FOREWORD

The Rwanda Basic Education Board (REB) is honoured to present the second edition of the Upper Secondary School Entrepreneurship syllabus (S4–S6). It serves as an official guide for competence-based teaching and learning, ensuring consistency in delivering quality education across the country. Developed collaboratively by subject specialists, educators, and curriculum developers, it supports the implementation of the Competence-Based Curriculum (CBC) and reflects Rwanda's commitment to nurturing learners' knowledge, skills, values, and attitudes.

Quality education is the foundation of Rwanda's sustainable development and prosperity. Aligned with the national education philosophy, this syllabus promotes critical thinking, creativity, inclusiveness, and holistic learner development. It aims to empower young people with competences necessary to achieve full potential, equipping them with relevant knowledge, skills, the right attitudes and values to integrate effectively into society and pursue opportunities in a competitive world.

Anchored in Rwanda Vision 2050 and the National Strategy for Transformation (NST2), this syllabus supports the nation's goal of building a knowledge-based economy driven by innovation, resilience, and global competitiveness. It prioritizes learner-centred pedagogy, active learning, and the practical application of knowledge to prepare students not only for academic success but also to become responsible, ethical, and productive citizens capable of contributing to Rwanda's continued transformation.

This syllabus reflects our determination to equip learners with 21st century skills, foster innovation, and instill values of integrity, social responsibility, and lifelong learning. Its success depends largely on the dedication and professionalism of teachers and school leaders. We therefore call upon all educators to embrace the approaches, methodologies, and assessment strategies outlined herein with commitment and passion, transforming classrooms into dynamic spaces of curiosity, creativity, and inspiration.

On behalf of REB, I extend my heartfelt appreciation to all who contributed to the development of this syllabus. Your expertise and dedication have been instrumental in shaping a curriculum that responds to the needs of our learners and supports Rwanda's national aspirations. Together, we can ensure that education continues to be a powerful driver of our nation's development and prosperity.

Dr. MBARUSHIMANA Nelson
Director General, REB

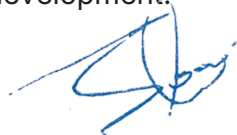

ACKNOWLEDGEMENT

The development of this syllabus has been a collective effort that reflects the dedication, expertise, and commitment of many stakeholders. On behalf of the Curriculum, Teaching and Learning Resources Department of the Rwanda Basic Education Board (REB), I wish to express my deepest appreciation to all who contributed to the successful preparation of this Lower Secondary school Entrepreneurship syllabus (S4–S6).

Special thanks go to the subject experts, curriculum developers, teachers, and education partners whose insights, feedback, and professional contributions have been invaluable in shaping this syllabus. Your collaboration has ensured that the syllabus is not only aligned with Rwanda's Competence-Based Curriculum but also responsive to the aspirations of Vision 2050 and the National Strategy for Transformation (NST2).

We also acknowledge the invaluable support of development partners and education stakeholders who have consistently provided technical assistance in curriculum adaptation. Your partnership has greatly contributed to strengthening the quality of Rwanda's education system.

Finally, we call upon teachers, school leaders, and all education practitioners to use this syllabus with commitment and professionalism, ensuring that classrooms become vibrant learning environments that nurture knowledge, skills, values, and positive attitudes among learners. Through your dedication, this syllabus will fulfil its purpose of empowering learners to realize their full potential and contribute meaningfully to Rwanda's sustainable development.

Joan MURUNGI

Head of Curriculum,
Teaching and Learning
Resources Department/REB

1. GENERAL INTRODUCTION

1.1 Background to A'Level Entrepreneurship syllabus adaptation

The National Strategy for Transformation (NST1) states that for Rwanda to become a Knowledge-Based Economy, one of the key targets is to avail a competent and skilled workforce that is not only capable of making an impact on their various organizations, but also ensure an efficient and effective utilization of citizens' resources, thereby contributing to economic development and poverty reduction.

The Education Sector Strategic Plan (2018/19–2023/24) accommodates new thinking and policy directions that will support Rwanda's aspirations for transformation from a predominantly agrarian-based, and low-income economy to an industrial upper middle-income nation by 2035. This vision is premised on the ability of Rwanda's education system to produce enough and appropriately skilled workforce capable of realizing this aspiration, as well as upgrading the skills and competencies of the existing workforce.

From this perspective, the Ministerial Order N° 002/MINEDUC/2021 of 20/10/2021 establishing the curriculum in general, professional, technical and vocational basic education decided that the number of teaching periods of A' Level entrepreneurship be reduced from 6 periods to 3 periods a week.

For implementation of the above mentioned Ministerial order, the Entrepreneurship was adapted to suit the three periods allocated weekly and also to put in consideration of the current expectations of the knowledge based economy. The motive of developing Entrepreneurship is to ensure that the syllabus is responsive to the needs of the student and to shift from objective and knowledge-based learning to competence-based learning. Emphasis in the adaptation of this syllabus is put more on skills, competences and the coherence through project based learning and skills lab teaching and learning approaches.

The entrepreneurship syllabus guides the interaction between the teacher and the students in the learning processes and highlights the competences a student should acquire during and at the end of each unit of learning.

Students will have the opportunity of integrating entrepreneurial competencies in their day to day operations through project activities and at their workplace. It further creates a positive attitude in students towards self-employment that enables them to address the challenges faced by the community.

Using this syllabus, students will have progressively more challenging educational activities, experiences that will enable them to develop the insight needed to discover and create entrepreneurial opportunities, and the expertise to successfully start and manage their own businesses to take advantage of these opportunities. Therefore, entrepreneurship education helps students to apply business knowledge, skills and attitudes to solve environmental, economic and social problems in their everyday lives.

2. TEACHING AND LEARNING ENTREPRENEURSHIP

2.1. Rationale of teaching and learning Entrepreneurship

2.1.1. Entrepreneurship and society

Entrepreneurship education is a vital part of the process to build a prosperous society, a driving force behind employment, economic growth and competitiveness. This subject helps S.6 graduates to apply all they learnt from their respective combinations to contribute positively to their communities. Business representatives can support entrepreneurial teaching and learning in many ways as resourceful persons (as experts, supporters and as mentors). An entrepreneur can contribute to the wellbeing of the society in several ways, such as provision of goods and services, creating new markets, new technologies, new institutional forms, new jobs and net increases in productivity that improves the living conditions of people. With entrepreneurship education, Rwanda will transform from a subsistence agricultural economy into a knowledge-based society, with a vibrant class of entrepreneurs.

2.1.2. Entrepreneurship and students

The subject is meant to build the mindset of students towards self-reliance by encouraging them to focus more on self-employment. It is also to raise awareness amongst young people and the broader community for the need and creation of young entrepreneurs in the society. The attitude of young people affects their productivity; many Rwandan youths lack a culture of entrepreneurship while some youth perceive certain types of jobs as jobs for second zone citizens. This further translates into a negative attitude towards learning skills related to those perceived as blue-collar jobs.

Entrepreneurship education will help to ensure that the key transferable soft skills including collaboration, problem solving, decision making, creativity, communication and team-work skills that employers need are being provided to all secondary graduates. It will also help to reduce skills gaps and shortages, improving productivity and business performance. Students will have the opportunity of integrating entrepreneurial competencies in their day to day operations through project activities and at their workplace. It further creates a positive attitude in students towards self-employment that enables them to address the challenges faced by the community.

2.2. Competences

Competence is defined as the ability to perform a particular task successfully, resulting from having gained an appropriate combination of knowledge, skills, attitudes, and values.

Entrepreneurship syllabus gives the opportunity to students to develop different competences, including basic and generic competences.

Basic competences are addressed in the stated broad subject competences, in key competences highlighted year on year basis and in each learning unit. The generic competences that must be emphasized and reflected in the learning process, are briefly described below and teachers will ensure that students are exposed to tasks that help them acquire the skills.

2.2.1. Generic Competences

Critical thinking and problem solving skills: The acquisition of such skills will help students to think imaginatively, innovatively and broadly to evaluate and find solutions to problems encountered in their surroundings.

Creativity and innovation: The acquisition of such skills will help students to take the initiative and use their creative thoughts to generate new business ideas and provide possible solutions to the problems faced by communities.

Research: This will help students to find answers to questions based on existing information and concepts and use it to explain phenomena from gathered information.

Communication skills: Students effectively express their ideas through explanations, construction of arguments, class presentations, business pitching, etc. using official languages.

Irrespective of being language teachers, teachers will ensure the proper use of the language of instruction by students. The teachers should communicate clearly and confidently and convey ideas effectively through speaking and writing by applying appropriate language and relevant vocabulary.

Cooperation, interpersonal management and life skills: This will help the students to cooperate as a team in whatever task assigned and to practice ethical values and while respecting rights, feelings and views of others. Students perform practical activities related to environmental conservation and protection. They advocate for personal, family and community health, hygiene and nutrition; and respond creatively to a variety of challenges encountered in life.

Lifelong learning skills: The acquisition of such skills will help students to update knowledge and skills with minimum external support. The students will be able to cope with evolution of knowledge advances for personal fulfillment in areas that are relevant to their improvement and development.

2.2.2 Broad entrepreneurship competences

The overall goal of entrepreneurship education is to give students the attitudes, knowledge and skills to act in an entrepreneurial way. During and at the end of the upper secondary level, should be able to:

- Demonstrate creativity and innovation in developing viable business ideas.
- Plan and operate a structured, compliant business
- Analyze markets and strategize for growth
- Manage business finances and records effectively
- Communicate and engage in the business environment

2.2.3. Entrepreneurship and Developing Competences

The national policy documents based on national aspirations identify some 'basic competences' alongside the 'generic competences' that will develop higher order thinking skills and help students learn subject content and promote application of acquired knowledge, skills, attitude and values.

The basic competences alongside the generic competences are stated in such a way that will develop higher order thinking skills and which will help subject learning and application of what has been learnt in real life situations.

Through learning sessions such as group work discussions, presentations, debates, research work, project activities, field visits, role plays and business simulation games, students develop abilities and skills that are transferable to new situations such as critical thinking, research and problem solving, creativity and innovation, and communication. With the above learning activities students don't only develop competences but also values such as appreciating diversity, determination, involvement, tolerance, accountability, responsibility, respect, loyalty, patience, dignity among others.

2.3. Pedagogical approach

In order for secondary school students to develop transferable 21st century skills and entrepreneurial skills, a competence based entrepreneurship syllabus builds on active and participatory teaching methods. The change to a competence based curriculum is about transforming learning, and ensuring that learning is deep, enjoyable and habit-forming. Its main characteristics are the practical project based approach, the promotion of practical experience through workshops, cooperation with different organizations, business representatives that support entrepreneurial teaching and learning in various ways as resourceful persons, and the hands-on approach of setting up and running student projects. At the same time, each student is an individual with his/her own needs, pace of learning, experiences and abilities. Teaching strategies must therefore be varied but flexible within well-structured sequences of lessons.

The extent to which a teaching method is to be used largely depends on the topic being handled, the learning abilities of the student, and the resources available for use in the learning/teaching process. The activities employed are student centered, where the student is the main actor and the teacher is expected to apply a series of interactive learning approaches. Therefore, the implementation of the entrepreneurship adapted syllabus requires to use student centered methods of teaching.

Skills Lab Approach:

Skills lab is an easy method to change a teacher's pedagogy from theory-based to competence-based instruction. Skills lab ensures teachers are accountable to completing all the learning activities and projects as outlined in the syllabus.

Skills lab is a regular time when students are required to complete learning activities working in manageable groups.

For skills lab approach to be effective the following should be taken into consideration:

- It is taught in an efficient time.
- Students work in manageable groups.
- Assessment takes place through portfolio activities.
- Students talk more than teachers (10% teacher talk time and the rest is for the students)
- Students receive constructive feedback on their work (Teacher gives quality feedback on student presentations.)
- Skills lab consists of three components: build, practice and present.
- Link to student business club as a platform for practicing real life activities through making of products.

Students' business clubs:

A student business club: is a platform provided for students to learn by doing through the application of what they learn from various subjects by developing projects/businesses. It is open to all students and its activities are conducted during co-curricular time (At school and back home). During the business club, students gain practical experience to do business and improve their entrepreneurial competences acquired.

The club's leadership is open to all members and comprises the president, vice-president, secretary, treasurer and the mobiliser. Students should engage in business clubs to guarantee that they are able to start and manage small businesses and are encouraged to employ their creativity and innovation during the creation of the club's products, marketing and sales.

2.3.1. Role of the student

The teacher shall act as a partner, a facilitator and a promoter of learning who organizes classroom interactions. Learning therefore shall be rooted in the concept of constructivism where students get an opportunity to interact with their peers and the environment at large through well-organized activities such as individual reflections, peer

discussions and execution of tasks. Students use textbooks, the internet and other resource materials to search and understand their findings which will improve their knowledge, skills, attitude and values.

A competence-based curriculum cannot be successful without the student's full involvement in the learning process. They should be ready and willing to work with their teachers in the delivery of the syllabus. The role of the student therefore, in the effective delivery of the syllabus should include:

- Creating a project that will enable him/her to earn income/ solve community problems and therefore, provide employment to others participating in the business club to enhance the application of learnt skills from classroom lessons.
- Regular attendance in the classroom.
- Active participation in group work or activities.
- Doing/working on activities, assessments, and any other activity provided.
- Seeking assistance and feedback from fellow students and teachers.
- Imitating/applying learnt material in their school or daily life
- Respecting school rules and regulations.
- Searching for more information through continuous research using various sources like books or the internet.
- Participating in various entrepreneurship competitions.

2.3.2. Role of the teacher

In the competence-based curriculum, the teacher is a facilitator, organizer, advisor, a conflict solver, etc. He/she has to ensure that cross-cutting issues are addressed appropriately in the teaching and learning process. The specific duties of the teacher in a competence-based approach are the following:

- He/she is a facilitator, his/her role is to provide an appropriate learning environment for students to find solutions and discuss problems challenging them. This requires an elaborated/prepared plan of activities and related learning materials.

- He/she is an organizer: his/her role is to organize the students in the classroom or outside and engage them through participatory and interactive methods during the learning processes as individuals, in pairs or in groups. To ensure that the learning is personalized, active, participative and co-operative, the teacher must identify the needs of the students, the nature of the learning to be done, and the means to shape learning experiences accordingly.
- He/she is an advisor: The teacher provides counseling and guidance for students in need. He/she comforts and encourages students by valuing their contributions in the class activities. Since every student is expected to have a viable business idea from Senior Four, for which he/she will develop its business plan and implement, teachers are encouraged to provide continuous coaching throughout the entire cycle.
- He/she is a conflict-solver: most of the competence-based activities are performed in groups. The members of a group may have problems such as attribution of tasks.
- They should find the intervention of the teacher useful and constructive as a unifying element. He/she is ethical, impartial, role-model, and caring for individual needs of students. Slow students and students with physical impairments are provided with special assistance through remedial activities or re-enforcement activities. One should notice that this list is not exhaustive.

2.3.3. Special needs education and inclusive approach

All Rwandans have the right to access education regardless of their different needs. The underpinnings of this provision would naturally hold that all citizens benefit from the same menu of educational programs. The possibility of this assumption is the focus on special needs education. The critical issue is that we have students who are totally different in their ways of living and learning. The difference can either be emotional, physical, sensory and intellectual learning challenges traditionally known as mental retardation.

These students equally have the right to benefit from the free and compulsory basic education in the nearby ordinary/mainstream schools. Therefore, the schools' role is to enroll them and set strategies to provide relevant education to them. The teacher therefore is requested to consider each student's needs during the teaching and learning process. Assessment strategies and conditions should also be standardized to the needs of these

students. Detailed guidance for each category of students with special educational needs is provided for the guidance of teachers.

2.4. Assessment approach

Assessment is the process of evaluating the teaching and learning processes through collecting and interpreting evidence of individual student's progress in learning and to make a judgment about a student's achievements measured against defined standards. Assessment is an integral part of the teaching learning processes.

2.4.1 Types of assessment

a) Formative Assessment

Formative assessment helps to check the efficiency of the process of learning. It is done within the teaching/ learning process. It is a continuous assessment which involves formal and informal methods used by schools to check whether learning is taking place.

b) Summative assessment

When assessment is used to record a judgment of a competence or performance of the student, it serves a summative purpose. Summative assessment gives a picture of a student's competence or progress at any specific moment. The main purpose of summative assessment is to evaluate whether learning objectives have been achieved and to use the results for the ranking or grading of students, for deciding on progression, for selection into the next level of education and for certification. This assessment should have an integrative aspect whereby a student must be able to show mastery of all competences.

2.4.2 Levels of assessment in CBC

Assessment will be organized at the following levels: Comprehensive assessment (School based assessment, District based assessment, and National based assessment) and National examinations.

Weighting of items

Types of assessment	Category of assessment	Weight
Comprehensive assessment	School based assessment	10%
	District based assessment	
	National based assessment	
National examination	Practical assessment	30%
	Theoretical assessment	60%

a) School Based Assessment:

School based assessment consists of daily lesson assessment, end of unit assessment and end of term assessment.

➤ Daily lesson assessment

This usually occurs every time the teacher is conducting teaching and learning activities.

➤ End of Unit Assessment

The Competence-Based Curriculum (CBC) provides Key Unit Competences to be achieved by students in each unit of study. As teachers use daily formative assessment to monitor and respond to students' progress to gain the knowledge, skills, attitudes and values expected, these daily assessment activities should be complimented by end-of-unit assessments to measure the level of achievement of the key unit competences.

End of Unit Assessment is compulsory and a unit is considered to be complete only after the end of unit assessment has been conducted and marks have been recorded.

➤ End of term assessment

After conducting a series of assessments during teaching and learning, at the end of different units, students are obliged to sit for the end of term examination.

This assessment may include project structured questions, theoretical questions among others as the teacher may decide. End of term assessment comprises all units covered in term. It will assess if students have mastered knowledge and skills covered during the term

Project-Based Assessments are practical learning activities that the teacher assigns students to undertake after teaching a given lesson or unit(s) to practically demonstrate the mastery of one or several competences.

The role of a teacher during school based assessment:

- i. Provides a set of exercises/questions/activities that assess individual student and collective learning achievement before winding up each lesson to ascertain the level at which particular lesson objectives have been attained and thus sets the pace for forthcoming periods/lessons.
- ii. Consider one or more units and administer a project based assessment to individually or in groups. The teacher shall give an opportunity to reflect on their experiences related to the project undertaken.
- iii. Gives students random tests within lessons and units and records them at own discretion.
- iv. Gives a qualitative appreciation for active participation in class and investigates the low participation of any student.
- v. Makes assessments inclusive to cater for the learning needs of all categories of students.
- vi. Uses comprehensive assessment to identify gifted students and those with learning difficulties and devise strategies to support them

b) District based assessment

The end of second term formative assessment is set at the district level by established assessment teams with proven integrity selected by the district. It is conducted and supervised under the guidance of the district. It aims at checking whether the planned content for both the first and second terms was effectively understood and revising topics that were not understood by low performing students.

c) National based assessment: This is a form of summative assessment prepared by proven assessment specialists under the department of National Examination and School Inspection Authority (NESA). National based assessment is categorized into two:

- i. End of year assessment (S4 and S5):** This is prepared by NESA but marked at the school level under the guidelines of NESA.
- ii. End of cycle assessment (S6):** This is a form of summative assessment prepared by proven assessment specialists under the department of National Examination and School Inspection Authority (NESA). This assessment is marked by selected teachers from different parts of the country, graded and ranked according to different national performance levels.

2.4.3 Structure of National examination

There will be one examination paper of entrepreneurship which will consist of sections A and B.

Section A

All questions in Section “A” will be compulsory and will require clear and brief answers. The questions will be set to give candidates the opportunity to read extensively and express informed, critical, innovative, creative and relevant responses to issues relating to the overall ` level of knowledge, understanding and comprehension of syllabus topics and objectives. It should test ability to explain briefly, define, state, identify, name, outline, classify, give examples, etc. using inferences from knowledge learned.

Section B

This section will be general in nature and require candidates to draw on their knowledge from across the syllabus while demonstrating ability to explain, discuss, examine, analyze, synthesize, evaluate, describe design, invent, produce, devise, develop, propose, generate, reconstruct, plan, and apply significant issues related to entrepreneurial activities. The ability to convey a sustained and well thought-out argument will be credited.

2.4.4 Record keeping

This is gathering facts and evidence from assessment instruments and using them to judge the student's performance by assigning an indicator against the set criteria or standard. Whatever assessment procedures used shall generate data in the form of scores which will be carefully recorded and stored in a portfolio because they will contribute to remedial actions, for alternative instructional strategy and feed-back to the student and to the parents to check the learning progress and to advice accordingly or to the final assessment of the students.

This portfolio is a folder (or binder or even a digital collection) containing the student's work as well as the student's evaluation of the strengths and areas of improvement. Portfolios reflect not only work produced (such as papers and assignments), but also it is a record of the activities undertaken over time as part of student learning. Besides, it will serve as a verification tool for each student that he/she attended the whole learning before he/she undergoes the summative assessment for the subject.

2.4.5. Item writing in summative assessment

Before developing a question paper, a plan or specification of what is to be tested or examined must be developed to show the units or topics to be tested on, the number of questions in each level of Bloom's taxonomy and the marks allocation for each question. In a competence based curriculum, questions from higher levels of Bloom's taxonomy should be given more weight than those from knowledge and comprehension level.

Before developing a question paper, the item writer must ensure that the test or examination questions are tailored towards competence based assessment by doing the following:

- Identify topic areas to be tested on from the subject syllabus.
- Outline subject-matter content to be considered as the basis for the test.
- Identify learning outcomes to be measured by the test.
- Prepare a table of specifications.
- Ensure that the verbs used in the formulation of questions do not require memorization or recall answers only but testing broad competencies as stated in the syllabus.

2.5. Reporting to Parents

The wider range of learning in the Competence- based curriculum means that it is necessary to think again about how to share students' progress with parents. A single mark is not sufficient to convey the different expectations of learning highlighted in learning objectives. The most helpful reporting is to share what students are doing well and where they need to improve.

In addition to the school report, the student's portfolio containing students' results, behavior, and the report from a team of all concerned teachers about the progress of students will be shared to parents for them to provide feedback to the school administration.

2.6. Resources

2.6.1. Materials needed for implementation of this syllabus

The materials that the teacher will need to aid the learning process include but are not limited to the following:
-Reference books like entrepreneurship and economics textbooks, students' and teachers' guides, entrepreneurship and economic journals, magazines among others.

- Computer and internet connection.
- Projectors.

- Audio visual study and video materials.
- Successful business resourceful people.
- Individual and group business projects.

2.6.2. Human Resource

The effective implementation of this syllabus needs a joint collaboration of educators at all levels. Given the material requirements, teachers are expected to accomplish their noble role as stated above. On the other hand, school head teachers and directors of studies are required to make a follow-up and assess the teaching and learning of this subject due to their profiles in the schools. These combined efforts will ensure bright future careers and lives for students as well as the contemporary development of the country. A competent teacher of A-Level entrepreneurship must have at least the following minimum qualifications: A Bachelor's degree in education with entrepreneurship, business studies, business administration, economics, or other closely related fields.

In addition, the teacher of Entrepreneurship subject should have the following skills, values and qualities:

- Engage students in a variety of learning activities
- Use multiple teaching and assessment methods, techniques and approaches.
- Adjust instructions to the level of the students
- Have creativity and innovation in the teaching and learning process.
- Good communicator and organizer.
- A guide/ facilitator and a counsellor.
- Manifest passion and impartial love for students in the teaching and learning process.
- Engage students in a way that facilitates them to develop a productive entrepreneurial mindset leading to creating viable businesses.
- Have a good mastery of the Entrepreneurship and Economics Content.
- Have good classroom management skills.

3. SYLLABUS UNITS

3.1. The structure of the Syllabus Units

Entrepreneurship syllabus is developed to be taught and learnt in advanced level of secondary education i.e. in S4, S5 and S6 respectively. At every grade, the syllabus is structured in Topic Areas, sub-topic areas and then further broken down into Units to promote the uniformity, effectiveness and efficiency of teaching and learning Entrepreneurship. The units have the following elements:

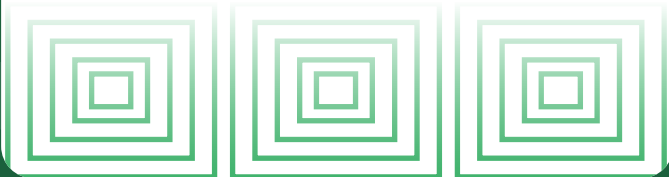

1. The unit is aligned with the Number of Periods.
2. Each Unit has a Key Unit Competence whose achievement is pursued by all teaching and learning activities undertaken by both the teacher and the students.
3. Each Key Competence of the unit is broken into three types of learning objectives as follows:
 - a) Type I: Learning objectives relating to knowledge and understanding (Type I Learning objectives are also known as Lower Order Thinking Skills or LOTS)
 - b) Type II and Type III: These are learning objectives related to acquisition of skills, attitudes and values (Type II and Type III Learning objectives are also known as Higher Order Thinking Skills or HOTS) – These Learning Objectives are actually considered to be the ones targeted by the Competence Based Curriculum.
4. Each unit has a content which indicates the scope of coverage of what to be taught and learnt in line with stated learning objectives
5. Each unit suggests a non-exhaustive list of learning activities that are expected to engage, as much as possible, students in an interactive learning process (student-centered and participatory approaches).
6. Finally, each unit is linked to other subjects, its assessment criteria, and the materials (or Resources) that are expected to be used in the teaching and learning process.

The Entrepreneurship syllabus for general education has 5 topic areas namely Entrepreneurial Culture, Business growth and sustainable development, work environment, Business legal aspects, Business operations management.

The table below portrays an overview of class by class number of topics areas, sub-topic areas and units.

	S4	S5	S6
Topic Areas	3	4	4
Sub-topic areas	7	8	6
Units	9	10	8

SENIOR FOUR

3.2. Senior Four

Key Competences at the end of Senior Four Entrepreneurship

After completion of senior 4, the Entrepreneurship syllabus will help the student to:

- Exhibit innovative behaviours of an entrepreneur
- Create an organisational structure for a business enterprise
- Make rational investment decisions

Topic Area: Entrepreneurial Culture			Sub Topic Area: Business start-up and development	
S.4 Entrepreneurship	Unit 1: Introduction to Entrepreneurship		No of periods: 8	
Key Unit competence: To be able to provide creative solutions to identified challenges in the community				
Learning Objectives			Content	Teaching / Learning Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of Entrepreneurship	Articulate appropriately the meaning of entrepreneurship	Appreciate the role of creativity in Entrepreneurship	Meaning of: – Entrepreneurship – Entrepreneur – Intrapreneur Stages of entrepreneurship process. – Discovery, – Concept development, – Resourcing, – Actualization,	In manageable teams, learners are asked to share experiences about their clubs and communities. Connect the answers to the concepts of entrepreneurship and introduce a business club in the school. Use case studies of successful entrepreneurs, analyse the journey they have gone through, and write down their findings for class presentation.
Describe the various stages of the entrepreneurship process.	Examine the various stages of the entrepreneurship process.	Embrace stages of the entrepreneurship process		

Recall the difference existing between Creativity, innovation, and invention Describe factors that make an entrepreneur creative. Outline creative solution to different community problems	Analyse the relationship between creativity, innovation, and invention. Assess the factors that influence an entrepreneur to be creative	Recognize the role of Creativity, innovation, and invention in entrepreneurship. Appreciate the factors that make an entrepreneur creative and innovative.	Creativity, innovation, and invention – Definitions – Relationship and examples	Project Activity1: In teams, students interview entrepreneurs from a nearby school surrounding or within the school, study their business operations, and design a plan that can creatively and innovatively assist the business owners to better their business ventures. Students should document their findings. Skills lab: In manageable groups, students search on the relationship existing between Creativity, Innovation, and invention using specific examples from their community and show how they can use the findings to improve their student-run business club activities.
--	--	--	--	--

	Design creative solutions to different community problems	Exhibit creative solution to different problems	Entrepreneur as creative person Factors that influence an entrepreneur to be creative (social, political, environmental, economic...)	Project Activity 2: Students individually create a Community Resource Map of their school or local area by observing and marking key features such as roads, schools, markets, fields, and water sources. They will then identify community needs, link them with available resources and their personal interests to generate creative project ideas, and present their findings as a neat prototype of their Community Resource Map.
Links to other subjects: Economics and general studies, English and Professional Ethics for Accounting,				
Assessment criteria: Apply creative ways of solving community problems				
Resources/Materials: Entrepreneurship textbooks, Paper, Flipcharts, computers, Projects, Markers, Etc.				

Topic Area: Entrepreneurial Culture			Sub Topic Area: Business start-up and development	
S.4 Entrepreneurship	Unit 2: Business ideas and opportunities		No of periods: 11	
Key Unit competence: To be able to generate entrepreneurial ideas that respond to existing market gaps				
Learning Objectives			Content	Learning Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of a “business, business idea, and business opportunity”.	Use different resources to search for business ideas.	Recognize that a business idea alone is not sufficient to start a business	Meaning of: – A business – A business idea – A business opportunity	Group Activity/Think pair Activity: Have a pair of students share the following; – The businesses they like and why. – Business ideas that can work in the school community and why?
State the characteristics of viable business ideas	Analyse characteristics or qualities of viable business ideas	Appreciate the qualities of viable business ideas.	Characteristics of viable business ideas: – Business ideas are simple – They solve real problems – Brilliant ideas have a market	– Groups share and relate the presentations with the concepts of business, business ideas and opportunities. Skills Lab: -Each team is assigned a source of business ideas (available resources, people’s needs, types of

Outline the various sources of good business ideas and opportunities	Differentiate sources of business ideas and business opportunities	Appreciate one's environment as a source of business ideas and opportunities	– Availability of business opportunity – Availability of needed resources – Specific to market niche – Scalability and flexible – Health profit margin, etc. Sources of viable business ideas; – Based on Resources – Based on people's needs – Based on types of customers – Based on idle resources – Based on existing business	customers, idle resources, existing business) to create a list of possible business ideas according to their assigned source. Teams share business ideas with the rest of the class. Teams investigate/interview local residents about what they would like the business community to provide in order to cater for their needs and wants. Teams match business ideas to meet identified needs Based on the above search, students create a list of business ideas that they are interested in.
--	--	--	--	---

Explain the factors influencing the choice of a business opportunity	Scan the local environment to come up with viable business ideas.		Factors influencing the choice of a business opportunity – Inheritance, – Profitability, – Resources etc.	Through brainstorming, students rank their list of business ideas and opportunities based on what they have discovered about potential local demand conditions, as well as considering other factors such as the number of resources available, the students' personal capacities, passion, etc.
Explain the SWOT analysis as a way of evaluating business ideas or opportunities	Examine the factors influencing the choice of a business opportunity Use the SWOT analysis to evaluate business ideas/opportunities	Recognize the factors influencing the choice of a business opportunity. Advocate for the use of SWOT analysis in evaluating the viability of business ideas	Factors for evaluating business ideas; – Legality of business – Entry barriers – Potential customers, – Using SWOT Analysis	Project activity: Students scan the environment around their school community or their homes to identify opportunities, make a list of potential business ideas then make a-SWOT analysis of their identified business. Students choose the most viable business ideas that can be even implemented in their Business Club, create a sample label or a package for their proposed product using

				simple materials like bottles, paper bags, or boxes with hand-drawn or printed designs
Links to other subjects: Entrepreneurship in Ordinary level, Economics, History, and Geography				
Assessment criteria: Ability to critically generate entrepreneurial ideas and choose the most promising one using SWOT analysis.				
Resources/Materials: Entrepreneurship textbooks, Paper, Flipcharts, Computer, Projects, Markers, Maslow's hierarchy of human needs, Etc.				

Topic Area: Entrepreneurial Culture			Sub Topic Area: Career opportunities	
S.4 Entrepreneurship	Unit 3: Entrepreneurship as career		No of periods: 12	
Key Unit competence: To be able to make rational entrepreneurial choices				
Learning Objectives			Content	Learning Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of a career, career choice and how Entrepreneurship can be a career.	Examine careers based on your own characteristics.	Embrace entrepreneurship as a career	Career Concepts: meaning of: – Career – Career choice – Entrepreneurship as a career	In pairs, learners list different types of work that are done in their community or other communities – Teams discuss what it takes for one to pursue those works – Based on the above learner discussions, teams assess the relationship existing between career and Entrepreneurship.
Identify work of interest with reasons for their choices.	Recognize various career fields of entrepreneurship Develop plans for future careers	Choose careers based on self-assessment.	Choosing career fields of entrepreneurship: – Education – Health – Security forces – Law – Media	In manageable groups, Teams list and discuss the types of work available in their communities and distinguish the types of skills and talents needed for a range of different types of work. Every learner

Explain the benefits and challenges of being employed vs self-employment.	Distinguish with examples the types of work or careers that are involved in being employed and self-employed.	Make sound judgement on employment options	– Hotel and tourism – Commercial and manufacturing – Media – Construction	notes in their notebook, the career fields they are willing to pursue and why.
Describe the entrepreneurial career trajectory or path	Analyze the benefits and challenges associated with being an entrepreneur. Prepare a career plan for the work they are interested in.	Appreciate entrepreneurship career trajectory or path	Employment options (Advantages and disadvantages for each): – Self-employment – Being employed. Entrepreneurship Career trajectory or path – Assess yourself – Make a list of potential occupations – Explore the options	Skills Lab: In manageable Teams learners discuss different employment options using examples from the communities. Debate Activity: Teams are assigned a motion “Self-employment is better than paid employment”. Use of resourceful person: Invite a local successful entrepreneur, students ask questions related to becoming a successful entrepreneur and how they ended in an entrepreneurship career. In small teams, learners analyze the testimonies of the successful local Entrepreneur and relate with the career trajectory. Ask the learners to reveal which stage was missing and why?

			– Narrow down your list – Set goal – Create a career action plan – Obtain training.	Project activity: Building on the business ideas generated in the previous unit, individual learners create plans of becoming entrepreneurs, and present their work to the audience for feedback and for teachers' consideration.
Links to other subjects: Economics, General studies and communication skills.				
Assessment criteria: Ability to create an entrepreneurship career plan.				
Resources/Materials: <i>Resource person (successful entrepreneur), case studies.</i>				

Topic Area: Entrepreneurial culture			Sub Topic Area: Personal development	
S.4 Entrepreneurship	Unit 4: Setting personal goals		No of periods: 11	
Key Unit competence: To be able to make plans to achieve personal goals.				
Learning Objectives			Content	Learning Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain personal values, skills, and qualities	Analyze the relationship existing between values, skills, and personal strengths and areas for improvement.	Recognize that values are important in family, society, and employment.	Personal goals: Definition of key terms (personal goals& personal values)	Case study: Prepare a story that includes a family whose members are lazy, have no values, not committed to what they say or do etc. In teams, task the students to brainstorm on how they can help that family.
State the importance of having personal values	Assess the importance of having personal values Link personal values to their daily lives.	Appreciate the importance of having personal values Treat others with respect as one would do in the workplace.	Importance of having personal values – Increases self-awareness – Influences our outcomes – Improves quality of life	Skills Lab: - Teams discuss and write top 5 personal, qualities and show how they influence Business operations

Outline personal values or qualities that influence entrepreneurship	Examine the values desirable in family, society, and Business.	Embrace personal qualities in relation to entrepreneurship	– Helps you to gain self-respect – Etc.	Project Activity 1:
List the personal qualities in relation to entrepreneurship	Examine personal qualities in relation to entrepreneurship	Advocate for values desirable in family, society and employment.	Identifying values and skills: Personal qualities; Friendliness, respect, caring, self-reliance, commitment, loyalty, honesty, dignity, integrity, prudence/economic well-being.	Assign teams a task of identifying a business owner with no good values and good personal qualities/values. Teams write a summary report on the impact caused by such a person on the business and draw a plan of how they can help a business owner to improve.
Explain characteristics of a goal (specific, measurable, realistic and time frame).	Design a smart goal.	Support the role of setting Smart goals in life.	Personal qualities in relation to entrepreneurship: – Creativity: determination, decision making, etc. – Personal development: Goal setting, responsibility, commitment, etc. – Engagement with society: respect, involvement, tolerance, etc.	Skills lab: Different Teams, explore and do a presentation on desirable personal values, skills and strengths that can make a good entrepreneur and best employee.
Identify steps to setting a goal and creating a plan.	Develop a plan that would help one to achieve the set goals.			Project Activity 2: Each learner makes a Goals Board to show their SMART long-term

			– Workplace: cooperation, respect, ethics, etc. Setting goals and making plans relating to career: concept of SMART goal: (Specific, Measurable, Achievable, Realistic, Time bound) Setting long term and short term goals: steps, time frame and resources needed in setting SMART goals: – Identify priorities, – Start and end points, – Skills, – Opportunities, – Strategies, – Obstacles.	goals in Academic, Business, Personal, and Community areas. Learners choose images, words, and objects that represent the skills, qualities, and values needed to achieve these goals and create a creative display on the goal board. For their business goal, learners will break it into smaller short-term goals, list action steps for each goal, set deadlines, and identify resources to guide them over the next three years.
--	--	--	---	--

Links to other subjects: General studies and communication skills.

Assessment criteria: Ability to formulate SMART goals and actionable plans to achieve personal objectives.

Resources/Materials: Work readiness training program, textbooks, and resource persons.

Topic Area: Business legal aspects			Sub Topic Area: Business laws and contracts	
S.4 Entrepreneurship	Unit 5: Laws in business operations		No of periods: 14	
Key Unit competence: To be able to apply laws in business operations.				
Learning Objectives			Content	Teaching /Learning activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of laws and business laws.	Assess the importance of laws in business.	Recognize the need for laws in business operations.	Laws and the business Meaning of: – Laws – Business law. Importance of business laws: – Helps to instill discipline in business operations – Conformity with government expectations	Group activity: teams discuss school rules and regulations that control their business club activities. They highlight the importance of laws in the society and then make a connection to laws and Business laws in the country
Discuss the importance of laws in business.	Register a business	Advocate for legal practices while carrying out business activities.	– Protection of the consumers, environment It provides guidelines and directions in every area of the business.	Skills Lab: -Teams search about the different laws related to business in Rwanda stating the importance of such laws when carrying out business activities.

Identify various laws related to business. Outline different legal institutions related to business in Rwanda. Identify the various forms of business ownership.		Appreciate the need for registering a business	Laws related to business: Land act, food and drugs law, consumer protection law, national environmental law, etc. Legal institutions related to businesses: – Commercial courts – Rwanda Revenue Authority (RRA) – Rwanda Development Boards (RDB) – Rwanda Utilities Regulatory Authority (RURA). Legal forms of business ownership (characteristics, advantages and disadvantages) – Sole trade business – Partnership – Joint stock companies (public and private limited and unlimited companies) – Co-operatives in Rwanda.	Use of resourceful person: Learners meet a local entrepreneur or even a resource person from any legal institution related to business to share information concerning business formation and registration. Discussion activity: learners search and discuss the functions of the different legal institutions related to business in Rwanda, the legal forms of business in Rwanda; characteristics, advantages, and disadvantages. Teams talk to a staff working at Rwanda Development Board in their community or search on websites, and find out; • Requirements for starting a business • Where and how one can register a business. • Institutions involved with starting and developing a business
---	--	---	--	---

Explain the steps required while registering a certain business			Business Formation and registration according to form: – Registering a sole trade business – Registering a domestic company – Registering a partnership – Registering a co-operative. Benefits of registering a business – Obtaining licenses and permits – Legal liability protection – To be versatile – Have continuity entity – Safeguarding business name – Protecting a product brand.	• Teams debate on which form of business is easy to register. Skills Lab: -Learners analyze case studies involving the process of starting and operating various forms of businesses; – Teams interview an entrepreneur on the benefits of registering and consequences of not registering. Project activity: Working individually or in pairs, students will explore the official Rwanda Development Board (RDB) e-registration portal to identify and document the steps required to register a chosen form of business such as a sole proprietorship, partnership, company, or cooperative. They will compile a digital report that includes step-by-step instructions, relevant screenshots from the portal, and
Explain the benefits of registering a business.				

Describe the consequences of not registering a business.			Consequences of not registering a business – Being fined – Suspension of operation – Inability to issue official invoices – Operating outside official system – Limitation to financial services.	mock registration documents to demonstrate their understanding of Rwanda's virtual business registration process.
Link to other subject: Economics.				
Assessment criteria: Ability to use business registration forms to register a given legal form of business ownership successfully.				
Resources/Materials: Case studies, research materials/reference books, resource persons, research materials, RDB website.				

Topic Area: Business legal aspects			Sub Topic Area: Standardization culture	
S.4 Entrepreneurship	Unit 6: Role of standards in business			No of periods: 10
Key unit competency: To be able to apply standards requirements in business operations to acquire certification marks				
Learning Objectives			Content	Teaching /Learning activities
Knowledge and understanding	Skills	Attitudes and values		
meaning of compliant and non-compliant or substandard product or service Identify the importance of standards to consumers, government, society and Industry.	Evaluate the importance of standardization in Business Use national standards to assess business practices and identify sub-standard products.	Appreciate the importance of standards for business, consumer and the government Demonstrate responsibility in promoting compliant products and services	Meaning of standards in business. – Compliant product or service – Non-compliant or substandard product or service Importance of standards to: – Consumers – Government – Industry – Society.	Show learners 2–3 pairs of products (real or pictures), for example: fresh fruit vs slightly spoiled fruit; a well-packaged product vs a poorly packaged one. In small groups, task them to observe each pair and inspect products for quality (packaging, labeling, expiry, hygiene, etc.), discuss the following questions: Which product looks better? Why? What differences do you notice? Which one would you choose? Why?

Explain the Describe the standard development process Explain how technical experts from business can be engaged in standards development process. Explain the importance of participation in standards development by business people	Contribute to the process of standard development at relevant steps as stakeholder from business.	Show concerns for substandard products. Value participation and collaboration in standards development	Steps for standard development – Submission of the request – Review and approval of the request – Standard drafting – Technical Committee Experts' deliberations on the draft standard – Public review and addressing technical comments, if any – Approval – Publication Participation in standard development – Identification of need to inform standard development – Standards drafting – Technical Committee that discusses the draft standard	Ask learners to share their answers and write key words they mention on the board. Role play: Prepare a role play showing the difference between compliant and non-compliant (substandard) products. Use real-life scenarios to demonstrate how product quality affects businesses, consumers, and society. Bring tangible products as examples and use them in your performance to explain how to recognize quality, the benefits of standards, and the importance of business participation in standards development.
---	--	--	--	--

			– Public review – Standard revision Importance of participation in standards development Participation: – helps set realistic quality requirements. – allows businesses to express their needs and challenges. – improves product quality – enhances competitiveness – promotes innovation – facilitates market access – reduces production costs	
Links to other subjects: Economics, General studies and communication skills				
Assessment criteria: Ability to apply for the standardization mark appropriately.				
Resources/Materials: Internet, case studies, audio-visual materials, published standards by the government. RSB links and newsletters.				

Topic Area: Business operations management			Sub Topic Area: Business organization and management	
S.4 Entrepreneurship	Unit 7: Business management		No of periods: 10	
Key Unit competence: To be able to create an organizational structure for the business enterprise				
Learning Objectives			Content	Teaching /Learning activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of business, management, and business management Explain the importance of management in a business organization	Analyze various managerial functions Construct an organizational chart	Acknowledge the role of an organizational structure in one’s decision making.	Business management Meaning of: – Business, – Management, and – Business management, – Importance Managerial Functions – Planning – Budgeting – Organizing – Leading – Controlling, etc.	Think, Pair, and share activity: Learners discuss the example of how and what a local trader does / operates or what a business club does and how it is operated in order to understand what a business is, how it is managed and the importance of managing it. Brainstorm activity: Brainstorm on the functions of management with an example of their school management, learners analyze the possible consequences if their school had no head teacher, the DOS office, the bursar’s etc.

Describe the managerial functions in a business organization				Learners analyze and discuss case studies on business stakeholders to understand how stakeholders help the business to survive. Teams discuss and share the types of people involved in business organizations; and some factors they would consider while choosing the right people to work with.
Identify the categories of people to work with in the business organization	Explore business management tools using computers	Advocate for working with right people in the right place	Stakeholders in Business – Shareholders/ Partners – Employees/ workers – Service providers/ suppliers – Government – Etc.	Project activity: In small groups, students will design an organizational chart for their Business Club, a local sector office, or one of their small business ideas. Using computers or drawing tools, they define key roles, departments, and reporting lines, and explain how each role supports planning, budgeting, organizing, leading, and controlling. The chart should show a clear structure and will be presented to the class to demonstrate effective business management
Explain the meaning of an organizational structure/ chart		Appreciate the factors considered while choosing the right people to work with.		

Identify the various departments and their roles in a business organization			Factors considered in choosing people to work with in a business organization – Financial capacity – Experience – Skills, vision, etc. Organizational structure Divisions, Departments, Sections, and their Roles	
Links to other subjects: Principle of management, Economics, General studies and communication skills				
Assessment criteria: Ability to design a good organizational structure of a given business.				
Resources/Materials: Case studies, nearby organizations, simulation games, samples of organizational charts.				

Topic Area: Business operations management			Sub Topic Area: Financial management and markets	
S.4 Entrepreneurship	Unit 8: Financial Management		No of periods: 13	
Key Unit competence: To be able to conduct an investment appraisal for a personal business idea.				
Learning Objectives			Content	Teaching /Learning activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of finance, financial systems, and financial management	Differentiate the various sources of business capital	Take precaution when choosing sources of finance for their business activities.	The meaning of: – Finance – Financial system – Financial management Functions of financial management – Ensures proper usage of resource – Repaying all borrowed funds – Ensuring accountability to shareholders, etc.	Think, Pair and share Activity: Learners discuss the various expenses they make in their daily lives, how they finance and manage the expenses. Relate their presentations to the meaning of finance, financial system and financial management.
Identify the various sources of capital, their advantages and disadvantages	Choose the most appropriate source of capital for a business	Adopt a culture of saving for capital and future business investment		Discussion Activity: Teams brainstorm on the functions of financial management in a business enterprise

Explain the meaning of interest	Calculate various interest rate		Sources of Business Capital: – Personal savings – Loans from financial institutions – Trade credit etc.	Skills Lab: -Learners share their personal experience about handling their pocket money; whether it is easy or difficult to manage money. Learners discuss ways of raising money to meet their personal needs, then identify ways that a business could acquire funds.
Explain the meaning and types of interest			Advantages and disadvantages of sources of capital (personal savings, loans, trade credit)	Scenario activity: Teams are given scenarios of a business related to interest and are asked to calculate them basing on different ways of computing interest.
Define Break-Even Point, payback period and return on investment	Appraise investment using different techniques	Being accountable and responsible for decisions and choices on capital and business investment	Interest: – Meaning of interest – Types of interest – Calculation of various types of interest Investment appraisal techniques: – Break Even Point – Payback period – Return on Investment, – Return on Equity	Skills Lab: Teams create plans of how they will acquire the funds for their various team projects. Project Activity: Individual Students or in small groups complete an investment appraisal form for their personal business idea, including BEP, PBP, and RoI calculations with graphs. Based on this, they

				will take one practical action: either collecting pricing feedback, pitching to a group, or presenting to potential investors. The final output (Investment appraisal form) should include financial analysis and feedback summary that will be presented and then submitted for grading
Links to other subjects: Economics, mathematics, General studies and communication skills.				
Assessment criteria: Ability to find appropriate sources of capital and make rational investment decisions.				
Resources/Materials: Internet, Case studies, newspapers, journals				

Topic Area: Business Operations Management			Sub Topic Area: Financial Management and Markets	
S.4 Entrepreneurship	Unit 9: Financial Institutions		No of periods: 11	
Key Unit competence: To be able to use banking and non-banking institutions’ services				
Learning Objectives			Content	Teaching /Learning activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of financial institutions. Describe the role of financial institution to entrepreneurs Identify the types of banking and non-banking financial institutions in Rwand	Assess the role of financial institutions to a business	Recognize the need for financial institutions in business operations Advocate for rational use of various financial products and services in business activities	Meaning of Financial institutions Roles of financial institution to entrepreneurs – Provision of working capital – Safe custody for money – Means of payment, etc.	Students brainstorm on the meaning and types of financial institutions in their community, then give the role of the identified institutions to entrepreneurs Skills Labs: Based on the above activity, learners in small teams classify and identify financial institutions according to types and give their functions to the entrepreneurs and the society. Make a class presentation. Project Activity 1 In teams, students will research different types of financial

Distinguish between banking and non-banking financial institutions Identify the role of financial institutions in promoting entrepreneurial policies	Classify the various financial institutions into banking or non-banking institutions in one's community	Appreciate the roles of various financial institutions in promotion of entrepreneurial policies.	Types of financial institutions: Banking financial institutions – Central Bank – Commercial banks – Development banks, Non- banking financial institutions Examples: – Insurance companies, – Social security fund, – Saving and Loan Associations, – Credit unions, Procedure of loan application – Identify the need for a loan – Select a financial institution	institutions in Rwanda both banking and non-banking through internet searches or local visits. Each team will choose a personal or school-based business idea and identify which financial institution would best support it. Using computers, they will explore the institution's website (if available), find out how to apply for a loan, and prepare a mock loan application file. This file should include: (1) a brief business description, (2) the amount of capital needed, (3) intended use of the loan, and (4) basic financial projections. Their final report will combine the research findings and the mock application. Use of a resource person: Resource person from financial institution share with learners the role of financial and Non-Banking financial institution in promoting business, various banking functions and documents used obtain services.
State the various Non-banking financial institutions and their importance State the procedures of loan application	Examine the procedures followed while applying for a loan.	Appreciate the existence of various types of financial institutions.		

			– Open an account (If not existing) – Prepare required documents – Submit the loan application – Loan appraisal process – Approval or rejection – Signing the loan agreement – Loan disbursement	Skills labs: In teams, students search for non-banking financial institutions. Interview teachers in their school and find out which non-banking institutions they are using, and why? Write down their findings for class presentation. Project Activity 2: Students identify the financial institution of their interest and open a bank account for their school business club or one for their business idea. Write down all the procedures. They inquire about the procedures of securing a loan. Write a report on their findings for review.
Links to other subjects: Economics, General studies and communication skills.				
Assessment criteria: Ability to document a clear procedure of acquiring a loan and obtaining an account in a given banking/ non-banking institution				
Resources/Materials: Internet, Case studies, membership form from various financial institutions, loan application forms, newspapers, journals				

SENIOR FIVE

3.3. Senior Five

Key Competences at the end of Senior Five Entrepreneurship

After completion of senior 5, the Entrepreneurship syllabus will help the student to:

- Create a project by using Business Model Canvas
- Practice good relations with business stakeholders.
- Comply with quality standards in business

Topic Area: Entrepreneurial Culture			Sub Topic Area: Business startup and Development	
S.5 Entrepreneurship	Unit 1: Market research		No of periods: 11	
Key Unit competence: To be able to apply market research in business				
Learning Objectives			Content	Teaching/Learning Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of market, research and market research	Analyze the relationship between business and market research in a business activity	Appreciate the role of conducting market research in business	Meaning of: – Market – Research – Market research Purpose of market research – Establish customer needs – Identify nature of demand – Identify size and nature of competition. – Identify possible suppliers of goods. – Etc.	Case study activity: Provide a case study to learners involving a business with few customers, poor products, many competitors and no suppliers, ask learners what they think the business owner has failed to do as required business activity. Then connect to the concepts of research and its importance Team discussion: Teams brainstorm the meaning of customer, product, competitor and supplier surveys as elements of market survey. Project activity 1: Designing a market survey tool: Based on the identified business idea as a class, each group is assigned to design at least one
Explain the purpose of market research for any business	Examine the importance of market research Formulate relevant survey questions on every element of market survey.			

Describe the elements of market research	Design tools to gather information about customers, product, competitors and suppliers		Elements of market research Customer survey – Meaning of customer survey Product survey – Meaning of product survey Competitor survey – Meaning of competitor survey. Supplier survey – Meaning of supplier survey. Market research tools: – Questionnaire – Interview guide – Observation checklist	survey tool for either customer, product, competitor or supplier survey. Each survey tool designed, should contain information such as name of business or person collecting data, name of respondent, address and other questionnaires related to the element. In a group activity, dealing with competitors. Learners analyze business in their neighboring community and identify how they compete with their business club products.
Identify different market research tools.	Analyze the collected data about customers, competitors and suppliers	Support data interpretation and decision making in market research		
Explain the importance of data interpretation in business decision making.	Interpret market research findings			Evaluating suppliers for a business: In teams, learners use a supplier survey tool and go to a nearby market, shop, or canteen and interview the owner about the criteria they use to select their suppliers, write down their findings and make class presentations.

			Data interpretation and Decision making on each element of market research – Meaning of data interpretation – Steps in interpreting data	Evaluating customers' behaviors towards a business activity: Teams are tasked to visit the canteen, students' business or nearby community businesses and collect customer behaviors related data using the customer survey tool. Thereafter interpret the data to make decisions on customer behaviors and make presentations. Project activity: Task learners to create any marketing survey tool they intend to use in their business. Make a report.
Link to other subjects: General studies and communication skills, economics (Demand and Supply) , Mathematics (Data collection, tabulation and analysis using percentages and graphs) .				
Assessment criteria: Ability to create a relevant survey tool for customer, product, competitor and supplier surveys.				
Materials/Resources: Resource persons, survey guides, textbooks, sample products				

Topic Area: Entrepreneurial Culture			Sub Topic Area: Career Opportunities	
S.5 Entrepreneurship	Unit 2: Developing a business idea using the Business Model Canvas		No of periods: 10	
Key Unit competence: To be able to map a business idea using the Business Model Canvas (BMC).				
Learning Objectives			Content	Learning Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning and importance of a Business Model Canvas	Design a Business Model Canvas	Appreciate the Business Model Canvas	Meaning of: – Business model – Business Model Canvas (BMC) Purpose of Business Model Canvas. – Helps an entrepreneur to transform an idea into an actionable business plan – Gives an entrepreneur a wide view of every step of their business etc. The components of BMC – Customer segments. (The target customers). – Value proposition (the uniqueness of the business)	Team activity: The teacher provides a BMC template and guides learners to analyze it. Learners reflect about their business ideas generated in Senior four, and brainstorm about Business Model, BMC and state its importance to an entrepreneur in relation to the BMC template. Team activity: Learners work in groups to identify the components of different stages of a Business Model Canvas. Individually, they draw a BMC template and

Describe the purpose of Business Model Canvas	Assess the importance of Business Model Canvas		– The channels (the path to customers) – Customer relations (customer care strategies) – Revenue (sources of business revenue) – Key resources (materials and resources needed) – Key activities (time table of activities) – Cost structure (determination of startup costs) – Impact of business (positive/negative)	fill in all the components of a business.
State the components of a Business Model Canvas	Analyze activities in each step of a BMC	Embrace the use of Business Model Canvas	Steps of Business Model Canvas: – Assess desirability (Customer segments, Value proposition, Customer relationships), – Assess feasibility (Key activities, Key resources, Key partners), – Assess viability (Revenue streams, Cost structure)	Project Activity: Learners design a Business Model Canvas (BMC) for a chosen business idea. They analyze how each element such as customer segments, value proposition, channels, key partners, and revenue streams supports business success. They then refine the model by identifying improvements and innovations that meet customer needs and enhance competitiveness. Finally, they present a clear and well-organized visual and a sample prototype of their product.
Link to other subjects: Economics and General studies and communication skills				
Assessment criteria: Ability to accurately map key components of a business idea on the Business Model Canvas				
Materials /Resources: BMC template, Resourceful persons, textbooks, Paper, Flipcharts, Computer, Projectors, Markers, Etc.				

Topic Area: Business growth and sustainable development			Sub Topic Area: Socio-economic development	
S.5 Entrepreneurship	Unit 3: Business growth and development		No of periods: 10	
Key Unit competence: To be able to develop a business growth and development strategy to enhance performance.				
Learning Objectives			Content	Learning Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of business growth and business development	Differentiate a growing business from a failing business	Show respect for the factors that lead to business growth.	Meaning of: – Business growth – Business development Factors that lead to business growth: – Favorable government policies, – Less or no competition, etc. Factors that hinder business growth: Internal factors, – Lack of experience in the business, – Capital constraints,	Scenario activity: Teacher narrates a scenario of a business that has been successful (include indicators of a successful business in the scenario) and ask learners to connect it to the meaning of business growth and business development Visit study: Learners visit a nearby local business to investigate factors that may have contributed and hindered their growth. Teams should produce and present reports including recommendations for overcoming any constraints on business growth.
Identify factors that favor business growth and development.	Assess factors which lead to business growth and development			

Describe the internal and external growth strategies	Assess different growth strategies in business	Appreciate the need for business growth strategies	– Higher production capacity – Improved cash flow Growth strategies: Internal business growth strategies – Bundling product or services, – Promotions and discounts – Developing new products – New distribution channel, etc. External business growth strategies – Mergers (reasons, types) – Franchising (advantages and disadvantages) – Joint-ventures	their business could expand to new locations or reach more customers.
Links to other subjects: Economics and general studies and communication skills				
Assessment criteria: Ability to develop a business growth and development strategy to enhance performance				
Resources/Materials: Textbooks, Nearby businesses, existing business club in school, case studies and resourceful persons, Etc.				

Topic Area: Business growth and sustainable development			Sub Topic Area: Socio-economic development	
S.5 Entrepreneurship	Unit 4: Role of entrepreneurship in socio-economic development		No of periods: 10	
Key Unit competence: To be able to evaluate the contribution of entrepreneurship towards socio-economic development				
Learning Objectives			Content	Learning Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of socio-economic development List indicators of socio-economic development	Analyze factors that lead to socio-economic development Explain how each indicator demonstrates socio-economic development	Appreciate the role of entrepreneurship towards socio-economic development	The meaning of socio-economic development Factors for socio-economic development – Availability of resources – Government policy – Entrepreneurial activities etc. Indicators of Socio-economic development – Improved infrastructure – Increased gross domestic product – Improved standards of living etc.	Think, Pair and share activity: Learners analyze the changes they have observed in the locality over the past 5 years. They share what they have observed in relation to what led to the changes (development or under development) in their communities.

Outline the contribution of entrepreneurship to the socio-economic development	Examine the role of entrepreneurship in socio-economic development.	Embrace proactive social responsibility of business	Role of entrepreneurship in Socio-economic development – Employment – Government revenue (Business Taxes) – Other contributions to socio-economic development Entrepreneurs and social responsibility – Sponsoring youth sport teams – Sponsoring a participant(s) in a local marathon – Building houses to disadvantaged residents – Offer your skills through teaching classes on entrepreneurship to local residents	Group Activity: Learners in teams identify local entrepreneurs around their schools that have contributed to the community's development, they share how their entrepreneurial activities have contributed to socio-economic development in the community. Project activity: Each learner creates a plan of how he/she will use entrepreneurship to contribute to socio-economic development and makes a report.
Links to other subjects: General studies and communication skills, Economics				
Assessment criteria: Ability to assess the contribution of entrepreneurship to socio-economic development clearly.				
Resources/Materials: Entrepreneurship textbooks, Paper, Flipcharts, Computer, Projectors, Markers, Etc.				

Topic Area: Business growth and sustainable development			Sub Topic Area: Technology in business	
S.5 Entrepreneurship	Unit 5: ICT in business		No of periods: 8	
Key Unit competence: To be able to appropriately use ICT in business				
Learning Objectives			Content	Learning/Teaching Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of ICT	Categorize various ICT tools used in business	Appreciate the role of ICT in effective and efficient operation of the business	Meaning of ICT Tools used in ICT – Phones, – Computers – ATMs – Social media – Artificial Intelligence (AI) Role of ICT in business – Makes work easier – Produce better products – Helps companies sell globally, etc.	Analyzing scenario: Prepare a scenario involving a successful business that uses ICT in its operations and another average business that does not use it. In manageable teams, students connect the scenario to the meaning of ICT, and identify ICT tools that might have contributed to the successful business. Skills lab: Based on the above scenario, learners in groups identify and discuss how ICT can contribute to their business club operations. Students may suggest ICT tools that are most
Identify the ICT tools used in business	Use ICT tools like phones, ATM cards, computers, Artificial Intelligence (AI)	Acknowledge ICT as source of business opportunities		
Outline the roles of ICT in business				

Outline various business opportunities that can be started basing on ICT	Explain the role of ICT in a given business context Examine various business opportunities that can be started basing on ICT		ICT as a source of business opportunities – Website designing – Repair ICT equipment – Developing software for different organizations – Starting and managing online shops	important to their business club operations. They may use artificial intelligence (AI) to come up with more tools that can help their business to function properly. Think Pair and Share activity: Individual learners propose appropriate ICT tools and how they will use them in businesses they intend to start. Project activity: Using a computer as an ICT tool, learners design any business document to be used in their business club activities. They plan also on how they will use social media, Artificial intelligence to promote their business club.
Links to other subjects: Computer science, physics, general studies and communication skills, economics				
Assessment criteria: Ability propose appropriate ICT tools to use in business				
Resources/Materials: Textbooks, Internet access, Audio-visual materials, Photos, Computers, Cameras, Projectors, Etc.				

Topic Area: Business Operations Management			Sub Topic Area: Business Organization and Management	
S.5 Entrepreneurship	Unit 6: Business public relations		No of periods: 10	
Key Unit competence: To be able to practice good relations with business stakeholders.				
Learning Objectives			Content	Learning Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of public relations 				

Outline the tools of public relations and how they are used in Business	Strategize how to handle different personalities in business activities	Work with colleagues or partners to reach a stated goal	– Business events etc. Business stakeholders' relations: Customer relations – What customer want – How to manage customer care? – Dealing with customer complaints – Understand and listen to show that you care – Focus on the solutions – Ways to treat customers better – Developing customer loyalty Supplier relations How to be a successful sales person Community relations Supporting community activities and development programs	Project activity: Building on their previous business model Canvas, students create a brochure (be digital or not) that showcases their business identity (featuring a name, logo, mission, vision, and product or service description). They will identify relevant stakeholders and prepare thoughtful questions to gather feedback. Through a simulated networking session, students present their brochure, interact with peers acting as stakeholders, and reflect on how to improve their business communication and outreach (practicing communication, inquiry, and active listening skills)
Describe how to handle customer complaints				
Explain ways in which a business relates with community				
Cooperate with the various business stakeholders				
Links to other subjects: General studies and communication skills, English etc.				
Assessment criteria: Ability to use a designed public relations tool (a brochure) to attract business investors.				
Resources/Materials: Case studies and scenarios, resource persons, textbooks, public relations manual guide etc.				

Topic Area: Business legal aspects			Sub Topic Area: Business laws and contracts	
S.5 Entrepreneurship	Unit 7: Business contracts		No of periods: 11	
Key Unit competence: To be able to create a valid business contract				
Learning Objectives			Content	Learning Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of contracts, and business contracts.	Analyze various forms of contracts	Respect value of agreements with other people	Business contracts: Meaning of contracts, and business contracts Forms of business contract – Written contracts – Oral contracts Importance of business contracts: – Makes parties involved execute their duties and responsibilities, – Minimizes business risks, – Acts as evidence of an agreement. (Business dealing)	Scenario activity: Teacher narrates a scenario involving a business that supplied products to a customer without any written document and later the customer refused to pay for the supplies. Task learners to relate the meaning of a contract to the above scenario and its importance in business. Team discussion: Teams Discuss the benefits of making a business contract and connect to how contracts are important for their business club activities.
Describe forms of business contracts	Assess the essential elements of a valid contract	Recognize different forms of contract		
Explain the importance of contracts in life and business	Design a valid business contract			

Describe the elements of a valid contract Identify common contracts related to business Identify the element of a written contract Describe ways in which contracts can be terminated	Analyze ways of terminating a contract	Respect the need for terminating the contract.	Essential elements of a valid contract. – Offer, – Acceptance, – Consideration, – Legality, – Witness etc. Common business contract: – Sale and purchase agreement – Partnership agreement – Employment contract Ending/Termination of a contract by: – Agreement, – Performance, – Breach, – Frustration, – Operation of the law	Inside or outside school visit: Teams approach the school administration or visit nearby school businesses to identify common business contracts used and share findings together. Project activity: Given the products produced by student's business club projects, teams create sales contract with the school canteen or school Administration prescribing how they will supply their products The contract should have the title, parties to the contract, products to be supplied, terms and conditions, signature of parties and witnesses.
Links to other subjects: General studies and Communication Skills				
Assessment criteria: Ability to create a valid contract for any business dealing.				
Resources/Materials: Case studies, Sample of contracts, Entrepreneurship textbooks				

Topic Area: Business operations management			Sub Topic Area: Business Organization and Management	
S.5 Entrepreneurship	Unit 8: Office procedures		No of periods: 7	
Key Unit competence: To be able to manage general office operations				
Learning Objectives			Content	Learning Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of an office, and office procedures.	Operate or use a simple office equipment	Recognize proper use of business office equipment responsibly	Meaning of: – An office, – Office procedure. The role of keeping office equipment's – Increase the output of workers – Increase the speed and performance of work done – Improves the quality of work – Makes work and keeping documents easy.	Observation activity: The teacher provides Physical equipment or photos of different office materials, then learners identify their names and how they are used. Learners visit different offices in school or use experience in other areas to brainstorm the meaning of office and office procedures. Learners work in teams and analyze each office equipment then state the role it plays in the office.
Identify the role of keeping office equipment	Assess the role of keeping office equipment	Take proper care of office documents and equipment		
Explain routine equipment maintenance and cleaning procedures	Interpret various classification systems Sort, handle and store documents			

Identify ways of keeping equipment secure Outline the main office support equipment	Analyze the main office support equipment	Show respect for confidentiality and privacy of business information. Appreciate the role played by the main office support equipment.	Information and record handling – Maintenance of established filing system – Classification systems – Methods for sorting, handling and storing documents – Efficient and effective filing system – Safety, security and confidentiality of information -File retention policy Main office support equipment – Computers – Stationery – Photocopiers and Printers – Telephone system	Learners visit the school bursar, director of studies, or any other office in school and identify how documents are filed, provision of safety, security and confidentiality of information; and the file retention policy with the school Project Assessment: filing business documents, Teams create a club project file including all their records (the file will include key documents such as meeting minutes, activity plans, financial records, and promotional materials) and present them to the class members.
---	--	--	---	--

Links to other subjects: General studies and Communication Skills

Assessment criteria: Can write the different ways of keeping and maintaining safe personal records & documents.

Resources/Materials: Office Equipment, Textbooks, Paper, Flipcharts, Computer, Projectors, Markers, Etc.

Topic Area: Business legal aspects			Sub Topic Area: Standardization culture	
S.5 Entrepreneurship	Unit 9: Quality assurance and quality control in business		No of periods: 8	
Key Unit competence: To be able to assess quality through quality assurance and quality control and recommend improvements where gaps or non-conformities are identified.				
Learning Objectives			Content	Learning Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning of quality control, quality assurance, quality management and conformity Establish the relationship between quality management, quality assurance and quality control Explain the benefits of quality assurance and quality control for a business	Apply quality control and quality assurance in business operations to meet relevant standards requirements. Implement effective improvements to bridge loopholes identified in a given operating business while	Appreciate the importance of quality assurance and quality control in a business. Demonstrate commitment to continuous improvement	Meaning of: – Quality assurance – Quality control – Quality management – Conformity Relationship between quality control quality assurance and quality management Benefits of quality assurance and quality control for a business Improved product quality – Increased customer satisfaction	Learners work in small groups with familiar products such as bottled water, bread, or packaged snacks. Each group carries out a visual inspection, checking aspects like appearance, expiry date, packaging condition, labeling and cleanliness, and then decides whether the product meets expected quality requirements (conformity). Based on their observations, learners discuss the practices the manufacturer should implement to prevent defects and ensure that quality requirements are met in the

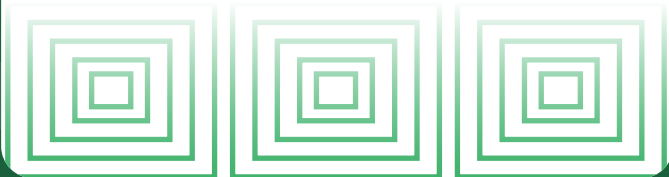

Identify the key quality aspects to be considered when undertaking quality control and quality assurance Explain the role of testing and calibration in quality management Describe the role of accreditation in cross-border businesses	undertaking quality control and quality assurance. Analyze the role of accreditation in business	– Reduced costs – Compliance with standards and regulations	final product. Each group then presents their findings. From the findings, the teacher come up with the clear difference between quality assurance and quality control. Skills Lab: -Teams analyze how quality assurance and control is done in their business club production processes, then identify loopholes in their operations. Teams give their views on how to improve the quality assurance and quality control in place. Group discussion: Learners choose a common imported product found at home or in nearby shops. They identify the country of origin and observe any quality or certification marks on the product. Based on their observations, they discuss how such marks help the
		Quality aspects for products (General checklist for quality control and quality assurance) – Quality assurance checklist – Quality control checklist Role of testing and calibration in quality management Role of accreditation and its role in cross-border businesses	

				product to be accepted and trusted in another country. Each learner or group presents their example, helping them understand the role of accreditation in facilitating safe and reliable cross-border trade.
Links to other subjects: General studies and Communication Skills, Biology and Chemistry				
Assessment criteria: Ability to compare a high quality and substandard product or service to recommend improvement				
Resources/Materials: Entrepreneurship textbooks, Paper, Flipcharts, Computer, Projectors, Markers, Etc.				

Topic Area: Business operations management			Sub Topic Area: Accounting and inventory management	
S.5 Entrepreneurship	Unit 10: Accounting prime books		No. of periods: 14	
Key Unit competence: To be able to record business transactions appropriately in prime books.				
Learning Objectives			Content	Learning Activities
Knowledge and Understanding	Skills	Attitudes and values		
Explain the meaning and importance of prime books in business.	Analyze the advantages and disadvantages of single and double entry system	Appreciate the importance of proper accounting records	Accounting systems • Single entry system (recording entries, Advantages and disadvantages) • Double entry system (T-accounts, Crediting and Debiting) Prime books/ Books of original entry (Definition, importance and entries) • General journal • Specialized journals – Purchase journal, – Purchase returns journal,	Team Activity: In teams, learners discuss the systems used in recording linking to the single entry accounting system and the double entry accounting system
Identify the advantages and disadvantages of single and double entry systems	Record transactions using the single entry system Record transactions using the double entry system in a T-account	Recognize the importance of recording transactions		Based on the activity above, learners record the transactions using the double entry system; then discuss the advantages and disadvantages of each system Learners record the transactions in T-accounts by debiting and crediting using the transactions

Describe the different types of accounting prime books	Record business information in appropriate accounting prime books.		– Sales journal, – Sales returns journal, • The cash book – Single/simple column cash book, – Double/Two column cash book, – Three/Triple column cash book	identified in the previous activity Project activity -Teams record transactions in various journals and cash books using their business club project transactions
Links to other subjects: Economics, General Studies and communication skills.				
Assessment criteria: Ability to appropriately record business transactions in prime books from given different source document.				
Resources/Materials: Textbooks, Papers, Flipcharts, Computer, Projectors, Markers, Etc.				

SENIOR SIX

3.4 Senior Six

Key Competences at the end of Secondary Six

After completion of secondary 6, the Entrepreneurship syllabus will help the student to:

- Use EIA to manage the environmental effects of business activities
- Manage their finances responsibly and invest in capital markets
- Properly handle stock for the business

TOPIC AREA: Business operations management			SUB-TOPIC AREA: Accounting and Inventory Management	
S.6: Entrepreneurship	UNIT 1: Ledger and trial balance			No. of periods: 14
Key Unit Competence: To be able to record business transactions in ledger accounts and generate a trial balance for accuracy verification.				
Learning Objectives			Content	Learning Activities
Knowledge and understanding	Skills	Attitudes and values		
Explain the meaning of ledger in accounting Describe the different types of ledgers used in business records Explain the principle of double entry systems of accounting Describe the process of posting.	Record business transactions using the double entry system to the appropriate ledger accounts Balance of the accounts	– Appreciate the importance of maintaining accurate accounting records – Develop a responsible and organized attitude toward record-keeping – Demonstrate concern for accuracy and transparency in financial records	Ledger • Meaning of a ledger and types of ledgers: – Purchase ledger, – Sales ledger, – Purchase returns ledger – Sales returns ledger – The general ledger • Balancing off the accounts	Using Think, Pair & Share Activity: Learners analyze a case study that involves records with use of ledgers to answer questions related to the meaning, roles of using ledgers in books of accounts and the double entry system., Group Activity: Learners in teams put together a list of items they spend on and those they own. They classify the information into debts and liabilities. Have them to present their balances of the total assets

Explain the purpose and-importance of a trial balance in accounting	Classify transactions into the correct ledgers Prepare a trial balance from ledger balances Check the accuracy of accounting records using a trial balance		• Preparation of ledgers (Using double entry system) Trial balance – Meaning of trial balance – Importance of trial balance – Preparation of trial balance	and liabilities? Introduce the trial balance and its importance using the above presentations. Project Activity: Have each learner identify a given set of transactions in form of trial balance for a particular business, interpret and advise the business on how it can be more financially solvent.
Links to other subjects: Financial accounting (Ledgers and Trial balance), Mathematics (arithmetic accuracy in addition, subtraction, and balancing accounts), ICT (digital ledger preparation using spreadsheets and accounting software)...				
Assessment criteria: Ability to prepare ledgers and a trial balance accurately to ensure proper recording and balancing of business transactions.				
Resources/Materials: Computers (Desktops & laptops), projectors, Manila papers and markers, flipcharts, scientific calculators, accounting software, accounting study books				

TOPIC AREA: Business operations management			SUB-TOPIC AREA: Accounting and Inventory Management	
S.6: Entrepreneurship		UNIT 2: Financial statements		No. of periods: 15
Key Unit Competence: To be able to prepare balance sheet, income statement and cash flow statement				
Learning Objectives			Content	Learning Activities
Knowledge and understanding	Skills	Attitudes and values		
Explain the meaning of financial statements.	Analyze the importance of financial statements	Appreciate the need for end of period reports	Meaning and importance of financial statements Types of Financial statements: – Income statement – Balance sheet – Cash Flow statement	Think, Pair Share Activity/ Group Activity: Teams are given a set of simple transactions of a particular business (could be a case study/scenario) and asked to assess if the business was making a profit or a loss. Relate the above findings from learners to explain the concepts of financial statements. Group Activity: Teams analyze transactions involving purchase and sale of goods to determine gross profit/loss. Group Activity: Teams, analyze given transactions involving expenses and revenues and use them to calculate Net profit/loss. Individual Activity: Using the format, students in teams, prepare financial statements from case studies. Using gallery walk, students share what they have done as the teacher provides constructive feedback. Group Activity: Teams collect data from the transactions of business club activities or that
Identify the various financial statements and their purpose	Distinguish gross profit and net profit	Advocate for preparing of financial statements		

Explain how the income statement and balance sheet assist users in evaluation of business performance.	Prepare income statements, balance sheet and cash flow statement		Preparation of Financial statements – Income statement – Balance sheet – Cash Flow statement	for a local community business and then use it to calculate the Net profit/loss linking to the trading, profit and loss account and prepare a balance sheet for their business. Project Activity: Learners simulate a business by collecting or assuming a series of financial transactions over a chosen period (e.g., three weeks or a month). They identify and categorize all potential fixed and variable costs associated with their business operations (e.g., rent, salaries, equipment, raw materials, sales, etc.) using appropriate journals, then prepare projected financial statements i.e.: an income statement and a balance sheet to show the business' financial position. Thereafter, they: (i) analyze projected revenue, expenses, and cash flow to understand the business's financial health, (ii) Write 2-4 recommendations for improvement based on the financial statements of the business, (iii) present their financial documents to the teacher for feedback and grading. Finally, they create a clear and well-organized financial dashboard poster that visually presents projected revenue, costs, and profits.
Links to other subjects: Financial accounting				
Assessment criteria: Ability to interpret financial status and advise appropriately given the financial statements (balance sheet and income statements)				
Resources/Materials: Research, internet, field visits, application exercises, sample stock management documents				

TOPIC AREA: Business legal aspects			SUB-TOPIC AREA: Standardization culture	
S.6: Entrepreneurship		UNIT 3: Environmental Impact Assessment (EIA)		No. of periods: 10
Key Unit Competence: To be able to manage the environmental effects of business activities using EIA				
Learning Objectives			Content	Learning Activities
Knowledge and understanding	Skills	Attitudes and values		
Explain the meaning and importance of EIA Describe the roles and responsibilities of the various stakeholders in the EIA process. Outline main steps of EIA procedure	Prepare an EIA report for identified business ideas Analyze and interpret the components of EIA reports	Assume responsibility and equitable use of the environment resources. Demonstrate responsibility towards environmental protection.	Meaning and Importance of the Environment to Businesses – Meaning of Environment – Importance of the Environment to Businesses Components of the Environment Affected by Businesses Environmental Impact Assessment (EIA) in Businesses Operations – Meaning of EIA – Importance of Environmental Impact Assessment	Think, Pair and share Activity: Teams analyze a case study of business activities and their negative impacts on the environment, then they propose strategies to mitigate the negative effects caused by the business. Learners discuss the meaning of EIA as one of the strategies to mitigate negative impacts of businesses to the environment. Project activity: Learners identify common waste materials in their school or community and brainstorm ways to apply the 3Rs (Reduce, Reuse, and

Describe the components of the EIA report.		Advocate for EIA report in any business activity.	– Roles and Responsibilities of Stakeholders in EIA Process Environmental Impact Assessment Procedures Components of Environmental Impact Assessment Report	Recycle). They then gather selected waste materials and create a useful recycled product such as eco-friendly furniture or another practical item. After making the product, they write a brief EIA report for their personal or intended business to show how the activity minimizes environmental impact. Finally, they present their recycled product and EIA report clearly and neatly for assessment.
Links to other subjects: Social studies, Geography,				
Assessment criteria: Ability to create an appropriate EIA report for a given business.				
Resources/Materials: Magazines: Internet: George Manu, Robert Nelson, John Thiongo, Klaus Haftendorn (2008), Know About Business, students' book. Turin, Italy: International Training Centre of the ILO.				

TOPIC AREA: Entrepreneurial Culture			SUB-TOPIC AREA: Career opportunities	
S.6: Entrepreneurship		UNIT 4: Business plan pitch		No. of periods: 12
Key Unit Competence: To be able to pitch a business plan				
Learning Objectives			Content	Learning Activities
Knowledge and understanding	Skills	Attitudes and values		
Explain the purpose of business plan pitching Discuss different preparations to be made before business plan pitching Recall steps involved in preparation of a business plan presentation.	Pitch for the business plan Prepare a summary of a pitch presentation	Embrace the purpose of pitching for the business plan	Meaning of project pitching Importance of project pitching – Financing support – Attracting investor – Strategic orientation – Attracting customers etc. Preparation of project pitch: BEFORE PITCHING Preparation required for the pitch – Content preparation – Materials needed for the presentation – Psychological preparation	Team Activity: Teams analyze a case student of a young entrepreneur who pitched their project and won seed capital to start the business. Learners use the case study to explain the concepts of pitching, project pitching and importance of pitching for a project.

Describe the key items to cover in business plan pitching		Respect the steps involved in preparations of business plan pitch.	Steps involved in preparation of business plan pitch – Analysis of audience – Select a topic (focus of the presentation) – Define the pitching objective – Prepare the body of the business plan pitch and anticipate the questions from audience – Prepare the suggestions and conclusion. – Practice pitching of business plan (Micro- pitch)	In teams, students search on the key items considered in business plan pitching and write down their findings. Make a class presentation.
Explain different techniques used during the pitch of a business plan	Examine the steps involved in preparation of a business plan pitch.		Key items in business plan pitch include: – Business idea and goals. – Problem identified – Solution – Target Market – Marketing strategy – Industry analysis – Management Team – Competition – Current status, amount of money requested and the projected use of funds	
Identify the key items to cover in business plan pitch	Examine the key items to cover in a business plan pitch	Recognize the various techniques of business plan pitching.		In teams, students are tasked to identify the business idea, and discuss the techniques that will be used to pitch for their business idea.

Outline the techniques used in Business plan pitching	Differentiate the various techniques of business plan pitching Prepare a business pitching plan following the recommended process.		Techniques to pitch your business plan – Writing only key points – Not reading them, speaking about them – Using visualization, pictures, symbols, colors, tables – Making it short, concise, come to the point, not more than 10 min. – Reacting positively to questions – Using body language, voice, appearance – Trying to convince DURING PITCHING Pitching process (GEPIC): Step 1: Greet Step 2: Engage Step 3: Problem Step 4: Inform Step 5: Challenge	Project Activity: Designing a business pitch poster: Learners develop a pitch plan for their own or intended business using the GEPIC approach, building on their Business Model Canvas from S5. They will design a visually engaging poster with bold fonts, clear visuals, and a catchy headline (Head line) to promote their business idea
---	---	--	---	---

Describe a business plan pitching process			AFTER PITCHING Integrate the suggestion & recommendations	
Links to other subjects: auditing, Management accounting, Taxation and Financial Accounting				
Assessment criteria: Ability to prepare a well-structured business pitch plan for individual projects.				
Resources/Materials: Textbooks, Flipcharts, markers, Microphones and speakers, Projector, Computers etc.				

TOPIC AREA: Business legal aspects			SUB-TOPIC AREA: Taxes and customs procedures	
S.6: Entrepreneurship		UNIT 5: Taxes and customs procedures		No. of periods: 12
Key Unit Competence: To be able to interpret tax computations and declare goods/services from customs				
Learning Objectives			Content	Learning Activities
Knowledge and understanding	Skills	Attitudes and values		
Explain the meaning and importance of taxes.	Analyze various types of taxes paid in Rwanda	Develop positive attitudes towards paying taxes.	Taxes imposed in Rwanda Meaning of Tax Classification/types of taxes Direct tax – Income tax – Property tax – Inheritance tax – Gift tax – Personal income Indirect tax – Consumption tax/VAT – Customs duties – Excise duty Role of taxes – Entrepreneur – Government	Debate Activity: Students debate on taxes as the key engine for development of a country. Use scenarios that involve different types of taxes and the role they play towards the development of the country. Relate the questions from the scenario on the meaning of taxes, the different types and role of taxes. Team Activity: Learners in teams search on the meaning of customs, customs declaration, role of customs service department and customs offices in Rwanda Skills Lab: Based on previous knowledge on customs and taxation in Rwanda and referring to the map of Rwanda learners in teams, answer the following questions
Give examples of taxes paid by businesses in Rwanda	Assess the role of taxes	Recognize different types of taxes.		
State the role of taxes	Calculate the different taxes paid by a business			

Explain the meaning of customs and customs declaration	Differentiate documents necessary for goods declaration in customs	Recognize the role of customs service department in the exportation and importation of goods	– Society Computation of taxes – VAT, – Income tax Role of the customs service department Meaning of: – Customs – Customs declaration Documents used in customs declaration. – Transaction invoice – Transport documents, – Goods invoice – Import License – Arrival declaration etc. Customs offices in Rwanda Declaration procedures (the steps for customs declaration) – Obtain notes of arrival of goods	– Mention the main customs offices in Rwanda. – Why do you think there are customs offices in Rwanda? – “Based on the above findings, teams write a letter addressed to the head of any customs office on what they would want to change and why? Teams present their findings. Use of resourceful person: Invite a Customs declaration officer to guide learners fill sample declaration forms and using provided tax rates (e.g., VAT, customs duties), they will compute the taxes due. Skills Lab: Use simulation games on the process of exportation and importation of goods. Write a report on the lessons learned from the simulation game.
Explain the procedures of verifying, paying of customs duties and taking goods out of the customs	Describe the process related to customs procedures	Advocate for compliance with customs procedure		

			– submit goods arrival notes for verification by RSB – Obtain manifest – Submit import document to the clearing agent for the tax calculation – Pay import tax.	Project Activity: Each learner writes a report on the process of declaring taxes under customs.
Links to other subjects: Economics				
Assessment criteria: Ability to compute different taxes and write a report on how to declare goods/services at customs.				
Resources/Materials: Computers (Desktops & laptops), projectors, Manila papers and markers, flipcharts, scientific calculators, accounting software, accounting study books				

TOPIC AREA: Business operations management			SUB-TOPIC AREA: Financial Management and Markets	
S.6: Entrepreneurship		UNIT 6: Financial Markets		No. of periods: 12
Key Unit Competence: To be able to manage their finances responsibly and invest in capital markets				
Learning Objectives			Content	Learning Activities
Knowledge and understanding	Skills	Attitudes and values		
Explain the meaning, and types of financial Markets	Distinguish between the various types of financial markets	Recognize the various types of financial markets.	Meaning and functions of financial markets Types of financial markets – Primary market – Secondary market examples include Money markets, Capital markets, Commodity markets, Foreign Exchange markets, Derivatives market etc. Capital markets Benefits of investing through capital market: – Access capital, – Discover value of its business,	In teams, students discuss the different ways that they would use to be part of the club activities and cooperatives in their communities. Let them present and relate their findings to financial markets, their meaning, and roles.
Explain the benefits of investing through the capital markets	Evaluate benefits and risks of different capital market instruments.	Appreciate role of capital markets as source of finance		Think, pair, share Activity: Students discuss the benefits of investing in the Capital Market. Group Activity: In manageable teams, students search on; Capital markets instruments and participants. Write the findings and make a presentation. Have a resourceful person from nearby CMA or someone in the school community that has

Describe the instruments of a capital market Identify various capital markets participants Identify the requirements and procedure of listing on the Rwanda Stock Exchange	Make informed decision when investing in the capital markets Analyze the procedures and requirements of joining the Rwanda Stock Exchange	Advocate for capital markets as a source of Investment	– Better bargaining position with financiers, etc. Capital Market instruments – Shares – Bonds – Debentures – Stocks – etc. How to invest in Rwanda stock exchange markets – Pick a broker – Open a trading account with the broker – Choose the asset in which to invest – After making a decision, send a buy order via the broker – The transaction is completed once buying & selling prices match	invested in financial markets to share with learners about financial markets in Rwanda. In teams, students search about the Rwanda Stock Exchange (RSE) by visiting its website or interviewing a local investor. They will select listed companies, track their stock prices, and learn how trading works. Each team will present their findings and explain the benefits and risks of investing through capital markets Skills Lab: Students perform a simulation game where learners take on different roles of stakeholders at a Stock exchange. Discuss lessons learned from the simulation and make a presentation. Project Activity: Have a resourceful person from nearby CMA or someone in the school community who has invested in financial markets to share with
---	---	---	--	---

			- The broker issues the transaction notification & charges their fees	learners about financial markets in Rwanda. Each learner creates a plan with clear ways and timelines of how and when they will invest in the stock exchange business.
Links to other subjects: Economics				
Assessment criteria: Ability to create plans on how they will invest in financial markets.				
Resources/Materials: Resourceful person, audio visual, reference books, internet, video-clips				

TOPIC AREA: Business operations management			SUB-TOPIC AREA: Accounting and inventory Management	
S.6: Entrepreneurship		UNIT 7: Stock control		No. of periods: 10
Key Unit Competence: To be able to properly handle stock for the business				
Learning Objectives			Content	Learning Activities
Knowledge and understanding	Skills	Attitudes and values		
Explain the concept of stock, inventory and stock management	Distinguish between stock, inventory, stock management Interpret information from stock management documents Accurately prepare and complete stock records and documents	Appreciate the need for inventory management in business Recognize the use of stock documents	Meaning of stock, stock management and inventory Necessary documents for stock management – Receipt note, – Material requisition note, – Return-outward note, – Return-inward note, – Stock sheet (Inventory form) Inventory management systems: – Perpetual inventory system, and	Team Activity: students in manageable teams analyze the movement of different items used at school i.e.: supplies, school materials and food, etc. They discuss how they are managed, and the likely documents used to manage school items, supplies and property. From the presentations let them define inventory, stock, and management of inventory. Project Activity: Teams design stock documents that will be used for their student business club activities. Role play Activity: In teams, students role-play a situation where they have to use perpetual or periodic inventory methods.
Describe the documents used in stock management				

Explain the methods of stock valuation	Evaluate the use of perpetual and periodic inventory systems in each accounting period Apply FIFO, LIFO, and WAC methods in stock valuation	– Periodic inventory system Inventory valuation methods: – LIFO (Last In, First Out), – FIFO (First in, First Out), – Weighted Average Cost (WAC)	Case study: Create a case study that involves the use of FIFO, LIFO, WAC and have teams present the role of the given evaluation stock management methods and how they will be used while handling business club inventory. Project Activity: Each student creates 3 stock management documents for the business they tend to start (refer to the business ideas developed from senior 4).
Links to other subjects: Economics			
Assessment criteria: Ability to apply suitable inventory valuation methods (e.g., FIFO, LIFO, or Weighted Average) to determine cost of goods sold and closing stock.			
Resources/Materials: Research, internet, field visits, application exercises, sample stock management documents			

TOPIC AREA: Work environment			SUB-TOPIC AREA: Work Readiness	
S.6: Entrepreneurship		UNIT 8: Work behaviour, safety and health		No. of periods: 13
Key Unit Competence: To be able to apply standard health and safety practices and regulations in the workplace.				
Learning Objectives			Content	Learning Activities
Knowledge and understanding	Skills	Attitudes and values		
Describe the importance of good personal care and healthy habits at work	Handle unsafe situations that could harm people while on the job	Promote healthy habits in daily life	Meaning of behavior, work safety and health Appropriate workplace behaviors and attitudes Safety and health practices at work Healthy Habits: – Get enough rest – Good nutrition – Plenty of exercise, etc.	In manageable teams, students discuss, and share assigned health habits statements on “ Habits for Good Health ” using questions. • What do you think this statement means? Give several examples that will help explain this health habit • Why is this health habit important? • How is this health habit important for the business club? Skills lab: Team 1: Germs be gone! (Personal hygiene practices); Team 2: Let’s eat! (Food sanitation practices); Team 3: Water and waste! (Clean water and toilet facilities), Team 4: hygiene in our
Identify important health practices in the workplace	Practice ways to prevent accidents and getting sick at work.	Respond appropriately if there is a safety hazard, an accident or an emergence at work and in daily life		
Explain how to prevent the spread of illness and contamination at work	Practice healthy habits in life and workplace			

Explain why certain situations or substances are hazardous	Assess the various situations that might be hazardous in a workplace.	Show concern for the hazards in the workplace.	Healthy hygiene and sanitation practices – Wash hand before preparing and eating food – Wash dishes and store food – Protect water sources, etc. Hazards in the workplace and ways to make work safer Hazards: – Safety hazards – Chemical hazards – Biological hazards, etc. Ways to make work safer: – Remove hazards – Improve work policies and procedures – Use protective clothing and equipment	business club: Team 5: Safety measures in our business club: Students in their teams discuss the information provided and then; • Identify the health habits related to their assigned phrases • Discuss what they will do to promote safety and health measures for the given phrase. From the discussions on the topics/phrases above/ each group creates appropriate information and materials that will be used to promote safety and health measures in the school business club. Group work: -Teams list places that they have or would like to work from (construction sites, farms, stores, restaurants, offices, etc.), identify possible hazards and classify them as Safety, Chemical, Biological, or other Health hazards. Discuss how each hazard could harm them if not dealt with. Skills Lab: -Teams discuss different pictures of work scenes "Hazard
Identify ways of controlling hazards and staying safe	Examine the ways of making work safer.			
Outline the ways of responding to emergencies at workplace.	Create precautional ways of responding to emergencies at workplace	Deal with emergencies in life and workplace		

			Emergencies at Work Responding to emergencies and staying healthy at work - What to do in case of fire - Chemical spill - Earthquake - Keeping safe at night - Hygiene practices at work	Scenes and Solutions" and find as many hazards as they can. Teams share how the hazards identified in activity above can be reduced or eliminated. Game: -Teams play the "Disaster Blaster Game" to understand Responding to emergencies and staying healthy at work. Discuss responding to emergencies by using the questions: - How do you feel about dealing with possible emergencies at work? - Have you ever had to deal with an emergency before? - With information learnt through the game, do you feel better able to handle an emergency? Project Activity: Each student creates a safety tool that shows how they deal with hazards in their communities
Links to other subjects: Biology, Chemistry				
Assessment criteria: Ability to create precaution and safety measures that can be applied by the school/ community.				
Resources/Materials: Work readiness training program manual, Text books, photographs and pictures

5. APPENDIX

Subjects and weekly time allocation for Advanced level

In the Advanced Level, Entrepreneurship is compulsory for all combinations, this subject is allocated 3 periods per week; each period takes forty minutes i.e. Entrepreneurship will be allocated two hundred and forty minutes per week.

TIME ALLOCATION MATHEMATICS & SCIENCES STREAM 1

Subjects		Number of periods per week
Major Core subjects		
1	Mathematics	7
2	Physics	7
3	Chemistry	7
4	Biology	7
Minor Core subjects		
5	English	3
6	French	3
7	Kinyarwanda	3
General subjects		
8	Entrepreneurship	3
9	General and Religious studies	3
10	ICT	3

11	PES	2
12	Co-curricular (to reinforce skills development)	5
	CPD	2
	Total	53

TIME ALLOCATION MATHEMATICS & SCIENCES STREAM 2

	Subjects	Number of periods per week
Major Core subjects		
1	Mathematics	7
2	Physics	7
3	Chemistry	7
4	Biology	7
Minor Core subjects		
5	English	3
6	French	3
7	Kinyarwanda	3
General subjects		
8	Entrepreneurship	3
9	General and Religious studies	3
10	ICT	3

11	PES	2
12	Co-curricular (to reinforce skills development)	5
	CPD	2
	Total	53

TIME ALLOCATION ARTS & HUMANITIES PATHWAY

	Subjects	Number of periods per week
Major Core subjects		
1	History	7
2	Literature in English	7
3	Psychology	7
4	Geography	7
Minor Subjects		
5	Basic Mathematics	3
6	French	3
7	Kinyarwanda	3
General Subjects		
8	Entrepreneurship	3
9	General studies	3
10	ICT	3

11	PES	2
12	Co-curricular (to reinforce skills development)	5
	CPD	2
	Total	53
