.

I am also grateful to all our education development partners whose support was instrumental throughout the process.

Ms. MURUNGI Joan,

Head of Curriculum,

Teaching and Learning Resources Department/REB

INTRODUCTION

The benefits of Music, Dance and Drama education are immense and highly beneficial to children. For Senior Three, Music, Dance and Drama is a fun and practical subject that helps you to learn by doing. It is made to help enjoy the music atmosphere by singing, playing instruments, and enjoying other musical activities. This book has four units that will give you time to practice and grow your talent in music. As you learn, you will become more confident, creative, and ready to begin your journey as a young music performer.

Before you use each unit, always first read and understand what you will be able to learn and do after using the unit. This will help you not to waste your efforts on what is not needed at the time. So, you have to keep focused.

Learning by Doing (Practice)

Music, Dance and Drama is an area of study through which learners acquire knowledge and understanding while developing skills, values, and attitudes. These units require you to participate actively in different activities so that you can become a skilled performer, composer, and creator in the creative arts. This learning will benefit you not only in Senior Three but also in your future career.

You are encouraged to cooperate with your fellow students by working in groups, discussing ideas, and learning from one another. Be ready to express your ideas freely and respect different ways of thinking and perspectives.

Performance

In every lesson of unit, you will be given a chance to perform Music, Dance and Drama. These sessions should help you to acquire skills to your fullest. Please note that some of these skills sometimes develop slowly by slowly with practice.

Field work

Since music, dance, and drama are cultural products that largely already exist within our communities, you will be required to gather information directly from the community about the types of music practiced. Your teacher will guide you on how to do this using written notes and, where possible, electronic recordings. This can also be done using a mobile phone

Materials and tools

Materials and tools to help you in your learning will include various instruments, computers, and other electronic devices. Always keep them safe from damage. Be a responsible creative artist.

Marks scored

You will compose/make, perform and draw art works. Your classmate and the teacher will be awarding you with the marks you deserve. You therefore must work very hard to be encouraged by good performance.

There will be performances of Music, Dance and Drama by both individuals and groups of students. For the case of group activities, all participants share the mark or grade. Therefore, you are encouraged to be an active member of the group so that you contribute to the good marks which you will all get.

Best wishes

By the end of this Music, Dance and Drama subject in Senior Three, you will have learnt to sing, dance, act and write music, draw and make beautiful and interesting art pieces. We wish you great success.

Activity-based learning

This means that this book has a variety of activities for you to do, as well as information for you to read. These activities present you with material or things to do which will help you to learn by yourself. You already have a lot of knowledge and ideas based on the experiences you have had from your own community. Some of the activities, therefore, ask you to think about the knowledge and ideas you already have.

In using this book, therefore, it is essential that you do all the activities. You will not learn properly unless you do these activities. They are the most important part of your book.

In some ways this makes learning more of a challenge. It is more difficult to think for yourself than to copy what the teacher tells you. But if you take up this challenge you will become a better person and become more successful in your life.

Group work

You can also learn a lot from other people in your class. If you have a problem, it can often be solved by discussing it with others. Many of the activities in the book, therefore, involve discussion or other activities in groups or pairs. Your teacher will help to organize these groups and may arrange the classroom so that you are always sitting in groups facing each other. You cannot discuss properly unless you are facing each other.

Research

One of the objectives of the Competence Based Curriculum is to help you to find things out for yourself. Some activities, therefore, ask you to do research using books in the library, the internet if your school has this, or other sources such as newspapers, magazines, home and the community. This means you will develop the skills of learning for yourself when you leave school.

UNIT I:

COMPOUND AND ASYMMETRIC TIME SIGNATURES

Key unit competence

By the end of the unit, students will be able to perform melodies written in compound and asymmetric time signatures.

Learning outcomes

By the end of the unit, you should be able to:

Knowledge and understanding

- Define compound and asymmetric time signatures
- Explain how beats are grouped in compound time signatures and asymmetric time signatures.
- Differentiate compound time signatures from asymmetric time signatures based on beat structure and rhythmic organization.

Skills

- Count and clap beats in both compound and asymmetric time signatures.
- Write musical notation and compose short melodies that correctly follow the rules of compound and asymmetric time signatures.
- Perform short melodies in both compound and asymmetric time signatures with accuracy and musicality.

Attitude and values

- Appreciate the richness and diversity of rhythmic structures in music by engaging with compound and asymmetric time signatures in performance and reading activities.
- Demonstrate confidence and attentiveness when performing or sol-fa-ing short melodies written in compound or asymmetric time signatures.
- Develop cooperation, perseverance, and a positive attitude by working together in group musical tasks and expressing enjoyment while performing short melodies.

Introduction

In music, time signatures play an important role in shaping the rhythm and flow of a melody. While many songs use simple and regular patterns, musicians also use more complex rhythms found in compound and asymmetric time signatures. This unit introduces you to the rhythms where compound and asymmetric meters are used. Through guided practice, clapping exercises, sol-fa, and instrument playing, you will develop the confidence and accuracy needed to perform melodies in compound and asymmetric time signatures.

Introductory activity

Sing the following music piece, and answer the questions below:

- Tap the beat
- Describe whether the rhythm feels even or uneven
- Compare the beat units in the above staves with the beat units in the simple time signatures $\frac{2}{4}$ and $\frac{4}{4}$. What do you conclude?

1.1. Dotted notes and dotted rests

Learning activity 1.1

Consider the staves below:

- Solfa the melodies above respecting the time signature
- According to the number of notes in each measure, deduce the value of a dot following the notes.
- Make a difference between those two staves above.

In music, a dotted note or rest has a small dot written after it. The dot lengthens the value (duration) of the note or rest by adding a half of its original value.

1.2. Dotted notes and dotted rests symbols

	dotted semi breve (dotted whole note) = 6 (4+2) beats		dotted semi breve rest (dotted whole rest) = 6 (4+2) beats
	dotted minim (dotted half note) = (3 (2+1) beats		dotted minim rest (dotted half rest) = (3 (2+1) beats
	dotted crotchet (dotted quarter note) = 1 1/2 (1+1/2) beats		dotted crotchet rest (dotted quater rest) = 1 1/2 (1+1/2) beats
	dotted quaver rest (dotted eighth note) = 3/4 (1/2+1/4) beats		dotted quaver rest (dotted eighth rest) = 3/4 (1/2+1/4) beats
	dotted semi quaver (dotted sixteenth note) = 3/8 (1/4+1/8) beats		(dotted semi quaver rest (dotted sixteenth rest) = 3/8 (1/4+1/8) beats

Consider the examples below:

	=		+		⇒	A dotted semi breve equals a semi breve plus a minim
	=		+		⇒	A dotted minim equals a minim plus a crotchet
	=		+		⇒	A dotted crotchet equals a crotchet plus a quaver
	=		+		⇒	A dotted quaver equals a quaver plus a semi quaver

	=		+		A dotted semi breve rest equals a semi breve rest plus a minim rest
	=		+		A dotted minim rest equals a minim rest plus a crotchet rest
	=		+		A dotted crotchet rest equals a crotchet rest plus a quaver rest
	=		+		A dotted quaver rest equals a quaver rest plus a semi quaver rest

1.3. Beating dotted notes

Since a dot adds half of the original value to the note or rest, we beat the original notes and the half added to it.

	a crotchet equals one beat
	a minim equals two beats
	a dotted minim equals three beats
	a dotted crotchet equals one beat and half
	two quavers equals one beat
	one quaver equals half beat

The same counting applied to notes is also applied to rests when beating time

Below is how to count the beats:

One beat=one clap=Crotchet note (♩)

SING →	TA	TA	TA	TA	TA	TA	TA	TA	TA	TA	TA	TA	TA
CLAP →													

APPLICATION ACTIVITY 1.3

1. Write the corresponding rests for the following notes

2. Complete each measure with one note that compliments the given notes.

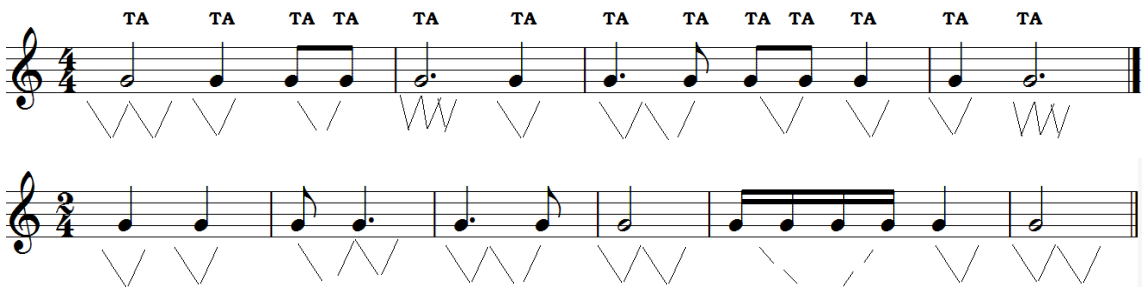

3. Complete each measure with one rest that compliments the given notes then beat the time.

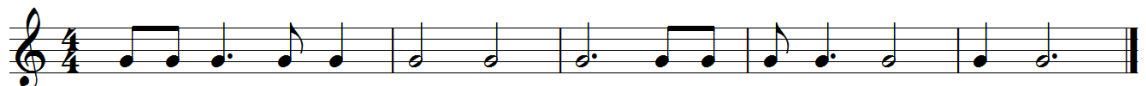

4. Add the missing bar lines.

5. Clap the rhythm while singing TA...TA...

6. Draw the beats below the notes and then clap the rhythm while singing Ta, Ta...

7. Sol-fa and perform

8. Write a six-measure melody in which dotted notes are used.
9. Identify and discuss five values you develop when performing music that uses dotted notes and dotted rests.

1.4. $\frac{2}{8}$ and $\frac{3}{8}$ time signatures

Learning activity 1.4

Observe the following melody and tell the number of beats that are in each bar and the note value that is given one beat:

Before we introduce compound and asymmetric time signatures you have to get knowledge and understanding of $\frac{2}{8}$ and $\frac{3}{8}$ time signatures which play great role in the formation of compound and asymmetric meter.

$\frac{2}{8}$ represents a beat group of **two quavers (eighth notes)**.

$\frac{3}{8}$ represents a beat group of **three quavers (eighth notes)**

1.4.1. The $\frac{2}{8}$ Time Signature

What is $\frac{2}{8}$ time signature?

The $\frac{2}{8}$ time signature is a type of time signature which has 2 beats in each bar and each beat is equal to an eighth note.

Counting the beats in $\frac{2}{8}$ time signature

When counting the beats in $\frac{2}{8}$ time signature, it is similar to $\frac{2}{4}$ time but this one is faster than $\frac{2}{4}$ time because it uses a half of a beat, that is the eighth note is the note that gets one beat, this means that two eighth notes fill the measure, the quarter note is equal to two beats because it contains 2 eighth notes.

APPLICATION ACTIVITY 1.2a

1. How many beats are there in a bar of $\frac{2}{8}$ time signature?
2. Solfa and perform:

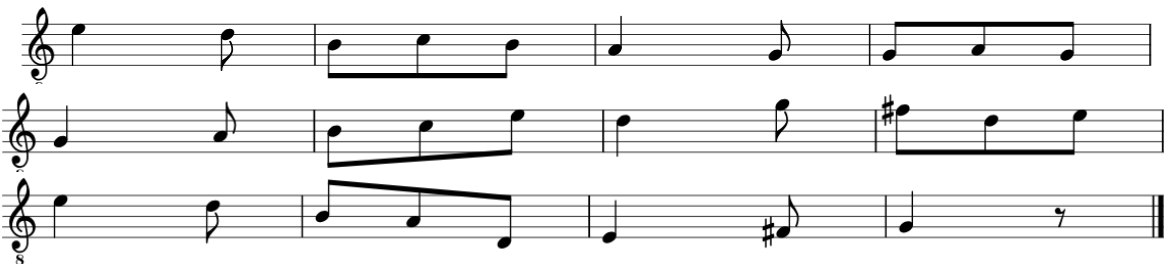

1.4.2. The $\frac{3}{8}$ Time Signature

Learning activity 1.2b

Observe the following melody and tell the number of beats that are in each bar:

What is $\frac{3}{8}$ time signature?

The $\frac{3}{8}$ time signature is a type of time signature which has 3 beats in each bar and each beat is equal to an eighth note.

Counting the beats in $\frac{3}{8}$ time signature

When counting the beats in $\frac{3}{8}$ time signature, it is similar to $\frac{3}{8}$ time but this one is faster than $\frac{3}{8}$ time because it uses a half of a beat, that is the eighth note is the note that gets one beat.

APPLICATION ACTIVITY 1.2b

1. How many beats are there in a bar of $\frac{3}{8}$ time signature?
2. What note value carries one beat?
3. Fill in missing notes to complete the given time signature

4. Sol-fa and perform:

1.5. Compound time signatures

Learning activity 1.3

Explain what you know about compound time signatures in music. In your explanation, describe how compound time signatures are formed, how the beats are grouped, and give any examples of rhythms or songs that you think use these time signatures.

1. Work in small groups using beans, stones, or counters to create different beat groupings of 3 + 3, 2 + 3, and 3 + 2.
2. For each grouping, clap once for each group while counting aloud, for example 1-2-3 / 1-2-3 or 1-2 / 1-2-3.
3. As you work, think about which grouping feels balanced and regular and which ones feel uneven or irregular. Through this activity, you will learn that rhythms grouped in equal groups of three are called compound meters, while rhythms grouped in unequal groups are called asymmetric meters, and by clapping and counting you will be able to distinguish between even (compound) and uneven (asymmetric) rhythms.

1.5.1. Compound time signature

When a compound time signature is used each beat is divided into three equal parts (instead of two, as in simple time).

In compound time signature the top number is divided by 3 to determine how many beats are in each measure. The top numbers which are often used are 6, 9, or 12. These numbers show the total number of small subdivisions, usually eighth notes (quavers). Most commonly, the beat unit is a dotted quarter note (a dotted crotchet)

Common Compound Time Signatures

The chart below shows some frequently used compound time signatures

Time signature	Number of beats per measure	Type of note that gets the beat
$\frac{6}{8}$	2	dotted quarter note
$\frac{9}{8}$	3	dotted quarter note
$\frac{12}{8}$	4	dotted quarter note

Notice when the bottom number is 8, notes in compound meter are grouped in three eighth notes (quavers) quavers which are equal to a dotted quarter note (dotted crotchet). The $\frac{3}{8}$ time signature is classified as a **duple** because two dotted quarter note leads the beats.

The beat unity of the compound times ($\frac{6}{8}$, $\frac{9}{8}$ and $\frac{12}{8}$) is a dotted quarter note (dotted crotchet). In $\frac{6}{8}$ we have two beats per measure governed by two dotted quarter notes (dotted crotchets), in $\frac{9}{8}$ we have three beats per measure governed by three dotted quarter notes while in $\frac{12}{8}$ we have four beats per measure governed by four dotted quarter notes.

Duple means two beats per measure.

Triple means three beats per measure

9/8 time is classified as **compound triple**.

There are three beats (three dotted quarter notes), thus making the meter triple.

Quadruple means four beats per measure

12/8 time is classified as **compound quadruple**.

There are four beats, thus making the meter quadruple.

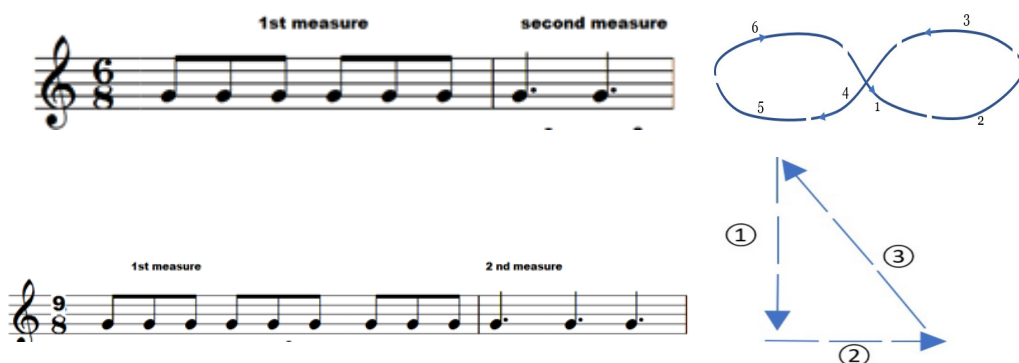

1.5.2. Beating the compound time signatures

Since $\frac{3}{8}$ contains one main beat, $\frac{6}{8}$ contains two beats, $\frac{9}{8}$ contains three beats, and $\frac{12}{8}$ contains four beats, the conducting pattern in compound time signatures is determined by the number of beats per bar. Because $\frac{6}{8}$ is made up of two groups of $\frac{3}{8}$, its beat pattern is simply doubled; likewise, $\frac{9}{8}$ uses three repetitions of the $\frac{3}{8}$ beat, and $\frac{12}{8}$ uses four. For this reason, it is helpful to begin with the basic one-beat pattern of $\frac{3}{8}$ and then expand it according to the number of beats in the measures.

This step-by-step approach enables learners to clearly see and feel how beats are grouped and conducted in compound meters. So, the following table summarizes the information guiding the pattern drawing:

Time Signature	Beats per Bar	Beat Unit	Pattern
$\frac{6}{8}$	2	Dotted crotchet	Down – Up
$\frac{9}{8}$	3	Dotted crotchet	Down – Out – Up
$\frac{12}{8}$	4	Dotted crotchet	Down – Left – Right – Up

IF IN 3/8 A QUAVER CARRIES ONE BEAT, WHEN WE TAP COMPOUND METER BEATS IN THE STYLE OF 3/8:

- a quaver will carry one beat (♩ = 1 beat)
- a crotchet will carry two beats (♪ = two beats)
- a dotted crotchet will carry three beats (♪. = three beats)
- a minim will carry four beats (♭ = four beats)
- a minim + a quaver will carry five beats (♭ + ♩ = five beats)
- a dotted minim will carry six beats (♭. = six beats)

Note that beat 1 and beat 4 are strong.

APPLICATION ACTIVITY 1.3

- Say Ta... Ta... while numbering beats using your hand

- Write beats in $\frac{3}{8}$ style; (a quaver carries 1 beat)

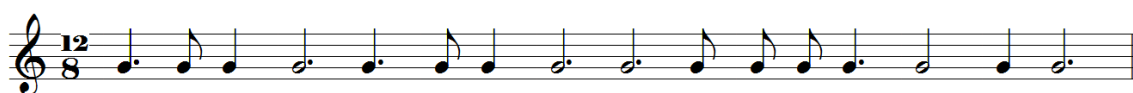

- Write in bar lines to reflect the meter of $\frac{6}{8}$.

- Write in bar lines to reflect the meter of $\frac{9}{8}$.

5. Write in bar lines to reflect the meter of $\frac{12}{8}$.

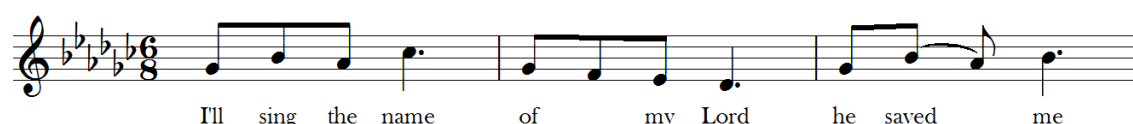

6. Sol-fa and perform

7. Sol-fa and sing the melodies

I'LL SING

8. Explain how the values of respect, teamwork, patience, and attentiveness are demonstrated when performing music in compound time signatures.

1.6. Asymmetric time signatures

Learning activity 1.5

Explain what asymmetric numbers are in mathematics. Then, show how numbers like 5, 7, or 10 (used as the top number in a time signature) tell us how the beats are grouped in a measure. Give examples of rhythms or songs that use these time signatures.

1.4.1. Asymmetric time signature

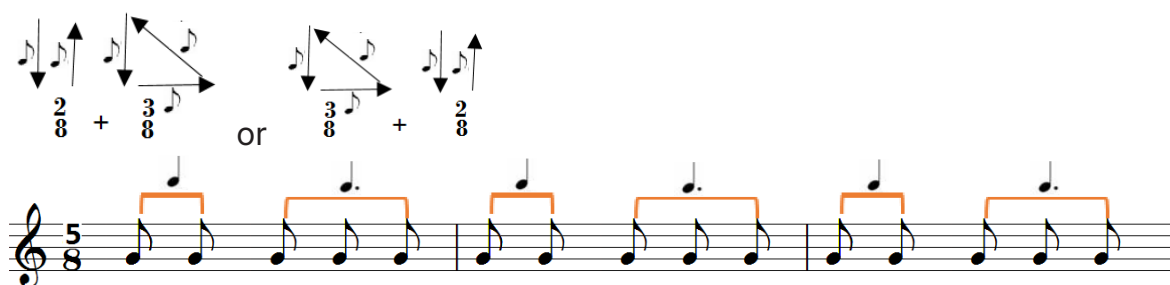

Unlike simple time ($\frac{2}{4}$, $\frac{3}{4}$) or compound time ($\frac{6}{8}$, $\frac{9}{8}$), asymmetric time signatures (also called irregular or complex signatures) are those where the beats in a measure are not evenly divisible into 2s: beats grouped in **pairs** (2 + 2 + 2 ...) or 3s: beats grouped in **threes** (3 + 3 + 3 ...). The beats are grouped, not counted one by one. Common asymmetric time signatures are $\frac{5}{8}$, $\frac{10}{8}$.

1.4.2. Beat Grouping in asymmetric time signatures

Time signature	Possible grouping
$\frac{5}{8}$	2+3 same as $\frac{2}{8} + \frac{3}{8}$;
	3+2 same as $\frac{3}{8} + \frac{2}{8}$
$\frac{7}{8}$	2+2+3 same as $\frac{2}{8} + \frac{2}{8} + \frac{3}{8}$
	3+2+2 same as $\frac{3}{8} + \frac{2}{8} + \frac{2}{8}$
	2+3+2 same as $\frac{2}{8} + \frac{3}{8} + \frac{2}{8}$
$\frac{10}{8}$	2+2+3+3 same as $\frac{2}{8} + \frac{2}{8} + \frac{3}{8} + \frac{3}{8}$;
	3+3+2+2 same as $\frac{3}{8} + \frac{3}{8} + \frac{2}{8} + \frac{2}{8}$
	2+3+2+3 same as $\frac{2}{8} + \frac{3}{8} + \frac{2}{8} + \frac{3}{8}$
	3+2+3+2 same as $\frac{3}{8} + \frac{2}{8} + \frac{3}{8} + \frac{2}{8}$

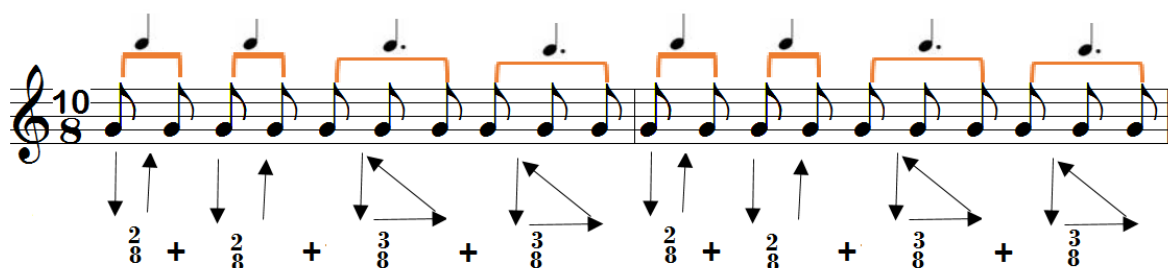

The first number in each group is usually the strong beat, and the subsequent numbers are weaker beats. Hence while singing you must accentuate the first beat of each group to make the rhythm clear.

See how the beats are grouped on musical staves

The image displays eight musical staves, each representing a different rhythmic exercise. The exercises are organized into three groups based on time signature:

- 5/8 Time (Staves 1-3):** Each staff shows a melodic line with eighth notes and a rhythmic pattern below it. The rhythmic pattern consists of a sequence of eighth notes with arrows indicating up and down strokes, and time signatures of 2/8 and 3/8.
- 7/8 Time (Staves 4-6):** Each staff shows a melodic line with eighth notes and a rhythmic pattern below it. The rhythmic pattern consists of a sequence of eighth notes with arrows indicating up and down strokes, and time signatures of 2/8 and 3/8.
- 10/8 Time (Staff 7):** The staff shows a melodic line with eighth notes and a rhythmic pattern below it. The rhythmic pattern consists of a sequence of eighth notes with arrows indicating up and down strokes, and time signatures of 2/8 and 3/8.

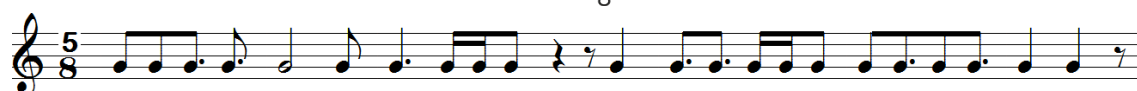

APPLICATION ACTIVITY 1.4

1. Complete each measure with one note that compliments the given notes and rests.

2. Write in bar lines to reflect the meter of $\frac{5}{8}$

3. Write in bar lines to reflect the meter of $\frac{10}{8}$

4. Write in bar lines to reflect the meter of $\frac{7}{8}$

5. Sol-fa and perform

6. Which attitudes do you adopt when performing music in asymmetric time signatures? Explain your answer.

END OF UNIT ASSESSMENT 1

PART A: KNOWLEDGE AND UNDERSTANDING

1. Compare $\frac{2}{4}$ and $\frac{2}{8}$ time signatures.
2. Compare $\frac{3}{4}$ and $\frac{3}{8}$ time signatures.
3. Compare compound time signature and asymmetric time signature.
4. Why is $\frac{6}{8}$ considered compound duple time rather than simple triple time?
5. Why are $\frac{2}{8}$ and $\frac{3}{8}$ time signatures important for understanding and performing asymmetric time signatures?
6. Show four different beat groupings for $\frac{10}{8}$ time
7. Compare the rhythmic feel of $\frac{3}{4}$ and $\frac{6}{8}$ time signatures.
8. Identify a song that uses compound time and explain why it suits that style.
9. Identify a song that uses asymmetric time and explain why it suits that style.

PART B: SKILLS

1. Solfa and perform

The musical notation consists of seven staves. The first two staves are in 6/8 time, the next two are in 5/8 time, and the last three are in 10/8 time. The notation includes various rhythmic patterns such as eighth notes, quarter notes, and half notes, with some measures containing rests. The exercise is designed for solfa and performance practice.

2. Write a seven-measure staff of $\frac{6}{8}$ or $\frac{5}{8}$ or $\frac{10}{8}$ using correct note values that equal one full measure and then perform.

PART C: ATTITUDES & VALUES

1. What values do you learn by performing music in irregular time signatures? Discuss in small groups.
2. Which attitudes should you adopt when performing music in irregular (asymmetric) time signatures? Explain your answer.
3. Describe how practicing dotted notes and rests can foster the development of important values such as respect for others, patience, cooperation, and attentiveness.

UNIT II:

TRIAD CHORDS

Key unit competence

By the end of the unit, students will be able to apply triads in performance.

Learning outcomes

By the end of the unit, you should be able to:

Knowledge and understanding

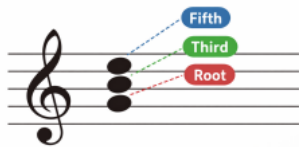

- Describe triads by comparing its three components (root, third, fifth).
- Demonstrate triads on musical staff notation and on a keyboard.
- Distinguish triad inversions when reading or performing music.

Skills

- Construct different types of triads on any given root note.
- Write different types of triads on a musical staff (both treble staff and bass staff).
- Play or sing triads accurately.

Attitude and values

- Demonstrate appreciation, enjoyment, and positive engagement when listening to or performing music.
- Show cooperation, unity, and teamwork during group singing, instrumental practice, and ensemble activities.
- Develop confidence and attentiveness by performing and composing melodies

INTRODUCTION

This chapter introduces triad chords by explaining their types, functions, and practical use in music performance. Triads are the foundation of harmony, serving as the basic building blocks that support melodies and accompaniments. By learning how triads are constructed, identified, and applied, you will be able to interpret, compose, and perform music with greater confidence and creativity.

Introductory activity

1. Below we have three notes (C-E-G).
 - i. In your group, play and sing the three notes simultaneously
 - ii. Count the number of semi-tones from C to E and from E to G
 - iii. Put a flat on E (=Eb) and count the number of semi-tones from between C and Eb;
 - iv. Play and sing simultaneously the triads in (ii) and (iii).
 - v. Now compare the two sounds you get after playing or singing the two sections? i.e. (C, E, G and C, Eb, G) and make a conclusion

2.1. Triads

Learning activity 2.1

1. Consider the two staves below and then answer the questions that follow:
 - a) Compare the intervals in each measure
 - i. bottom and middle notes
 - ii. bottom and upper notes
 - iii. middle and upper notes
 - b) Play the three notes of each measure simultaneously
 - c) In group of three sing three notes simultaneously
 - d) After naming the intervals above the root note, deduce the names of triads

Note: By identifying the root-third interval, you first determine whether a triad is major or minor. The root-fifth interval then confirms whether the chord is perfect, diminished, or augmented. This systematic approach allows musicians to quickly analyse chords, choose appropriate harmonies, and perform music with greater confidence and musical understanding.

2.1.1. Meaning of Triad

A **triad** in music is a chord made up of **three notes** that are stacked in intervals of **thirds**. It is built from:

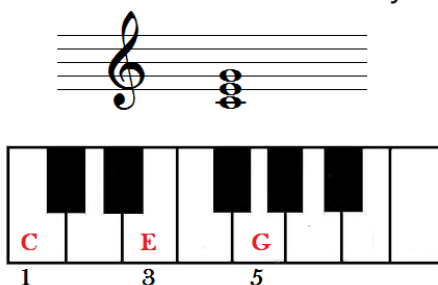

- 1) **Root** – the main note on which the chord is based
- 2) **Third** – a note a third above the root
- 3) **Fifth** – a note a fifth above the root

A chord is a group of three, four or more notes played simultaneously. There are different types of chords. The most common chords are **triads**.

2.1.2. How to make a triad

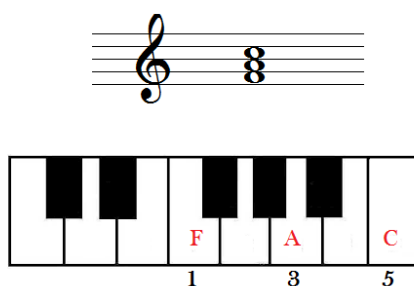

Suppose the first note start from C. Write the first note (root) at the bottom and count up 3 to get the next note a 3rd (include the starting note when you're counting) (*in our example, 3 notes up from C is E*). Now start again at the bottom note and this time count up 5 (5 notes up from C is G). So, to build a triad on C we have used the notes **C-E-G**.

Below is how a triad looks like on musical staff and keyboard.

Suppose the first note starts on F

So the root is **F**. the next note is **A** and the last note is **C**. So, to build a triad whose root is **F** we have used the notes **F-A-C**. Below is how it looks like on the staff and keyboard.

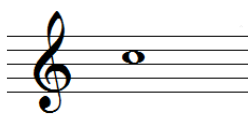

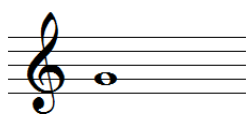

In sum, the triad may be built on each degree of major and minor scales.

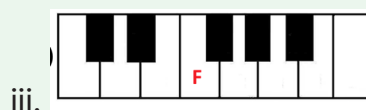

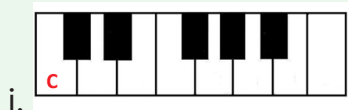

APPLICATION ACTIVITY 2.1

1. You are given the first note (the root). Add two notes to make a triad.

2. On the key board shape, write the two letter names to have a triad

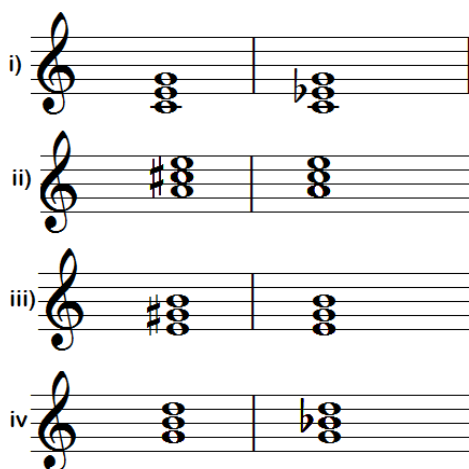

2.1.3. Types of triads

Learning activity 2.1

- For each staff below, indicate the number of tones and semitones between the root and the third, between the root and the fifth, and between the third and fifth.

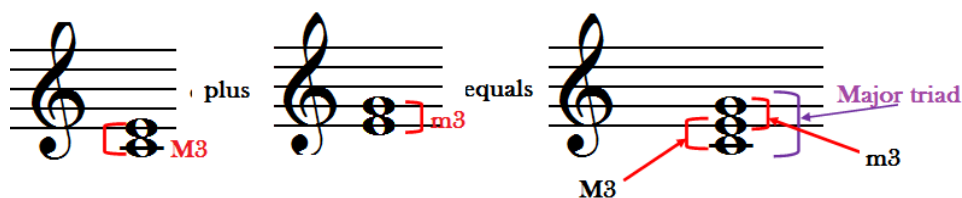

- Comment on the differences observed in question 1.

2.1.3.1. Major Triad

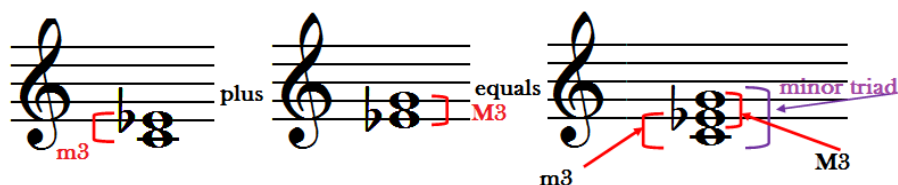

A major triad is created by taking a root note and combining it with a major third and a perfect fifth. Thus, a major triad can also be described as a major (M) third interval (2 tones) with a minor (m) third interval (1 tone and semi-tone) on top.

If we take **C** as the first note (a root) we shall have the following major triad.

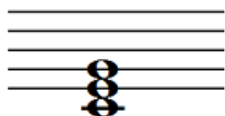

2.1.3.2. Minor Triad

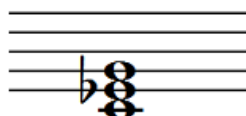

A minor triad is created by establishing a root note and then adding in a minor third note and a perfect fifth note. Thus, a minor triad can also be described as a minor third interval with a major third interval on top.

See a major triad and a minor triad on staff and keyboard below

C Major triad (C E G)

C minor triad (C Eb G)

On the piano keyboard major and minor triads are as follows:

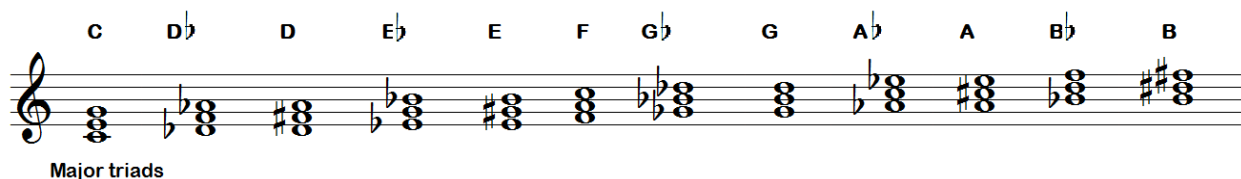

C Major triad (C-E-G)

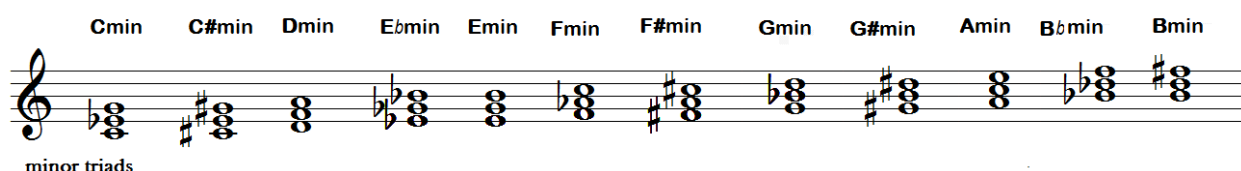

C minor triad (C-Eb-G)

Below is how to build major triad chords on every note of the scale

Below is how to build minor triad chords on every note of the scale.

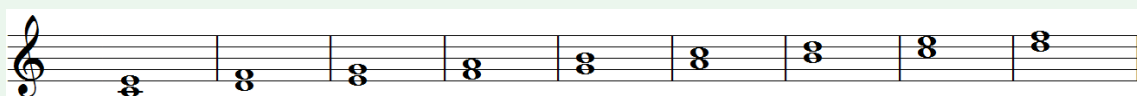

Remember that the minor triad chord is the same as the major triad chord with the same letter name except the **3rd degree** is flatted in the minor triad chord. Counting the number of tones and semi-tones will be the base of success.

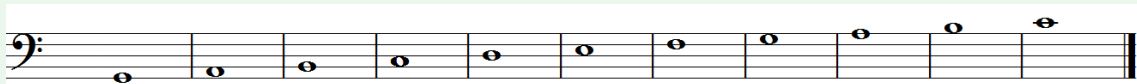

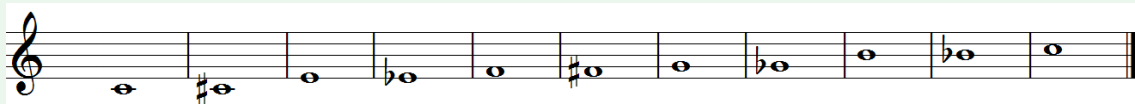

APPLICATION ACTIVITY 2.2

- a) Indicate whether the following are major third (**M3**) or minor third (**m3**).

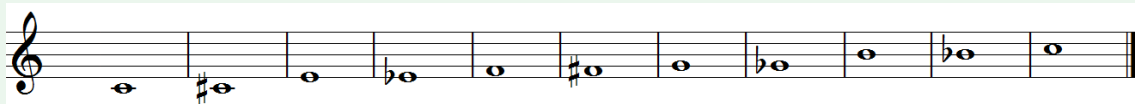

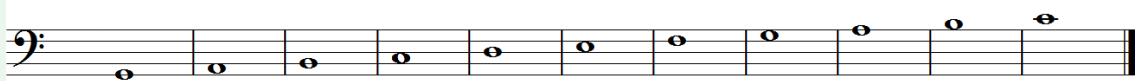

- b) Draw a Major third above each of the following notes.

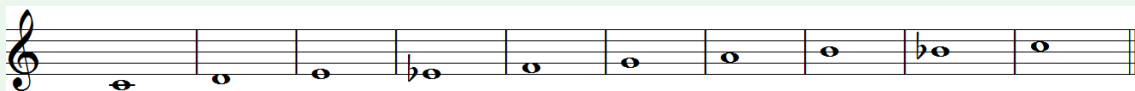

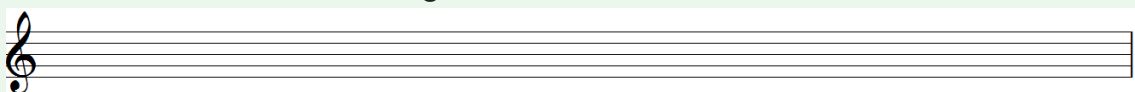

c) Draw a Minor Third on each of the following notes

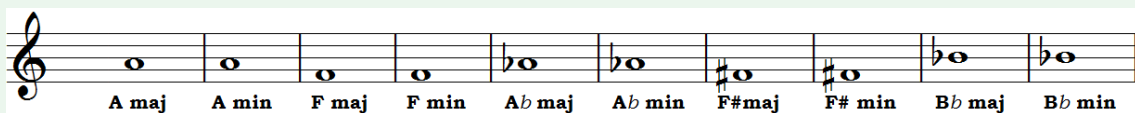

d) Build a Major Triad on each of the notes on the staff.

e) Now build a Minor triad using the same notes in the activities 4 above.

f) Write the correct triads

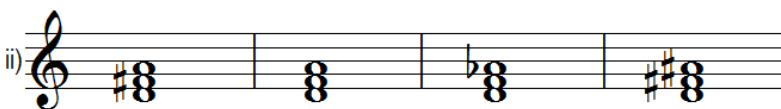

g) Explain how the combination of three different notes to form a triad teaches us **tolerance** and **respect** for diversity in everyday life.

Learning activity 2.3

1. For each staff below, indicate the number of tones and semitones between the root and the third, the root and the fifth, and the third and fifth

2. Comment on the differences observed in question 1.

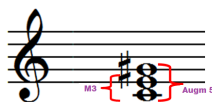

2.1.3.3. Diminished and augmented triads

Apart from major and minor triads, we have also two other triad qualities which are diminished and augmented triads.

A diminished triad is built with a minor third (m3) and a diminished fifth (dm 5) above the root.

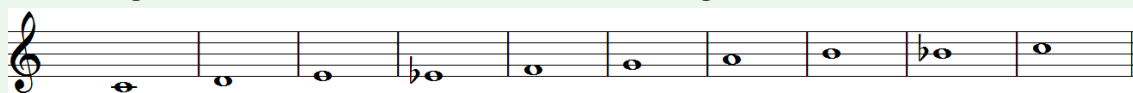

The augmented triad is built with a major third (M3) and an augmented fifth (Aug5) above the root.

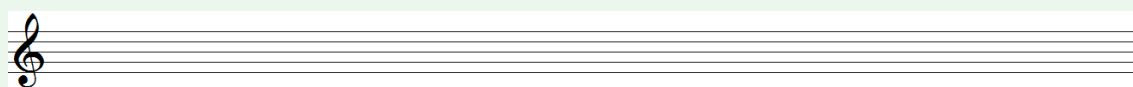

APPLICATION ACTIVITY 2.2

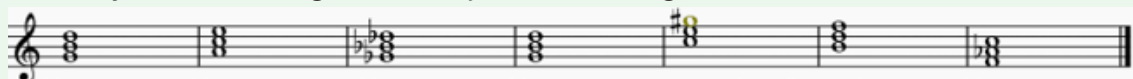

- i. Build augmented triads on each of the following notes

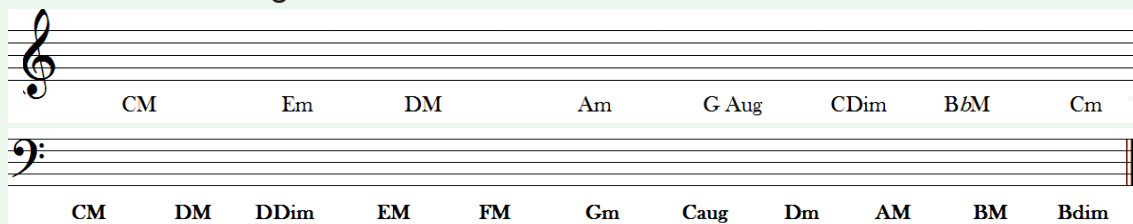

- ii. Use the same notes above to build diminished triads on the following musical staff.

- iii. Identify the following triad (**M**ajor, **m**inor, **a**ugmented or **d**iminished)?

- iv. Build the following triads on the staves below.

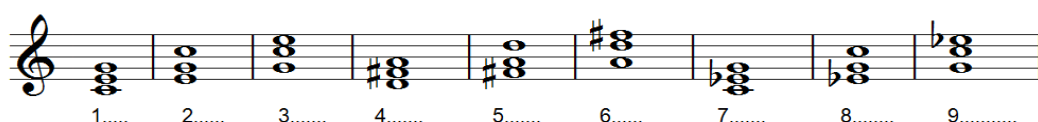

- v. Explain the values you can learn as a performer when practicing diminished and augmented triads. Give examples.

2.1.3.4. Inversion of triads

Learning activity 2.4

1. Analyse each given triad and determine its correct name

a) Triad inversion

As previously see, a triad consists of three notes:

- 1) **Root** – the starting or naming note of the chord
- 2) **Third** – the note a third above the root
- 3) **Fifth** – the note a fifth above the root

Triad inversion is about rearranging the notes of a triad. Therefore, an inversion of a triad occurs when the root of the chord is not the lowest note. Although the order of the notes changes, the quality and name of the triad remain the same.

Below is an example of a C major triad shown in its different positions (root position, first inversion, second inversion) on the musical staff and the piano keyboard.

The diagram illustrates the C major triad in three positions:

- Root position:** The notes C, E, and G are shown on a musical staff (C on the first line, E on the second line, G on the second space) and on a piano keyboard (C, E, G).
- First inversion:** The notes E, G, and C are shown on a musical staff (E on the second line, G on the second space, C on the third line) and on a piano keyboard (E, G, C).
- Second inversion:** The notes G, C, and E are shown on a musical staff (G on the second space, C on the third line, E on the third space) and on a piano keyboard (G, C, E).

APPLICATION ACTIVITY 2.4

a) Identify the following triads

The musical staff shows six triads for identification:

- C major (C, E, G)
- G major (G, B, D)
- A minor (A, C, E)
- E major (E, G, B)
- F major (F, A, C)
- D minor (D, F, A)

b) Invert these chords (1st and 2nd inversions).

The musical staff shows eight chords for inversion:

- CM
- GM
- Am
- Bdim
- EM
- FM
- Cm
- Gdim

c) Build the following inversion of triads

The musical staff shows six triads for building:

- CM 1st inversion
- Cm root position
- BbM 2nd inversion
- Bdim root position
- FM
- Dm 1st inversion

2.2. Diatonic triad chords

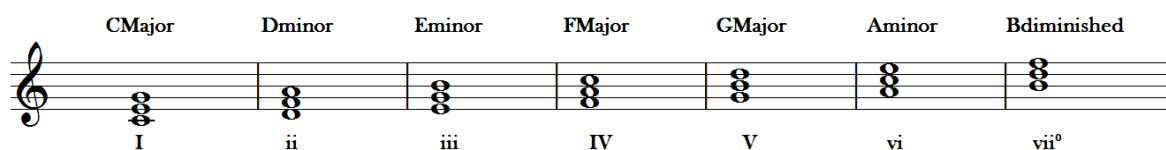

Learning activity 2.5

1. Identify the notes that do not belong to the above five diatonic scales,
a) C D E F G A B C b) C D E F[#] G A B C c) G A B C D E F[#] G
d) G A B C[#] D[#] E F G
2. Build the triads based on:
a) C tonic b) G tonic

Diatonic triad chords are chords whose notes are made from the notes of the particular scale, being minor or major. It means all notes of these chords are found inside that particular scale; no notes outside the scale.

2.2.1. Major key diatonic triad chords

Taking C major as an example, we can show the seven types of diatonic triads that occur on each degree of major scale.

As you have noticed, for example, the **D** minor triad chord is a diatonic chord in the key of **C** because its notes, **D-F-A**, occur in the **C** Major scale. The **D** Major chord, D F[#] A, is not a diatonic chord in the key of **C** because the **F[#]** does not occur in the scale of C Major. However, the **D** Major chord is a diatonic chord in the keys of **D** Major, **G** Major and **A** Major.

Use of roman numerals

The Roman numeral indicates the scale degree of the chord root, e.g.: (i, ii, iii, IV V, vi, vii°)

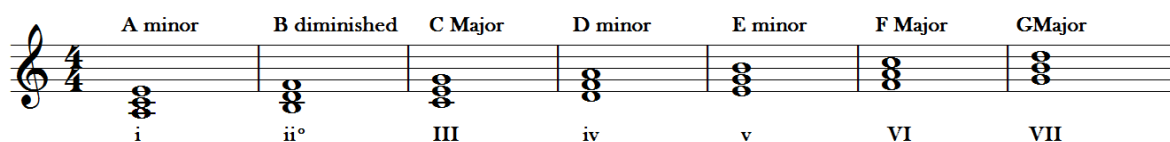

Triad/Chord quality is indicated as follows:

- Major is upper case: I, IV, V
- Minor is lower case: ii, iii, vi
- Diminished is lower case with an added: vii°

Remember that this pattern I, IV, V (major chords), ii, iii, vi (minor chords) and vii° (diminished chord) is common to all major keys.

2.2.2. Minor key diatonic triad chords

Taking A minor natural as an example, we can show the seven types of diatonic triads that occur on each degree of the minor scale.

Use of roman numerals

The Roman numeral indicates the scale degree of the chord root e.g.: (I, II°, III, IV, V, VI, VII).

Triad chord quality is indicated as follows:

- Minor is lower case: i, iv, v
- Major is upper case: III, VI, VII
- Diminished is lower case with an added °: ii°

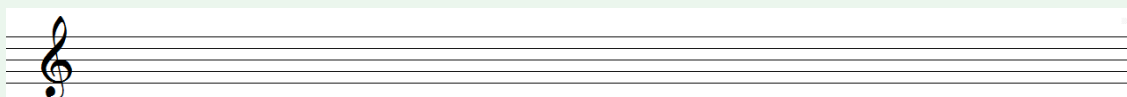

Notice that these are the same diatonic chords of C Major. Only the Roman numerals and their qualities have shifted over by the notes (or six depending on which way you go) to accommodate the relative minor key of A.

Remember that this pattern i, iv, v (minor chords) III, VI, VII (major chords) and ii° (diminished chord) is common to all natural minor keys.

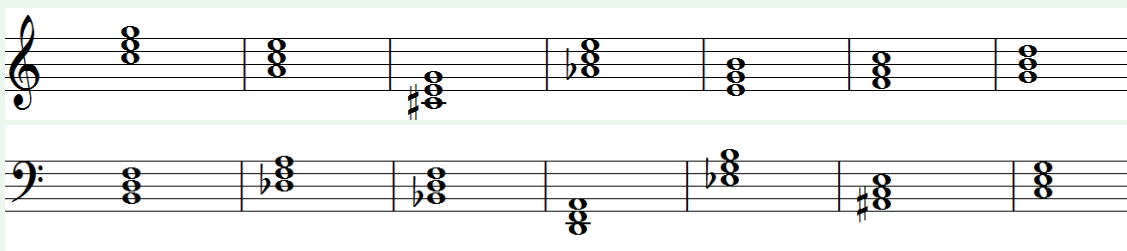

APPLICATION ACTIVITY 2.5

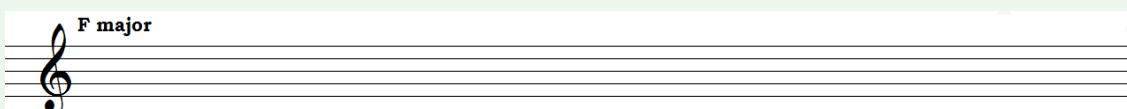

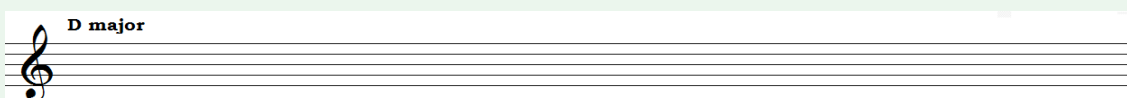

1. In C major key which triads are minor?
2. In A minor key which triads are major?
3. Using notes of the C major scale, build chords on a very scale degree.

4. Add a sharp or flat to the third or fifth, where necessary, to make each triad major. Circle the triads that need no sharps or flat.

5. Build triad chords (ascending) on the following scales. Use Roman numerals to indicate the triad chords roots.

E major

D minor

E minor

2.2.3. Primary chords

Learning activity 2.6

1. Play the C major scale ascending and descending
2. Identify the 1st, 4th, and 5th degrees of the scale and build a triad on each of the primary degrees by selecting the 1st, 3rd, and 5th notes from the scale
3. Sing each triad together and listen carefully to the sound of each chord, then state which triad sound most complete or final and which one sound like it wants to return to another chord.

Primary triad chords or I IV V triad chords are the three most used chords.

For example, in the key of C major the primary chords are: **C** (I), **F** (IV) and **G** (V).

In D major, the primary chords are: **D** (I), **G** (IV) and **A** (V).

Major key diatonic triad chord names are: **i** chord = Tonic; **ii** chord = Supertonic; **iii** chord = Mediant; **IV** chord = Subdominant; **V** chord = Dominant; **vi** chord = Submediant; and **vii^o** chord = Leading Tone

So, the primary chords are the following: **I** = Tonic; **IV** = Subdominant; and **V**: Dominant

Here are the **Primary Chords** in the key of **C major**:

I IV V I

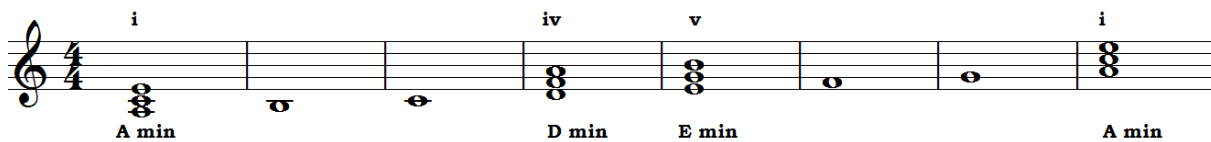

C F G C

Primary chords in a minor key

Minor key diatonic chord names are the following: (i) chord – Tonic; (ii^o) chord – Supertonic; (iii) chord – Mediant; (iv) chord – Subdominant; (v) chord – Dominant; (VI) chord – Submediant; and (VII) chord – Subtonic

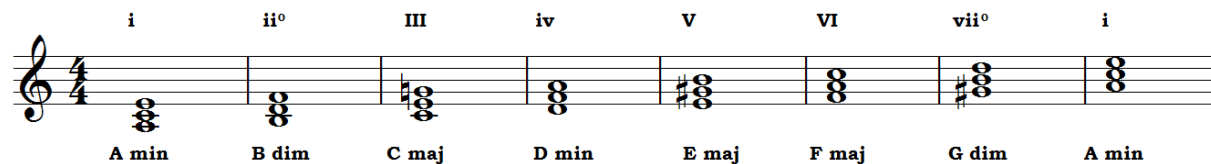

So, the primary chords in a minor key are: **(i)** = Tonic; **(iv)** = Subdominant; and **(v)** = dominant

Here are the primary chords in the key of A natural minor:

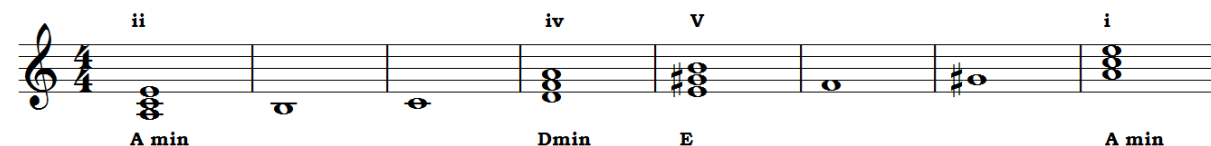

For the harmonic minor, which is a type of minor key mostly used, the chords will be as follows: (i) chord – Tonic; (ii°) chord – Supertonic; (iii) chord – Mediant; (iv) chord – Subdominant; (V) chord – Dominant; (VI) chord – Submediant; and (vii°) chord – Leading tone.

Below, are the harmonic minor key chords:

So, the primary Chords in the key of A harmonic minor are: **(i)** = Tonic; **(iv)** = Subdominant; and **(V)** = dominant.

APPLICATION ACTIVITY 2.5

1. Build the chords (ascending) on the following scales, then after circle the Primary chords of the same scales. The tonic chord is done for you.

D major I

E major I

E minor i

D minor i

2. Draw musical staves and build the triad chords of the following keys.
A, Db, B, Gb, F# min,
3. In group of three sing the triad chords of C major and then the triad chords of A minor. One sings the root, another sings the third and then another sings the fifth.

C major

A minor

4. In groups discuss the different feelings between minor and major.
5. In groups, sol-fa and sing the melodies below. One group sing the upper notes; the second group sing the middle notes and then first group sing the lower notes.

I love my fa - mi - ly and my school

they help make my fu - ture and hope

SCARBOROUGH FAIR

Traditional song

1. Are you going to Scar - bor - ough fair? Par - sley
2. Tell her/him to make me a cam - bric shirt Par - sley

sage rose - ma - ry and thyme Re mem - ber me to
sage rose - ma - ry and thyme With - out no seams nor

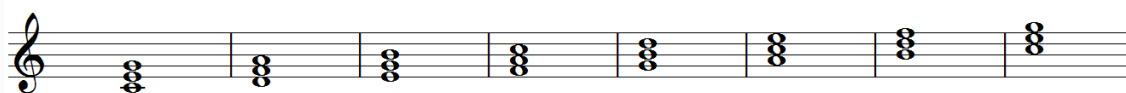

one who lives there she/he once was a true friend of mine
nee - dle work then she'll/he'll be a true love of mine

END OF UNIT ASSESSMENT 2

PART A: KNOWLEDGE AND UNDERSTANDING

1. What is a **triad chord** in music theory?
2. Name the **three notes** that make up a basic triad.
3. List the **four main types of triads**
4. Define **root position** of a triad.
5. What is meant by the first and the **second inversions** of a triad?
6. What are **primary triad chords** in a major or minor key?
7. State the difference between **primary** and **secondary triad chords**.
8. Consider the following notes and then answer the questions that follow:

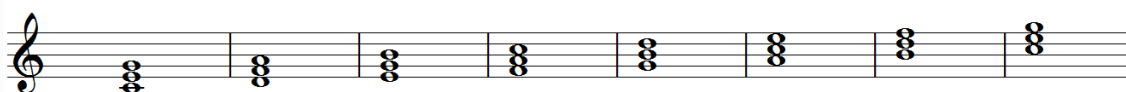

- i. say the type of triad in each measure explain the why of your choice.
9. Name the following major and minor triad chords

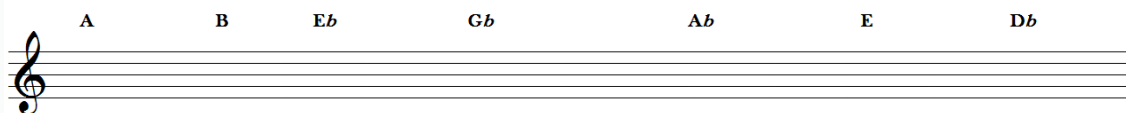

PART B: SKILLS

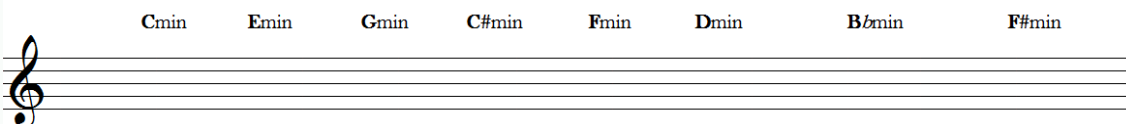

1. In group of three sing following notes simultaneously starting from the bottom C.

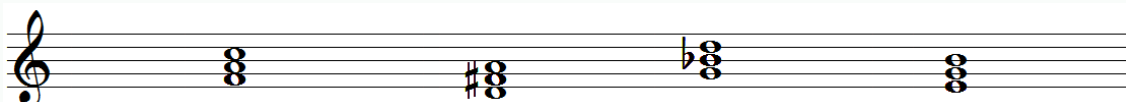

2. Write the following major triad chords on the staff

3. Write the following minor triad chords on the musical staff

4. Write the first and second inversion of the following triad chords

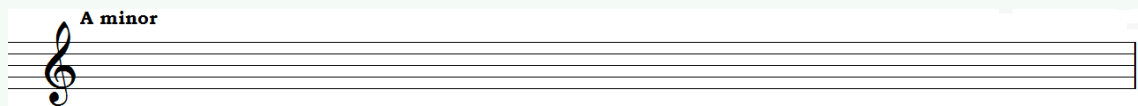

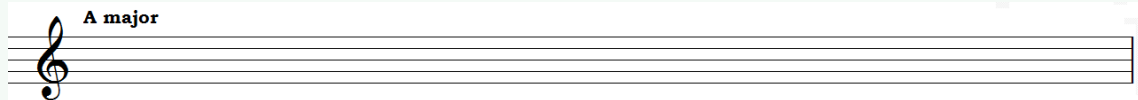

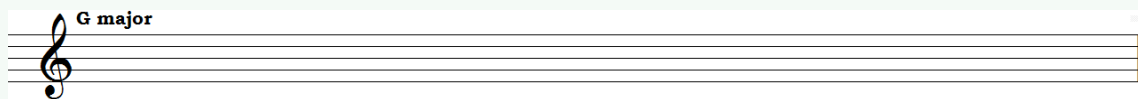

5. Draw musical staves and build the triad chords of the following keys.

F# major, G min, Eb min

6. Build triad chords (ascending) on the following scales. Use Roman numerals to indicate the triad chords roots.

7. Solfa and perform the following song

PART C: ATTITUDES & VALUES

1. Explain how learning triad chords can help you develop important attitudes.
2. Describe how singing in a four-part choir (Soprano, Alto, Tenor, Bass) helps learners develop values. Provide examples of three values in your explanation.

UNIT III:

EXPRESSIVE ELEMENTS IN MUSIC PERFORMANCE

Key unit competence

By the end of the unit, students will be able to perform a song with dynamics, tempo and articulation marks.

Learning outcomes

By the end of the unit, you should be able to:

Knowledge and understanding

- Identify dynamics, tempo, and articulation marks in music.
- Compare various performance techniques (e.g. dynamics, articulation, and tempo).
- Describe how performance techniques contribute to musical communication.

Skills

- Apply dynamics, tempo and articulation marks in a piece of music.
- Perform a short piece of music respecting performance techniques.
- Evaluate peer students' compositions and performances using constructive feedback.

Attitude and values

- Demonstrate confidence and attentiveness by applying appropriate performance techniques in singing, musical composition, and instrumental accompaniment.
- Show responsibility and collaboration by preparing effectively for rehearsals and participating actively in group performances.
- Value teamwork by working cooperatively with peers to rehearse and perform songs successfully.

INTRODUCTION

Music is more than a sequence of correct notes and rhythms. The true beauty of a musical performance lies in how performers communicate feelings, moods, and meaning to their listeners. This communication is achieved through expressive elements. In this unit, you will study three essential expressive elements in music performance: dynamics, articulation, and tempo. Dynamics shape the loudness and softness of music; articulation determines how notes are played or sung either smoothly, sharply, lightly, or heavily while tempo controls the speed of the music.

Introductory activity

1. In group sing any song you know in ten different ways indicated below, then discuss:
 - i. Moderate speed
 - ii. Quickly
 - iii. In a low voice
 - iv. In a high voice.

4.1. Dynamics

Learning activity 3.1

1. In a group of five choose your favourite song and perform it in the following ways:
 - a) Low voice
 - b) Middle voice
 - c) High voice
2. Appreciate the different ways of performances.

In music, dynamics refer to the degree of loudness or softness of sound in music. They indicate how loudly or softly a piece of music should be played or sung to express different emotions and musical effects. Dynamics direct the performer or conductor during music performance to which loudness a piece of music is to be performed.

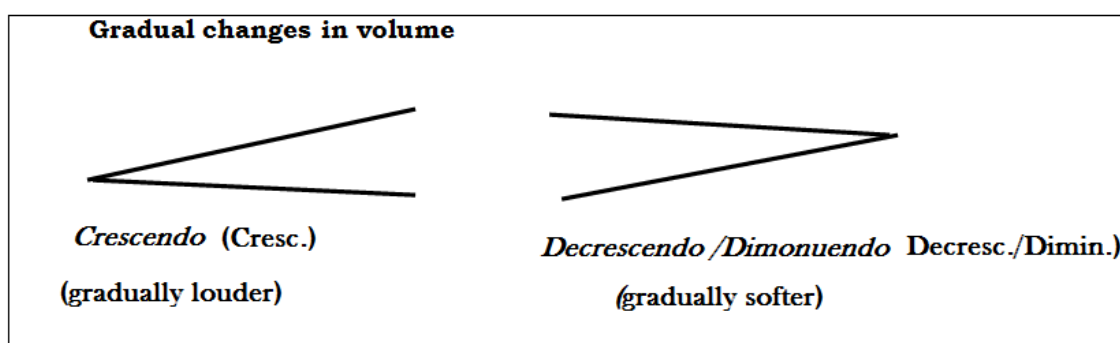

Musicians use *dynamic markings* to guide their performance. Common examples include:

- *p (piano)*: soft
- *f (forte)*: loud
- *pp (pianissimo)*: very soft
- *ff (fortissimo)*: very loud
- *crescendo (<)*: gradually getting louder
- *decrescendo (> or diminuendo)*: gradually getting softer

Dynamics help performers make music more expressive and interesting by adding contrast and emotion.

The following combinations are possible, going from softest to loudest:

Symbols	Italian	English
ppp	pianississimo	extremely soft
pp	pianissimo	very soft
p	piano	soft
mp	mezzo piano	medium soft
mf	mezzo forte	medium loud
f	forte	loud
ff	fortissimo	very loud
fff	fortississimo	extremely loud

Fp = *Forte piano* = begin the note loud, but drop it to soft immediately

sf/sfz = *sforzando* = forced, accented, sudden accent on a single note or chord.

sfp = *sforzando piano* = sudden accent followed immediately by soft

fp = *forte piano* = loud followed immediately by soft

Words used to indicate changes in dynamics.

These are qualified terms used to indicate the mood, degree intensity or style.

Fortissimo piano = very loud and then immediately soft

Agitato = agitated

Animato = animated

Marcato = stressed, pronounced

Dolce = sweetly

Pianoforte = soft and then immediately strong

Expressive = expressively

Energico = energetically

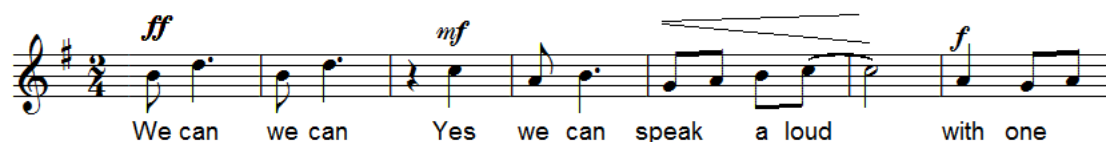

Smorzando = dying away

APPLICATION ACTIVITY 3.1

1. Sol-fa and perform the song.

Let us unite

2. Compose a melody using the following lyrics, then incorporate a variety of dynamics to enhance expression of the song.
*Love stands above all things,
 We are called to love as one;
 Living together in harmony,
 Calling the oppressor to repent,
 To change, to heal, to be reborn.*
3. Create your own lyrics, then compose a song using those lyrics. Incorporate dynamics of your choice to enhance the musical expression.
4. Explain how dynamics (soft and loud passages) in music can teach you values in everyday life.
5. Why is it important to carefully follow the dynamics in a group performance? Which values does this encourage, and how?

3.2 Articulation

Learning activity 3.2

1. In a group of five choose your favourite song and perform it in the following ways:
 - a) Detaching some notes while singing
 - b) Holding some notes longer before continuing singing
2. Appreciate the different ways of performances

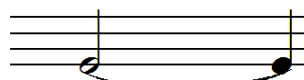

In music, articulation refers to the musical direction performance technique which affects the transition or continuity on a single note, or sometimes; they (articulations) mark the strength of individual notes. They can be placed above or below the notes.

Below are some of the articulations we use in music

Slur is a symbol indicating that two or more notes it embraces are to be played or sung without separation. These notes are played in legato style.

Tie is a curved line that joins two notes of the same pitch.

Staccato is the opposite of legato. **Staccato** means short, detached, method of playing or singing a note, usually half the value performed note.

Staccatissimo means the note is to be performed very short comparing to staccato. It is an exaggerated staccato. Usually applied to crotchets (quarter notes) or shorter.

Accent means play or sing the note louder, it must be most pronounced but held for its full value.

Marcato indicate that the note should be played louder or more forcefully than surrounding notes.

Tenuto holds the note for its full value or give a slight emphasis to the note.

Legato indicate that musical notes are played or sung smoothly and connected. Usually, a slur joins these notes.

Fermata means hold the note for approximately twice as long as its normal value. It is usually used at the end of a piece of music or at the end of a section.

APPLICATION ACTIVITY 3.2

1. Sol-fa and perform the songs

Rwanda, rise up

Rwa - nda rise up be a shi - ning light to the world

bring all your peo-ple to - ge - ther for - e - ver and e - ver

Dukorere hamwe

Tu rwa nyeu bu ne bwe du ko re re ha mwe

du ha ra ni rei te ra mbe re ri ra mbye twu ba

keu Rwanda rwa cu ru bei ndashyi ki rwa kui si ho se

2. Compose your own song and use different articulation marks then perform.

3. Explain how practicing different types of articulation (staccato, legato, accents) can help you develop **focus** in your daily life.
4. While performing a piece with varied articulations, what attitude should you adopt to show **respect for your fellow performers**?

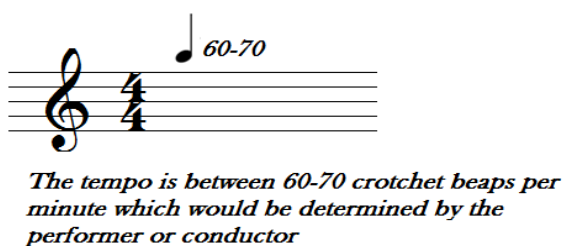

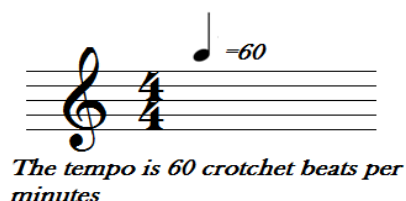

3.3. Tempo

Learning activity 3.3

1. In a group of five choose your favourite song and perform it in the following ways:
 - a) slowly
 - b) moderate speed
 - c) quickly
2. Appreciate the different ways of performances.

In music, a Tempo refers to the speed at which a piece of music is to be played.

Tempo can also be indicated by using the Italian words to approximate the speed.

- **Grave** = extremely slow and solemn (20–40 BPM)
- **Largo** = slow (40–60 BPM)
- **Lento** = slow the same as Largo. (40–60 BPM)
- **Larghetto** = a little faster than largo and Lento (60–66 BPM)
- **Adagio** = Moderately slow (literally, "at ease") (66–76 BPM)
- **Andante** = at a walking pace, moving along/walking tempo (76–108 BPM)
- **Andantino** = slightly faster than andante
- **Moderato** = moderate pace (108–120 BPM)
- **Allegretto** = moderately fast/slower than allegro (but less so than allegro)
- **Allegro** = fast, quickly and bright (120–168 BPM)
- **Vivace** = fast/quickly and lively (≈140 BPM) (quicker than allegro)
- **Vivacissimo** = very fast and lively
- **Allegriissimo** = very fast
- **Presto** = very fast (168–200BPM)
- **Prestissimo** = extremely fast (*more than 200 BPM*)

Additional terms

A *piecere*= (also known as ***ad libitum*** in latin) the performer may take liberties about tempo and rhythm, literary at pleasure.

Often a tempo will change gradually. Gradual accelerations or decelerations in tempo are indicated by:

Abbreviation	Italian	English
<i>Accel.</i>	<i>Accelerando</i>	Gradually accelerate
<i>Rit./Ritard.</i>	<i>Ritardando</i>	Gradually slow down
<i>Rall.</i>	<i>Ralletando</i>	Gradually slow down
<i>A tempo</i>	<i>A tempo</i>	Resume original speed
<i>Tempo primo</i>	<i>Tempo primo</i>	First tempo
<i>Rub.</i>	<i>Rubato</i>	Free adjustment of tempo for expressive purposes
<i>Piu mosso</i>	<i>Piu mosso</i>	More movement or faster
<i>Mosso</i>	<i>Mosso</i>	Livelier, or quicker but not much like piu mosso
<i>Meno mosso</i>	<i>Meno mosso</i>	Less movement or slower
<i>Doppio movimento</i>	<i>Dopio movimento</i>	Double the speed
<i>Allarg.</i>	<i>allargando</i>	Getting broader

Terms used to indicate simultaneous reduction of speed (tempo) and volume.

Mor. Morendo=dying away

Cal. Calando =decreasing tone and speed

Smorz. Smorzando=dying away

Incalzando=increasing tone and speed

APPLICATION ACTIVITY 3.3

1. Draw lines connecting each musical term or symbol to its correct definition. First word is done for you.

Allegro	very very fast
	fast, but not too fast
Fortissimo	very very soft
Ritardando	with sudden accentuation
Sfz	loud
A tempo	soft
Prestissimo	a pause upon a note or rest
Pianississimo	gradually decreasing
Piano	same as original speed
Forte	very loud

2. Solfa and perform respecting the indicated tempo

I shall praise You

Moderato

O Lord you are my shield and my strength You or - der mysteps

Allegro *A Tempo*

as I walk in your way your grace and mer-cy are be-yond all

Vivace *Largo*

mea-sure my soul shall praise you my soul shall praise you for - e - ver

Tubibungabunge

Moderato

Tu bu nga bu nge i bi du ki ki je i bi ya gai nzu zi nii

Vivace

mi ge zi tu bi si ga si re a masyambatwe ku ya twi ka

Lento *Allegretto*

i nya ma swa zi da ga du re ba ru shi mu si tu ba ma ga ne tu

Vivacissimo

ba bu zea ma hwe mo Yee i bi du ki ki je nii

Largo

ngi ra ka ma ro mu bu zi ma bwa bu ri mu nsi

3. Solfa and sing respecting dynamics and tempo.

UBUKWE

mf Andante *Cresc*

U bu kwe bu ra ta shye twe se twi zi hi we

Decresc *mf*

u bu kwe ni bwi za u mu kwe n'u

4. Compose a song and use different tempo and then perform
5. A pianist rushes through a slow passage or play slowly a fast passage. How does this behaviour relate to the value of responsibility? Explain.
6. Demonstrate the attitude you should adopt while performing a piece with changing tempo to ensure a successful performance. Explain how this attitude affects your playing and the overall harmony of the group.

3.4. Repeat signs

Learning activity 3.4

From your favourite song, choose and perform it in the following ways:

- a) Perform repeating some parts of the songs and then continue.
- b) Appreciate the different ways of performances.

In music, *repeat signs* are used to direct the performer to which section of the music should be repeated.

How to follow repeat signs?

- Two dots before a double bar form a *repeat sign*. If a repeat sign occurs at the end of the piece, it indicates that you should repeat the entire piece of music once from the beginning up to the end.

Example:

1. play/sing to repeat sign

2. go back to beginning

3. play / sing to repeat sign

When you encounter a repeat sign in the middle of a piece, you must play/sing up to the repeat sign and then go back to the beginning and repeat the section before going on.

Example:

1. Play to repeat sign

2. back to the beginning

3. play to the end

3.5. Inverted repeat

To play the inverted repeat, you play to the original repeat, then you go back to the inverted repeat and play/sing to the end. In the example below the inverted repeat sign means that you should skip the first measure when you repeat the piece.

Example:

1. play to repeat sign

2. go back to inverted repeat signs

3. play to repeat sign

3.6. Alternate Endings (1st and 2nd ending)

A bracket and number are used to show the performer that there are multiple endings for a piece of music. You should play/sing through the first ending and then return to the beginning. Then play/sing through the piece again skipping the first ending; play/sing the second ending until the end. *Third and higher ending are also possible.*

1. play/sing to repeat sign

2. go back to the beginning

3. play/sing to first ending

skip play

3.7. Da Capo (D.C.)

Da Capo (abbreviated D.C.) means go back to the beginning of the piece and repeat. To

perform a D.C., you play/sing until you reach to D.C. then go back to the beginning then you play/sing from there until the end of music.

1. play/sing to *D.C.*

2. go back to the beginning

3. play/sing to *D.C.*

3.8. Da Capo al Coda (D.C. al Coda)

To perform Da Capo al Coda (D.C. al Coda), play/sing until you reach *D.C. al Coda*, go back to the beginning and play to the Coda sign (⦿); then skip, and play the CODA (a short ending section).

1 play to *D.C. al Coda*

2. go back to the beginning *D.C. al Coda*

3. play to coda sign (⦿) skip play to end

3.9. Da Capo al Fine (D.C. al Fine)

To perform *Da Capo al Fine* (D.C. al Fine), you play/sing until you reach *D.C. al Fine* and then go back to the beginning and play through to the mark *Fine* itself signifying *END* or *ENDING*.

1. play/sin to *D.C. al Fine*

2. go back to the beginning

3. play/sing to *Fine*

3.10. Dal Segno

To perform Dal Segno, play/sing until you reach D.S. then go back to the sign (§), then from there, continue playing to the end.

1. play/sing to *D.S.*

2. go back to §

3. play/sing to *D.S.*

3.11. D.S. al coda

To perform D.S. al Coda, you play/sing until you reach D.S. al Coda (or D.S. To Coda) then you go back to the Segno sign (§), and repeat until you reach the Coda sign ☐. When you get to the Coda sign, you skip down to the Coda ☐, a number of measures at the end of the piece.

1. play/sing to *D.S. al Coda*

2. play/sing §

3. play/sing to ☐

play/sing Coda

D.S. al Coda

CODA

3.12. D.S. al Fine

To perform *D.S. al Fine*, you play/sing until you reach the word D.S. al Fine, go back to the Segno sign (§), then continue playing/singing until the point marked *Fine*.

1. play/sing to *D.S. al Fine*

2 go back to §

3. play/sing to *Fine*

Fine

D.S. al Fine

APPLICATION ACTIVITY 3.4

1. Solfa and perform the songs

Our elders

f *Moderto*

Our el-ders are with us their sto-ries guide our days

mf

with wis-dom and care Res-pect res-pect to our

f

el-ders Ho-nour their deeds their words are seeds of wis-dom dom *D.C.*

Singing peace

A-cross the moun-tains a-cross the plains we lift our voi - ces sing-ing peace

hand in hand we stand as one sing-ing peace e - very time sing-ing peace

Fine

e - very time We sing peace we sing love no more sar-row no more fight

D.C. al Fine

let the world hear our songs to ge ther is where we be long

I shall praise You

Moderato

O Lord you are my shield and my strength You or-der my steps

Allego *A Tempo*

as I walk in your way your grace and mer-cy are be-yond all

Vivace *Largo*

mea-sure my soul shall praise you praise you for - e - ver

Tubibungabunge

Moderato
Tu bu nga bu nge i bi du ki ki je i bi ya gai nzu zi nii

Vivace
mi ge zi tu bi si ga si re a mashyambatwe ku ya twi ka

Lento *Allegretto*
i nyama swa zi da ga du re ba ru shi mu si tu ba ma ga ne tu

Vivacissimo
ba bu zea ma hwe mo Yee i bi du ki ki je nii

Largo *D.S.*
ngi ra ka ma ro mu bu zi ma bwa bu ri mu nsi

2. Compose your own song and use repeat marks in it then perform
3. Identify and explain the values you demonstrate when you correctly follow repeat marks while performing a piece of music. How do these values contribute to a successful performance?
4. Describe a situation outside music where repeating a task carefully (like following repeat marks) can help you demonstrate perseverance or responsibility.

END OF UNIT ASSESSMENT 3

PART A: KNOWLEDGE AND UNDERSTANDING

1. What is meant by **articulation, tempo, dynamics and repeat marks** in music?
2. Give two examples of symbols used to indicate very soft and very loud in music.
3. Why is it important for a performer to follow dynamic markings in a musical piece?
4. Explain what is meant by *accelerando* and *ritardando*.
5. Why should musicians pay attention to tempo markings when performing?
6. What does *D.C. al Fine* instruct a musician to do?
7. What is the function of *D.S. al Coda* in a musical score?
8. Why are repeat signs important in music performance and composition?

PART B: SKILLS

1. Sol-fa and sing respecting dynamics, tempo and repeat marks.

a)

NZAHANIRA GUTERA IMBERE

Two staves of music in 2/4 time. The first staff starts with a treble clef, a key signature of one sharp (F#), and a tempo marking of *f Allegro*. It contains the lyrics: Nza ha ra ni ra gu te rai mbe re nza ko ra nau mwe te. The second staff continues with the lyrics: i gi he cyo se na ma ga neu bu ne bwe bu ne bwe. It includes a *mf Rall* marking and a repeat sign with first and second endings.

b)

BE MY GUIDE

Two staves of music in 3/4 time. The first staff starts with a treble clef, a key signature of three flats (Bb, Eb, Ab), and a tempo marking of *Cresc.*. It contains the lyrics: Je - sus come come in my life come come and be my guide. The second staff continues with the lyrics: Je - sus come come be my guide I'll be your ser-vant for - e - ver. It includes a *Decresc* marking, a *Cresc.* marking, a *Dimin.* marking, and a *D.S.* marking.

c)

THE LORD, MY SAVIOUR

Three staves of music in 4/4 time. The first staff starts with a treble clef, a key signature of two sharps (F#, C#), and a tempo marking of *Moderato*. It contains the lyrics: The Lord is my sa - viour and my hope I'll. The second staff continues with the lyrics: ne - ver go far a - way from Him When I'm in trou - bles. It includes a *Cresc* marking, a *Fine p* marking, and a *mf* marking. The third staff continues with the lyrics: he comes to me I'll ne - ver stop prai - sing Him. It includes a *f* marking, a *ff* marking, and a *DC al fine* marking.

d)

WE ARE ONE

Adantino *mf* *p*

The peo - ple of the world we are one we are

Allegretto

one let's leave in har - mo - ny and work hand by

Fine *A tempo*

hand 1.Let's say no to ha - tred let us u nite
2.Let's say no to the wars let us u nite
3.Let's par - don who wrong'd us let us u nite

2. Rehearse the following songs and perform before the peers

My God

mf Andate *f Modereto*

I love you O Lord my strength my rock my for - tress

ff Vivace *Moderato*

you are my God in you I take re - fuge fuge You are my rock in

Allegretto *Rall* *D.S.*

you I take re - fuge I fear no e - vil for you are with me

3. Solfa and perform the following song

How Great Thou Art

Stuart Wesley Keene Hine, 1953

$\text{♩} = 80$

1. O Lord my God, when I in awe - some won - der Con - sid - er
2. When through the woods and for - est glades I wan - der And hear the
3. And when I think that God, his Son not spar - ing, Sent him to
4. When Christ shall come with shout of ac - cla - ma - tion And take me

all the worlds thy hands have made, I see the stars, I hear the roll - ing
birds sing sweet - ly in the trees, When I look down from loft - y mount - ain
die, I scarce can take it in, That on the cross, my bur - den glad - ly
home, what joy shall fill my heart! Then I shall bow in hum - ble a - dor -

Refrain

thun - der, Thy power through - out the un - i - verse dis - played:
grand - eur, And hear the brook and feel the gen - tle breeze: Then sings my
bear - ing, He bled and died to take a - way my sin:
- a - tion, And there pro - claim, "My God, how great thou art!"

soul, my Sav - ior God, to thee: How great thou art! How great thou art! Then sings my

soul, my Sav - ior God, to thee: How great thou art! How great thou art!

4. Using music notation, compose a song on a topic of your choice and then perform before the peers. (Use tempos and dynamics of your choice).

PART C: ATTITUDES & VALUES

- a) Why is it important to carefully follow the dynamics in a group performance? Which values does this encourage, and how?
- b) Why is it important to maintain a steady tempo in a group performance? Which **values** are promoted through this practice, and how?
- c) A musician skips repeat marks or ignore them. What value is being neglected, and why is it important to follow them?

UNIT IV:

PERFORM A SHORT PLAY IN VARIOUS LANGUAGES

Key unit competence

By the end of the unit, students will be able to perform a short play in different languages.

Learning outcomes

By the end of the unit, you should be able to:

Knowledge and understanding

- Explain importance of props and costumes in acting.
- Describe various key roles in a play performance.
- Demonstrate the structure of a play.

Skills

- Stage a short play by effectively coordinating scenes, setting up props, lighting, and sound.
- Write a short play in different languages and translate the script into a live performance.
- Portray characters convincingly by using appropriate voice, facial expression, and body movement during performance.

Attitude and values

- Demonstrate appreciation for creativity and dramatic performance by valuing originality and expressive efforts in group work.
- Work collaboratively and respectfully in groups by sharing roles, appreciating peers' contributions, and supporting one another during play preparation and performance.
- Show responsibility and leadership by taking accountability for assigned tasks and effectively coordinating group activities during a play performance.

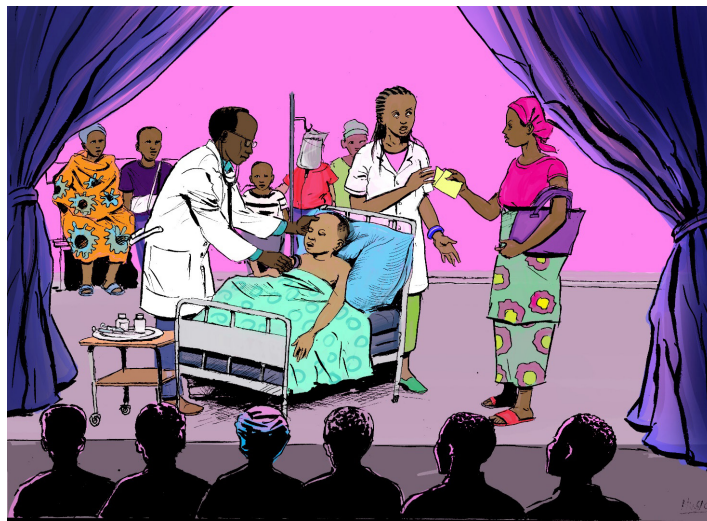

INTRODUCTION

This unit introduces you on drama as a powerful form of expression across different languages and cultures. In this unit you will engage in writing, rehearsing, and performing short plays while using various languages to communicate meaning, emotion, and character. You will explore how language, voice, movement, and expression work together to bring characters and stories to life on stage. Through collaborative activities, rehearsals, and performance, you will develop confidence, teamwork, and respect for cultural diversity while applying basic dramatic skills.

Introductory activity

1. Discuss what you can see in the picture below.

2. Identify the objects in the pictures? Why are they in the pictures?
3. What do you understand by 'participants in drama'?
4. Compare a play and a short story.
5. Choose a story you know and act it out before the peers.

4.1. Play Creation

Learning activity 4.1

1. Choose one of the following topics, imagine the scenario and perform:
 - a) You are sick and you go to see the doctor accompanied by your mother or father.
 - b) Your classmate boy or girl express his/her love for you, but you already have a boyfriend or girlfriend.
 - c) You are in the market, and a pickpocket steals your money before you can pay.

2. Discuss the beginning, middle and end of your performance for the scenario you chose.

In drama, a play is a story written to be performed by actors on a stage before an audience. It is presented through dialogue (spoken words), actions, and movements of characters instead of narration.

A play usually includes:

- *Characters*: the people in the story who perform roles
- *Dialogue*: the conversation between the characters
- *Scenes and acts*: the parts that organize the story
- *Stage directions*: instructions that guide actors on movements, expressions, and actions

In drama, a play helps actors communicate ideas, emotions, and events to the audience through performance.

4.2. Play structure

A structure of a play is built around the plot. The plot is how the author arranges events to develop his/her basic idea. It has logical series of events consisting of beginning, middle and end.

A play plot is structured into five parts:

- Exposition
- Rising action
- Climax (or turning point)
- Falling action
- Resolution (or denouement)

The exposition is the first part of the plot. It provides the background information needed to properly understand the story, such as the protagonist, the antagonists, the basic conflict, and the setting.

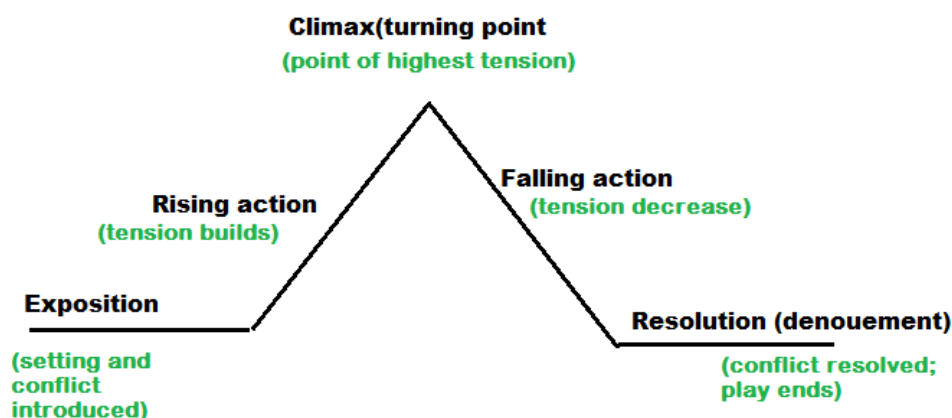

Rising action (complication) comes after the exposition. During the rising action the basic conflict is complicated by the introduction of the secondary conflicts. The main character takes some action to resolve the conflict and meets with problems or complications: danger, fear, hostility, etc.

Climax (turning point) marks a change, for the better or the worse in the main character (protagonist) affair. If the play is a comedy thing will begin to go well for him or her. If the play is a tragedy thing will start to go bad for the main character (protagonists).

Falling action comes after the climax. During the falling action, the conflict between the main character (protagonist) and the antagonist...The action of solving a problem, dispute, or controversial matter.

Resolution marks the ends of the play. If it is a comedy, it ends happily. If it is a tragedy it ends with a catastrophe. You learn how the conflict is resolved and what happens to the characters.

PLAY PLOT STRUCTURE DIAGRAM

4.3. What is a conflict in a play?

In a play, a conflict is a struggle or clash between opposing characters or forces. Conflicts may develop:

- between characters who want different things or the same thing
- between a character and his or her circumstances
- within a character who is torn by competing desires

4.4. Play versus sketch

Both sketch and play are meant to be performed before an audience. While the play is long a sketch is very brief; it is a one seen, often comic, performance which sometimes can be improvised. A sketch performance takes a short time ranging from one to ten minutes. Most of the time, the audience in sketch performance are limited to few people. In sum, we can compare a sketch to a very small play.

4.5. Writing a play script

Writing a Play Script involves creating a written plan for a drama performance that includes dialogue, characters, stage directions, setting etc. You first choose a theme such as friendship, culture then you create characters. A theme is what a play is about. Example friendship, Corruption etc. You will also need:

- *Characters* are people in the play such as a pastor, a driver etc.
- *Setting* is about where and when the play happens. Example settings: school, home, evening, past etc.)

Organize the Plot

- *Beginning*: introduction of characters and problem
- *Middle*: development of the conflict
- *End*: solution or lesson

- *Dialogues* are characters' words

Stage directions are instructions for action, movement, and emotion. Stage directions are written in italics or brackets

Act is a division in play. Note that short plays may have one act

Props (short for properties) are items that the actors carry or handle on stage during a performance to support the actions. Hence a prop is anything movable or portable on a stage. The person in charge of props must make sure that the right props are available to the actors at the right moments.

Examples of props: telephone, book, pens, gun, etc.

Categories of Props

- *Hand props*: any prop that can be manipulated by one or more actors during a performance. Examples of hand props are *a book, a gun, food, a cane, a basketball, a football etc*
- *Set Props*: set props include furniture on the stage during performance. Examples of set props are *bed, television, refrigerator, table, chair etc*
- *Personal/costume Props*: Anything worn by an actor during a performance. Examples of personal props are *pens, belts, sunglasses, jewellery, watch etc*.

4.6. Steps to create a play

Once you want to write a play you should:

- Decide the theme, topic the play will address (for example you may decide to make a play on love, patriotism, corruption etc)
- Determine the genres (examples comedy or tragedy).
- Choose the structure for the plot of the play (it means how events follow each other). Remember that the beginning introduces characters, and setting, and set up the situation or conflict.
- Choose characters and make them work.
- Create languages and actions of characters
- Remember to use stage directions to indicate for instance which props to use, describe the setting etc.

APPLICATION ACTIVITY 4.1

1. Read the extract below and then answer the questions that follow.

Early morning. Village noises fill the air as the curtain opens on a small cemetery. In the background, running light across the stage, is the wall of a modern church. In front of the wall are several graves randomly situated. Nuhu, Ndururu, and Mbaluto have just completed cementing the newest grave and are now busy clearing the tools of their trade. Jumba stands a little farther away from the masons, his eyes critically glued to the new grave. Satisfied with a job well done, he nods his head approvingly and walks towards Nuhu.

Jumba: Nuhu, son of Rabala!

Nutu: Speak Jumba, my ears are for the headman of Membe's words.

Jumba: This is truly the work of an old man. The name of whoever trained you should be preserved song.

Nuhu: Thank you, headman. Our composers should have been here to hear you say that.

Jumba: Yes, indeed. This is a job perfectly done.

Nuhu: Your late brother should deserve it. He was Membe's glow-worm in gone days.

Jumba: (*Absent minded.*) Yes, Mebe's glow-worm in days gone. (*Recovering*) I am sure his shadow is more than pleased with it.

Rosina: (*Entering*) Pleased? Did I hear you say, pleased? Jumba, my husband, why do you deafen your ears against my words? What worms block your ears when I speak?

Jumba: Worms? (*Clears his ears with index fingers.*) What worms?

Rosina: (*Determined to make her point.*) The church people, did you inform them?

Jumba: The church people had their turn, Maman Rosina. They buried their man and left. This is only a little family matter.

Rosina: Only a little family matter! My husband, Ngoya was your brother, true, but he was also a Pastor of the church. Do you now call the dressing of his grave, a little family matter? Ngoya was not only a Membe, no! He was a man of God. Remember that the sweetness of sugar is not in its colour.

Jumba: We are all men of God.

Extract from the play 'Aminata' by Francis Imbuga; PART ONE, Scene one.

- i. Discuss why some words are in *italics* while others are not.
 - ii. Which part of the extract interested you the most?
 - iii. What have you seen in the extract that can help you in writing your own play?
2. Compose a one scene play on the following topics in a language of your choice (French, English, and/or Kinyarwanda).
- | | |
|-------------------------------|------------------------------------|
| a) Family conflict management | b) Fight against school drop out |
| c) Election campaign | d) Fight against human trafficking |
| e) Fight against drug abuse | f) First day a big city |
3. Write a one scene play on a topic of your choice in French, English, or Kinyarwanda.
4. Can anyone be a good writer if he/she hates reading? Why?
5. Describe attitudes and values a good writer should adopt?

4.7. Key roles in a play performance

Learning activity 4.2

Consider the pictures below and then answer the questions that follow:

- Who are in the pictures?
- What are they doing?
- In a group of four, create a story based on the pictures below and tell it to the peers.
- Now act out the stories

We have seen that in a play we have characters that do actions in the play. When the play is to be performed the roles of characters are taken over by actors or actresses who perform before an audience. A group of actors/actresses who perform a play are known as a cast. When you take a role of a give character in a play you must perform by imitating him/her and be creative by improvising.

In a play performance, different roles work together to bring the story to life. These roles can be grouped into on-stage and off-stage (production) roles.

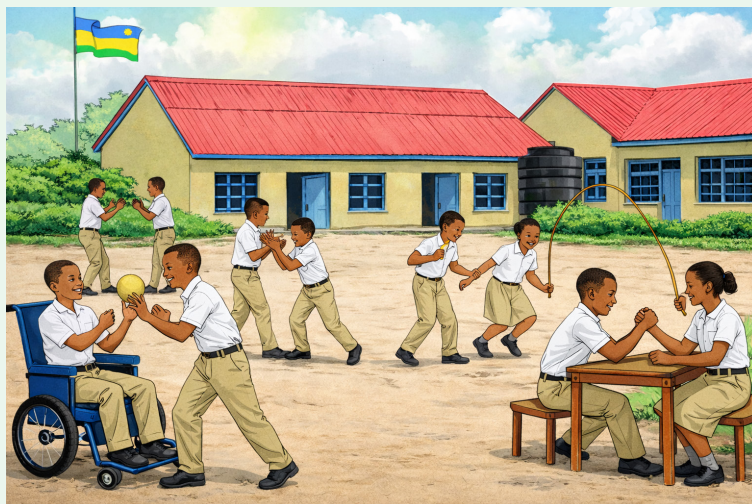

- Actors / Performers:* portray characters in the play. They use voice, facial expression, movement, and gestures
- Playwright:* a playwright writes the script/play
- Director* guides actors on acting, movement, and interpretation during a play performance.
- Costume Designer* prepares costumes for actors

- e) *Props Manager* prepares and manages props used in the play
- f) *Lighting technician* controls lighting to create mood and focus
- g) *Sound Technician* manages sound effects and music
- h) *Audience* watches and responds to the performance

APPLICATION ACTIVITY 4.2

1. In a group of five look at the picture below and then answer the questions that follow:

- a) Who are in the picture?
 - b) What are they doing?
 - c) Discuss the setting in the picture.
 - d) Verbally, create a story from the picture. Tell it to your group members and then to the whole class.
 - e) Compose a play relating to the story, in English, French or Kinyarwanda.
2. Choose roles to assume in a play performance and act out one of the plays you have written.
 3. Why are positive attitudes important when performing a play?

4.8. Staging a play

Learning activity 4.3

You are invited to a drama competition, and you are asked to act out as military officer.

- i. Enumerate some objects you will need so that the acting out can be done properly.
- ii. Now perform before the peers.

Drama is more than just the words on a page; it is meant for performance which demands knowledge and skills in performance techniques.

4.9. Performance Techniques in a Play

- a) *Voice control*: Using clear pronunciation, correct volume, pitch, pace, and tone to express meaning and emotions.
- b) *Facial expression*: Showing feelings such as joy, anger, fear, or sadness through the face to support the dialogue.
- c) *Body movement and gestures*: Using appropriate movements, posture, and hand gestures to make actions believable.
- d) *Eye contact*: Looking at other actors or the audience to show interaction, confidence, and emotion.
- e) *Use of space (Blocking)*: Moving effectively on stage to show relationships, focus, and changes in action.
- f) *Timing and pause*: Knowing when to speak, pause, or react to create suspense, emphasis, or realism.
- g) *Characterization*: Acting according to the character's age, mood, status, and personality.
- h) *Use of props and costumes*: Handling objects and wearing costumes naturally to support the role.
- i) *Interaction with other actors*: Listening and responding appropriately to fellow performers.
- j) *Expression of emotion*: Showing genuine feelings that match the situation in the play.

APPLICATION ACTIVITY 4.3

1. Name the following props and then discuss which type of actor(s) may need some of these props.

2. Now improvise any performance on a topic of your choice. Use some of the props you can find at your school.
3. In groups of five students discuss how you can set a scene of a theatrical performance whose theme is 'poor hygiene, a cause of different diseases.' Then improvise a sketch performance on the given theme.

4. Write a one scene play on topics of your choice and then perform before the audience. Some of you will take responsibilities such as director, costume manager etc.
5. In groups discuss how the performance of the play has been.
6. Which attitudes and values should you adopt to ensure a successful performance?

END OF UNIT ASSESSMENT 4

PART A: KNOWLEDGE AND UNDERSTANDING

1. What is a play structure?
2. What steps will you follow to write a play?
3. In play performance which role do you prefer and why?
4. Identify four types of **props** used in a play and explain the role of each in enhancing a performance.
5. Explain the difference between a **tragedy** and a **comedy** in terms of playwriting.
6. Explain the contribution of actors to the effectiveness of a play and give examples of skills they must demonstrate.
7. Explain how **props, costumes, and lighting** work together to create the desired atmosphere in a scene.

PART B: SKILLS

1. Draw a play structure diagram and explain its components.
2. Improvise a short play performance on a topic of your choice, showing **appropriate emotion, voice projection, and body language**.
3. Write a short dialogue between two characters that shows **conflict and resolution**.
4. Write a short play on a topic of your choice and then perform.

PART C: ATTITUDES & VALUES

1. Explain how actor's attitude and values, such as cooperation, respect, and commitment, can influence the success of a play performance?
2. Identify two attitudes a playwright should adopt when creating a script and explain why they are important.
3. Explain how a director shows **leadership and cooperation** in guiding a play performance.
4. Describe how rehearsing and performing a play can teach you **respect for cultural and social diversity**.

GLOSSARY

I. Music

Accelerando: gradually get faster

Accidentals: Signs that alter musical notes as follows (sharp, flat and natural)—a bar line cancels the accidentals from the previous measure.

Anacrusis: An anacrusis (also known as pickup or upbeat) is an incomplete measure of music before a section of music. It also refers to the initial note(s) of a melody occurring in that incomplete measure.

Articulation: Articulation refers to notation which indicates how a note or notes should be played. Slurs, accents, staccato, and legato are all examples of articulation.

Bar line: A vertical line that separates measures.

Beam: Line connecting a series of notes (shorter than a quarter note). The number of beams determines the note value of the connected notes.

Chord: Two or more tones/notes sounding simultaneously.

Chromatic scale: a scale entirely composed of half steps.

Chromatic: movement by half steps

Clef: a sign placed at the beginning of a staff to indicate the position of some particular pitch.

Compose: The activity of creating a musical work

Composer: a person who writes musical works

Compound time signature: A meter that includes a triplet subdivision within the beat, such as $\frac{9}{8}$, $\frac{6}{8}$, $\frac{12}{8}$.

Conductor: a person who leads a musical group

Crescendo: increasing volume

Da capo: Abbreviated D.C. Indicates that the piece is to be repeated from the beginning to the end or to a certain place marked fine.

Dal Segno: Abbreviated D.S. Repetition, not from the beginning, but from another place frequently near the beginning marked by a sign (segno).

Decrescendo: decreasing volume

Diatonic scale: A scale consisting of 5 whole tones and 2 semitones (S). Scales played on the white keys of a piano keyboard are diatonic.

Diatonic: the tones of the major or minor scale; opposite of chromatic. (Half steps and whole steps)

Diminuendo: It indicates a decrease volume.

Dominant: The fifth scale degree

Double bar line: Indicates the end of a section within a movement.

Duple: groups of two beats

Dynamics: the volume of sound, the loudness or softness of a musical passage

Fermata: Prolonged note or rest of indefinite duration.

Fine: the end

Flag: Ornament at the end of the stem of a note used for notes with values less than a quarter note. The number of flags determines the note value.

G clef (treble clef): A clef symbol that indicates G above middle C.

Harmonic cadence: A sequence of chords that terminates a musical phrase or section.

Harmony: the sounding together of two or more tones

Interval: the relationships (distance) between two pitches

Key signature: The sharps or flats appearing at the beginning of each staff indicating the key of the music.

Key: According to the 12 tones of the chromatic scale there are 12 keys, one on c, one on c-sharp, etc.

Lyrics: the words that are sung in a song

Major: Major keys are based on major scales and usually have happy sound.

Median: The third scale degree.

Metronome: Device used to indicate the exact tempo of a piece.

Minor: Minor keys are based on minor scales and usually sound more sombre than major scales.

Note value: note duration

Quadruple: groups of four beats

Relative key: Major and minor keys that have the same key signature.

Ritardando: Gradual slowing down, more pronounced than

Scale: a fixed succession of ascending and descending tones. There are three basic types of scales: major, minor, and chromatic.

Scale degree: Names and symbols used in harmonic analysis to denote tones of the scale as roots of chords. The most important are degrees I = tonic (T), IV = subdominant (S) and V = dominant (D).

Secular: non-religious music

Solfege syllables (sol-fa syllables) =the designation of pitches by means of conventional syllables rather than letter names

Solo: one person plays or sings

Staff: A staff (plural: staves) is a series of (normally five) horizontal lines upon and between which the musical notes are written.

Subdominant: The fourth scale degree.

Submediant: The sixth scale degree.

Syncopation: placing an accent to the weak part of the beat, or a displacement of either the beat or the normal accent of a piece of music

Time signature: The sign placed at the beginning of a composition to indicate its meter. It most often takes the form of a fraction,

Transposition: the rewriting or performance of music at a pitch other than the original one

Triple: groups of three beats

Tuning fork: A two-pronged piece of steel used to indicate an absolute pitch, usually for A above middle C, or for middle C.

Whole tone: The interval of a major second. The interval between two tones on the piano keyboard with exactly one key between them

Woodwind: A family of blown wooden musical instruments.

II. Drama

Act: a major division in the action of a play, comprising one or more scenes.

Acting: use of face, body, and voice to portray a character.

Actor: male performer

Actress: female performer

Acts: the major sections of a play.

Antagonists: An antagonist is a character or force in conflict with the main character. This is the person or thing that is working against the main character.

Aside: a short speech or remark spoken by a character in a drama, directed either to the audience or to another character, which by convention is supposed to be inaudible to the other characters on stage.

Cast: all performers selected to portray characters (Actors and actresses in play)

Characterization: the representation of persons in narratives or dramatic works.

Climax: any moment of great intensity in a literary work, especially in drama.

Comedy is a play that ends happily.

Comedy: a play written chiefly to amuse its audience

Dialogue: conversations between actors on the stage

Director: instructs actors on how to portray characters.

Drama: the general term for performances in which actors impersonate the actions and speech of fictional or historical characters (or non-human entities) for the entertainment of an audience, either on a stage or by means of a broadcast.

Dynamic characters: Changes as a result of the story's events.

Exposition: the opening part of a play.

Improvisation: to make up or perform without preparation.

Major characters: The main characters are usually, if not always, the primary focus of the story of the play.

Mimicry: to copy or imitate something very closely.

Minor characters: these are supporting characters.

Monologue: a long speech given by single actors to others.

Nonverbal Expression: facial expression, move

Pantomime: to communicate without speaking using only facial and body gestures.

Playwright: person who writes plays.

Protagonist: A protagonist is the main character of the story that changes. S/she changes and grows because of experiences in the story of the play.

Scene: subdivision of an act usually indicating a time lapse or location change or both.

Script: The written text of a play.

Soliloquy: speech by a character alone onstage to himself or herself or to the audience.

Speaking: verbal expression, voice projection, speaking style, diction.

Stage directions: Stage directions are written in italics. They provide useful information for actors, directors and the also for people who are reading a script.

Static characters: Do not change.

Theatre: A building where a play is performed containing the stage and seating area for the audience.

Tragedy is a play that ends unhappily.

Tragicomedy— dramatic work incorporating both tragic and comic elements.
