FOREWORD

The Rwanda Basic Education Board (REB) is honoured to present the second edition of syllabus of the upper secondary schools Physical Education and Sports (from S4 to S6) in general education. This syllabus serves as an official guide to competence-based teaching and learning, providing coherence and consistency in the delivery of quality basic education across the country. It was developed through the collective expertise of subject specialists, educators and curriculum developers. It stands as a key resource in advancing the Competence-Based Curriculum (CBC) and reflects Rwanda's continued commitment to nurturing knowledge and understanding, skills, values and positive attitudes among students.

Quality Basic Education is the foundation for Rwanda's sustainable development and prosperity. In line with the country's education philosophy, this Physical Education and Sports syllabus emphasizes critical thinking, creativity, inclusiveness and holistic student development. It seeks to empower young people with the competences necessary to achieve their full potential, equipping them with relevant knowledge, practical skills and the right attitudes and values to integrate effectively into society and seize employment opportunities in a competitive world.

Anchored in Rwanda Vision 2050 and the National Strategy for Transformation (NST2), this syllabus supports the nation's goal of building a knowledge-based economy driven by innovation, resilience and global competitiveness. It prioritizes learner-centred pedagogy, active learning and the practical application of knowledge to prepare students not only for academic success but also to become responsible, ethical and productive citizens capable of contributing to Rwanda's continued transformation.

This syllabus reflects our determination to equip students with 21st century skills, foster innovation and instil values of integrity, social responsibility and lifelong learning. Its success depends largely on the dedication and professionalism of teachers and school leaders. We therefore call upon all educators to embrace the approaches, methodologies and assessment strategies outlined herein with commitment and passion, transforming classrooms into dynamic spaces of curiosity, creativity and inspiration.

On behalf of REB, I extend my heartfelt appreciation to all who contributed to the development of this syllabus. Your expertise and dedication have been instrumental in shaping a curriculum that responds to the needs of our students and supports Rwanda's National aspirations. Together, we can ensure that education continues to be a powerful driver of our nation's development and prosperity.

Dr. MBARUSHIMANA Nelson

Director General, REB.

ACKNOWLEDGEMENT

The development of this syllabus of Physical Education and Sports for upper secondary has been a collective effort that reflects the dedication, expertise and commitment of many stakeholders. On behalf of the Curriculum, Teaching and Learning Resources Department of the Rwanda Basic Education Board (REB), I wish to express my deepest appreciation to all who contributed to the successful preparation of this upper secondary schools Physical Education and Sports syllabus (From S4 to S6) in general education.

Special thanks go to the subject experts, curriculum developers, teachers and education partners whose insights, feedback and professional contributions have been invaluable in shaping this Physical Education and Sports syllabus. Your collaboration has ensured that the Physical Education and Sports syllabus is not only aligned with Rwanda's Competence-Based Curriculum but is also responsive to the aspirations of Vision 2050 and the National Strategy for Transformation (NST2).

We also acknowledge the invaluable support of development partners and education stakeholders who have consistently provided technical assistance in curriculum adaptation. Your partnership has greatly contributed to strengthening the quality of Rwanda's education system.

Finally, we call upon teachers, school leaders and all education practitioners to use this Physical Education and Sports syllabus with commitment and professionalism, ensuring that in Physical Education and Sports, vibrant learning environments help students to develop physical skills, teamwork, discipline and positive attitudes while encouraging healthy and active lifestyles. Through your dedication, this Physical Education and Sports syllabus will fulfill its purpose of empowering students to realize their full potential and contribute meaningfully to Rwanda's sustainable development.

MURUNGI Joan

Head of Curriculum, Teaching and Learning Resources Department
Rwanda Basic Education Board (REB).

1. GENERAL INTRODUCTION

1.1. Background to the syllabus adaptation

The adaptation of the Physical Education and Sports (PES) syllabus for upper secondary reflects Rwanda's ongoing commitment to strengthening the Competence-Based Curriculum (CBC) which was initiated in 2015. Continuous feedback from teachers, school leaders and education partners highlighted the need for improvements in content delivery, time allocation and better responsiveness to the diverse needs of students.

This second edition incorporates the Ministerial directive to harmonize school hours to five per day in lower primary schools and 33 weeks of learning annually and ensures greater coherence, inclusiveness and alignment with national priorities such as *Vision 2050* and the *National Strategy for Transformation (NST2)* which emphasize a knowledge-based economy, responsible citizenship and sustainable development.

Physical Education and Sports (PES) integrates social, cultural, civic and even spiritual dimensions of learning. It provides opportunities for students to interact with their environment, build positive human relationships and practice ethical values such as fairness, respect and teamwork. Physical Education and Sports (PES) reflects Rwanda's cultural diversity through traditional games, dances and community-based physical activities while also engaging with the evolving global context of modern sports and physical well-being.

Through this subject, students acquire knowledge and understanding, skills, attitudes and values that prepare them to face real-life challenges such as maintaining good health, preventing lifestyle diseases, promoting peace and cooperation through sports and demonstrating discipline and responsibility. Ultimately, Physical Education and Sports (PES) equips students to make sound judgments, respect diversity and grow into responsible, productive and active citizens who contribute positively to the society.

2. TEACHING AND LEARNING PHYSICAL EDUCATION AND SPORTS

2.1. Rationale of teaching and learning Physical Education and Sports

Physical Education and Sports (PES) is an essential component of the Competence-Based Curriculum because it promotes the holistic development of students (physically, mentally, socially and emotionally). The subject goes beyond physical activity to instil lifelong values, attitudes and competences that prepare students for healthy, productive and responsible lives.

- **Promotion of physical fitness and health:** Physical Education and Sports (PES) enables students to develop strength, flexibility, endurance and coordination. It fosters healthy lifestyle habits that prevent Non-Communicable Diseases (NCDs) and reduce sedentary behaviours.
- **Cognitive development and motor skills:** Through games, exercises and exercises, students improve motor control, body awareness and problem-solving skills. These activities enhance focus, memory and decision-making, linking movement to brain development.
- **Social and emotional growth:** Physical Education and Sports (PES) encourages teamwork, cooperation, fair play and respect for others. It teaches conflict resolution, self-discipline, resilience and emotional regulation and control through competitive and cooperative activities.
- **Cultural and civic values:** Students engage in traditional games and dances that preserve and celebrate Rwanda's cultural heritage. It nurtures civic responsibility, inclusion, gender equity and equality, peacebuilding and unity through shared participation in sports.
- **Spiritual and ethical development:** By emphasizing integrity, fairness and responsibility, Physical Education and Sports (PES) helps students to grow as ethical individuals. Sportsmanship and respect for rules foster moral character and accountability.
- **Preparation for real-life and career opportunities:** Students acquire life skills such as goal setting, perseverance, leadership and time management. Physical Education and Sports (PES) introduces students to potential careers in sports, physical health, recreation, coaching and community service.

- **Contribution to sustainable development:** By promoting health, social cohesion, inclusion and peaceful coexistence, Physical Education and Sports (PES) contributes to Rwanda's vision of producing responsible, innovative and patriotic citizens.

2.1.1. Physical Education and Sports and society

Physical Education and Sports is very important in upper secondary schools. It helps students to stay healthy and fit. Regular exercise helps students to prevent heart diseases, obesity and other lifestyle-related health issues. Increasing the duration or frequency of physical activity enhances health benefits. Physical Education and Sports fosters social cohesion, conflict resolution and peaceful interaction through teamwork and shared participation. From an economic view, investing in Physical Education and Sports can lower health costs by preventing illness and helps students to stay productive. Healthy students go to school more and do better, which helps them to get good jobs in the future.

Physical Education and Sports helps teachers to identify students with special sports talents. These talents can be developed to help students to grow their talents and maybe become professional athletes which can also help the National economy to grow and bring pride to the country.

In the class through practical activities, students develop skills and confidence in many activities. They learn to plan, do and check their actions. They also learn to be creative, work alone or in teams and solve problems.

2.1.2. Physical Education and Sports and the student

- Physical Education and Sports helps students to build physical skills and confidence. They learn to use the skills in many physical activities, sports and games. Physical Education and Sports teaches students how their body functions and supports their physical development.
- Physical Education and Sports also helps students to develop good personal and social skills like self-esteem, fair play, accepting winning and losing and working well with others. Through physical activities, students discover their talents, strengths and what they enjoy. This helps teachers to support talented students to improve and possibly become best athletes.

- Students also learn how to stay active and healthy for life. In Physical Education and Sports lesson, the focus is often on improving yourself, taking part and cooperating not just on winning or losing.

2.1.3. Physical Education and Sports and other subjects

Physical Education and Sports is strongly connected to other subjects in the upper secondary schools by helping students to apply academic knowledge in practical ways.

- In Mathematics, students use counting, measuring and calculating to record scores, measure distances and understand angles during athletic and game activities.
- English enhance communication, teamwork and literacy as students read rules of the game, give instructions and write reflections on sports experiences.
- Through Science, especially Biology and Physics, students explore how the body functions during physical activity. They gain an understanding of movement, force, balance and energy as they engage in physical and sports exercises.
- Physical Education and Sports (PES) also links to History and Citizenship by promoting Rwandan traditional games and dances (Imikino n'imbyino gakondo), unity and cultural identity, while in General and Religious Studies reinforces values such as respect, honesty, fairness and inclusion.
- Physical Education and Sports helps students to build skills like teamwork, discipline and leadership which are useful for business. They also create interest in jobs like coaching and sports training. School sports activities can lead to small business opportunities such as selling sports equipment or organizing events. This shows how Physical Education and Sports (PES) supports business and helps the economy to grow.
- Lastly, in Geography enhances students' understanding of how physical environments such as altitude, terrain and climate impact Athletic performance. It also encourages environmental awareness through school and community initiatives.

2.2. Competences

A competence is the ability to use an appropriate combination of knowledge and understanding, skills, attitudes and values to accomplish a task successfully. In this syllabus, competences reflect a holistic blend of these elements, enabling students to apply them confidently and appropriately in diverse real-life situations.

By acquiring these competences, students are better to face challenges, make informed decisions, act responsibly and contribute positively as active members of society. The competences are embedded in the broad subject competences, yearly objectives and unit-specific learning competences. Both generic and basic competences must be emphasized and consistently reflected in the teaching and learning process.

The teacher is encouraged to design learning experiences that engage students in meaningful tasks, allowing them to practice and demonstrate competences both during and at the end of the learning process.

2.2.1. Generic competences

- **Critical thinking and problem-solving:** In Physical Education and Sports (PES), students are constantly required to make quick decisions during games (e.g.: choosing the best pass in Football, positioning in Handball or deciding a strategy in Athletics). They also analyse their own performance and that of peers, learning how to improve individually and as a team.
- **Creativity and innovation:** Sports and physical activities encourage students to use imagination and creativity to invent new movements, adapt traditional games or create dance and exercise routines. Innovation in tactics, strategies and team formations enables students to apply their knowledge in dynamic and engaging ways, enhancing both their understanding and performance in sports.
- **Research:** Students in Physical Education and Sports (PES) can investigate traditional games and traditional dances, nutrition for athletes or modern training techniques. They learn to collect, interpret and apply information to improve health, performance and ethical decision-making in sports.

- **Communication in the official language:** Through team games and group discussions, students practice giving instructions, offering encouragement and expressing strategies clearly. They develop confidence in speaking and writing about sports rules, health topics and cultural practices which enhances their communication skills in real-life contexts.
- **Cooperation, interpersonal management and life skills:** Sports naturally require teamwork, fair play, empathy and respect for diversity. Students acquire values of responsibility, discipline, leadership and participation in activities such as environmental protection (e.g.: keeping playgrounds clean), promoting health (e.g.: hygiene and regular doing of physical exercises) and serving the community through sports.
- **Lifelong learning:** Physical Education and Sports (PES) instils the habit of regular exercise and caring for one's physical and mental well-being. Students develop adaptability by linking sports knowledge to daily life, encouraging them to stay physically active, healthy and socially engaged throughout their lives.

2.2.2. Physical Education and Sports broad competences

At the end of the upper secondary schools level, a student should be able to:

- Develop physical, social, emotional and intellectual abilities through active participation in various physical and sporting activities.
- Demonstrate personal competence in a range of individual and team sports, applying appropriate skills, tactics and strategies.
- Develop and apply a variety of movement skills, including running, jumping, throwing and Gymnastic movements across different contexts.
- Demonstrate understanding and practice of fair play, teamwork and sportsmanship during participation and competition.
- Show appreciation for movement and the use of the body as means of expression, creativity and communication.

- Interact and cooperate respectfully and sensitively with others, regardless of gender, cultural or social background and including students with special needs.
- Participate actively in Rwandan traditional games (Imikino gakondo) to promote cultural identity, cooperation and social values.
- Demonstrate knowledge and skills in maintaining personal fitness and understanding the importance of regular physical activity for lifelong health and well-being.
- Display positive attitudes and values towards physical activity.
- Promoting discipline, respect and the purposeful use of leisure time.

2.2.3. Physical Education and Sports and developing competences

The national policy documents based on national aspirations identify some '*Basic competences*' alongside the '*Generic competences*' that will develop higher order thinking skills and help students to learn subject content and promote application of acquired knowledge and skills.

In Physical Education and Sports, students develop the following specific competences:

- Deep knowledge in many areas.
- High-level thinking like problem-solving, creativity and critical thinking;
- Social and teamwork skills.
- Competitive skills.
- A strong cultural identity and sense of belonging.
- Qualifications and skills useful for employment.
- Adoption of healthy lifestyles and maintenance of physical fitness for overall well-being.

3. PEDAGOGICAL APPROACH

Physical Education and Sports is taught and learned by focusing on the students' competences shown through their ability to perform different physical and sports exercises. The syllabus provides the exercises and games students should do. It explains how exercises and games should be done and assessed.

The teacher prepares Physical Education and Sports lessons by explaining and demonstrating activities that help students to develop the right skills and competences in the subject. The shift to a Competence-Based Curriculum aims to make learning deeper, more enjoyable and meaningful.

3.1. Role of the teacher

In the Competence-Based Curriculum, the teacher is a guide who helps students to become active, confident and responsible. The teacher also acts as an organizer, advisor and problem solver.

The teacher's main roles in Physical Education and Sports lessons are:

- To support students to build self-confidence, teamwork and respect for rules through games and sports (promoting fair play).
- To understand students' abilities and choose physical activities (like running, jumping and playing games etc.) that suit their level and needs.
- To organize the class space, prepare equipment (e.g.: balls, cones, etc.) and show safety use of all sports materials.
- To provide a variety of activities that are fun, creative, active and challenging to help students to grow.
- To teach students how to stay safe during physical activities and respect differences among classmates.
- To assess progress regularly and give positive feedback to help students improving their performance.

- Include in Physical Education and Sports lessons cross-cutting issues such as Peace and Values Education, Gender Education, Comprehensive Sexuality Education, Genocide Studies, Environment and Sustainability, Financial Education, Inclusive Education, Standardization Culture, Impact of Social Media and Disaster Risk Reduction and Management in order to make learning more meaningful.

Through this approach, students not only get physically stronger but also become more disciplined, cooperative and aware of life skills needed in and out of school.

Physical Education and Sports teachers are requested to guide students while participating in Co-curricular or Extra-curricular activities related to sports organized by the school using available sports facilities (or free safe available space at school) and materials (standard or locally made). With the support of school administration, PES teacher should provide opportunities for students to explore other sports and games not included in this syllabus such as: **Swimming, Table Tennis, Chess, Cricket, Scrabble, Karate, Kung-fu, Badminton, Judo etc.**

3.2. Role of the student

In the Competence Based Curriculum (CBC), students are the main focus. The teacher is not the sole source of knowledge. Each student is unique and comes with his or her own set of skills and prior understanding. The syllabus includes practical activities that help students to learn by doing, exploring and actively participating.

In Physical Education and Sports, the teacher should make the lesson fun, safe and friendly. Activities should align with students' interests, prior knowledge and current abilities.

Students should take part in many physical activities like:

- Body movement and physical fitness (basic body movements, body coordination and balance, flexibility and endurance exercises, strength and relaxation exercises, warming-up and cooling-down activities, motor control and body posture);
- Individual sports (Gymnastics and Athletics);
- Team sports (Football, Netball, Goalball, Volleyball, Sitting Volleyball, Basketball, Handball and Rugby).

These activities help students to:

- Perform better in sports activities.
- Work as a team.
- Follow rules.
- Make good decisions during play.

Students are encouraged to participate in Co-curricular or Extra-curricular activities related to sports organized by the school. The school should allow students to explore other sports and game not included in this syllabus such as: **Swimming, Table Tennis, Chess, Cricket, Scrabble, Karate, Kung-fu, Badminton, Judo** etc.

3.3. Inclusive and Special Needs Education

All Rwandan students, including those with special needs have the right to education including Physical Education and Sports. Students may have different needs such as physical, emotional, sensory or intellectual challenges but they must still be included in Physical Education and Sports activities.

Every school must enrol these students and create strategies to help to them learn and participate in Physical Education and Sports. The teacher plays an important role by adapting games and exercises to meet the abilities and needs of each student.

In Physical Education and Sports students with special needs should be:

- Fully included in all activities by ensuring that they are never excluded or discriminated.
- Encouraged to enjoy movement, build self-confidence and improve their physical skills.
- Provided with appropriate support to participate safely and progress at their own level.

The teachers must:

- Encourage all students to take part in Physical Education and Sports.
- Modify tasks and equipment when needed (e.g.: lighter balls and slower pace).
- Ensure the lesson is inclusive, safe and fun for everyone.

Including students with special needs in Physical Education and Sports helps them to feel valued, respected and motivated, stay active and healthy just like everyone else. When they are welcomed into all activities, it fosters a sense of belonging and boosts their confidence. Inclusive practices ensure that every student, regardless of ability has the opportunity to participate, learn and grow in a supportive environment. This not only benefits the individual student but also enriches the entire class by promoting empathy, cooperation and mutual respect.

4. ASSESSMENT APPROACH

Assessment within the Competence-Based Curriculum(CBC) is a fundamental component of the teaching and learning process. It is designed to evaluate students' progress across knowledge, skills, attitudes and values while simultaneously supporting continuous learning and development. Unlike traditional models, Competence Based Curriculum (CBC) assessment emphasizes real-life problem-solving, requiring students to apply acquired competences to complex everyday situations.

Assessment involves the systematic collection and interpretation of evidence to evaluate student performance against established standards. Beyond measuring achievement, it serves as a tool for improving instruction and offers meaningful feedback to students, parents and educators. This process promotes accountability and supports informed educational decision-making.

4.1. Levels of assessment in Upper secondary Level across terms and national examinations

To provide a comprehensive picture of students achievement and development, assessment is conducted at multiple levels:

1. **Diagnostic:** Conducted before instruction to identify students' prior knowledge and skills; administered at the beginning of a unit or lesson to guide teaching.
2. **Formative or continuous:** Carried out during the learning process to track progress and provide feedback; implemented continuously through quizzes, projects, class activities and teacher observations.
3. **Summative assessment:**
 - **End Term I:** Administered after instruction to evaluate students' achievement of Term I content; conducted at the end of the first term as a school-based assessment.
 - **End Term II:** District-coordinated assessment designed to measure achievement of Term II content; developed by schools and quality-checked at district level.
 - **End Term III:** National assessment to evaluate mastery of the entire year's content; prepared, set and moderated by NESa at the end of the third term.

Average scores from school, district and comprehensive summative assessments will be weighted and included in the final national examination grading, initially contributing 10%, with the percentage gradually increasing as teachers gain experience and confidence in assessment practices.

4.1.1. Assessment of Physical Education and Sports

Assessment in Physical Education and Sports is used to check how well students are doing in both theory and practice. It helps the teacher to see how students are improving in their movement skills, teamwork, rules understanding and healthy habits.

Teachers assess students on both subject-specific and generic competences outlined in the syllabus, gaining a full picture of each student's progress. In Physical Education and Sports, observation is the most common and effective form of assessment. It involves monitoring students during physical and sports activities or realistic game situations providing accurate insights and feedback.

The Physical Education and Sports teacher observation focuses on:

- Student responses to tasks (exercises or game situation) and reflection questions.
- Participation individually, in groups or as a whole class.
- Interaction with peers during physical and sports activities.
- How well the student understands the activity while doing it.

The teachers must assess students fairly by using a variety of assessment tools such as checklists, scales or rubrics, skill tests or performance tests, fitness tests, self-assessment, practical projects or assignments, oral or written tests and portfolios based on clear criteria for each unit. The goal is to evaluate what each student can do, show and apply in realistic physical activities and sports.

Physical Education and Sports (PES) assessment includes:

- **Practical part:** Showing skills individual skills like passing the ball, shooting the ball, serving the ball, scoring the goal, shooting the ball into the basket, running (short and long distance), jumping (high and triple jump), throwing (shot put, javelin and discus), teamwork, fair play and proper use of equipment or game situation application. **The PES teacher should use assessment checklists and rubrics to assess every student's performance.**

- **Theoretical part:** Explaining the rules of games, body parts used in movement, safety and the importance of staying active in physical and sports activities. During theoretical assessment, oral questions or paper-based assessment can be used to evaluate the student's knowledge and understanding of Physical Education and **Sports (PES) concepts but the assessment should respect the weight of assessment as mentioned below.**

Category of assessment	Level of assessment	Weight	
Comprehensive assessment	School based assessment	Practice: 70%	Theory: 30%.

Physical Education and Sports should be assessed using both theory and practical methods. The pass mark is 50%.

4.2. Record keeping

This process involves collecting facts and evidence from assessment tools to evaluate a student's performance by comparing it to set criteria or standards. The data is collected usually in the form of scores and should be carefully recorded and stored in a portfolio. This information helps the teacher to guide corrective actions and adjust teaching strategies and provide feedback to students and their parents about progress toward achieving unit competences.

Proper record-keeping involves storing all assessment results clearly showing each student's strengths and weaknesses. These records help the teacher to plan targeted activities and share performance results with both students and parents.

Additionally, assessment records play an important role in talent detection and development by consistently monitoring students' abilities, the teacher can identify students who show exceptional skills in areas such as individual sports and team sports. Early detection of these talents allows the teacher and parents to nurture and support students' potential, guiding them toward further development opportunities in sports, academics or other co-curricular and extra-curricular activities.

4.3. Assessment criterion for Physical Education and Sports

Assessment in Physical Education and Sports is based on key unit and generic competences. These include how well a student:

- Understands instructions.
- Performs physical exercises or games.
- Demonstrates technical and tactical skills in different games.
- Shows movement and coordination skills.
- Solves problems related to games or exercises.

It also considers how the student:

- Relates with others and works as a team.
- Handles winning and losing.
- Manages and expresses emotions appropriately.
- Avoids injuries and accidents.
- Demonstrates commitment and willingness to participate.
- Wears appropriate sportswear for physical activities.
- Practices fair play and follow rules during activities.

4.4. Reporting to parents

In Physical Education and Sports, it is important to provide parents with clear reports about their children's performance. These reports should go beyond marks or grades and clearly indicate the level to which the student has achieved the intended competences. Reports should highlight both the student's strengths such as teamwork, discipline or technical skills and areas that need improvement such as coordination, endurance or rule comprehension.

In addition, reports should provide insights into talent detection by identifying students who demonstrate exceptional ability in specific sports or physical skills. This helps parents to recognize their children's potential early and collaborate with teachers, coaches and community programs to nurture it.

Such reports not only guide corrective measures where needed but also encourage students to remain motivated and engaged in regular physical activity and pursue personal growth. They foster a shared responsibility between school and home by ensuring that students' abilities are supported holistically for both academic achievement and long-term talent development in sports.

5. RESOURCES

5.1. Materials needed for implementation of this syllabus

A variety of materials are essential to facilitate teaching and learning processes in Physical Education and Sports.

These materials give students practical experience and encourage participation and help to build physical, social and mental skills. They include:

- **Textbooks and reference materials:** Teacher's guides, sports rules and regulations handbooks, coaching manual, health and fitness reference texts.
- **ICT tools, digital resources and visual aids:** Computers, projectors, videos and digital resources like fitness apps, Artificial Intelligence (AI), e-learning platforms or sport skill tutorials.
- **Classroom materials:** Chalkboards or whiteboards, flip charts, markers and stationery for lesson explanations, strategy drawing (e.g.: tactics in Football, Basketball, Handball etc.) and reflection activities.
- **Sports equipment and facilities:** Balls, nets, racquets, cones, mats, stopwatches, whistles, hurdles, locally made equipment (e.g.: balls from banana fibres, skipping ropes from sisal, etc.) and playgrounds or courts to practice a variety of sports.
- **Library and resource centre materials:** Access to books, magazines and journals on sports, fitness, health and biographies of athletes to inspire students.
- **Field visit resources:** Materials to support visits to sports clubs, gyms, stadia or community recreation centres.
- **Community and cultural resources:** Involvement of local coaches, referees, Physical Education and Sports (PES) specialists, traditional games and cultural dances and access to community playgrounds or national sports facilities.

- **Assessment tools:** Checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, journals or learning logs, practical projects or assignments, oral or written tests, video recording and portfolios. Those tools may be used for both formative and summative assessment of students' progress in physical fitness, teamwork and skill development.

5.2. Human resources

The successful implementation of this syllabus of Physical Education and Sports relies heavily on qualified, competent and motivated human resources.

The following are key personnel required:

- **The teacher:** Professional and well-trained Physical Education and Sports teachers with expertise in physical fitness, sports techniques, health education and inclusive pedagogical methods. Teachers should model discipline, teamwork, fair play and responsibility while applying effective assessment strategies to track students' progress in skills, attitudes and physical fitness.
- **Community resource persons:** Coaches, referees, sports officials, health professionals and athletes who can be invited as guest speakers, mentors or facilitators. They enrich learning by demonstrating practical skills, sharing real-life experiences and linking classroom knowledge to authentic sports practices and career pathways.
- **Parents and guardians:** Active partners in supporting students' participation in physical activities, encouraging healthy lifestyles at home and reinforcing values such as perseverance, cooperation and respect. Parents also play a role in monitoring students' well-being and motivating them to engage in physical exercises beyond the school environment.

Effective collaboration among these stakeholders fosters an enabling learning environment, equipping students not only with physical and cognitive competences but also with values of teamwork, sportsmanship, resilience and a lifelong commitment to health and fitness.

5.3. Skills required for the teacher of Physical Education and Sports

Effective teaching of Physical Education and Sports requires the teacher to possess a broad set of professional, pedagogical and interpersonal skills.

These competencies empower the teacher to deliver accurate subject content, promote positive values and attitudes and foster holistic student development in line with the Competence-Based Curriculum. The essential skills include:

Subject matter expertise

- Strong mastery of physical fitness, motor skills, sports techniques and tactics, health education and rules of various games to ensure accurate and comprehensive content delivery.
- Ability to connect Physical Education and Sports with other disciplines such as Science (human body, health, force, movement, speed etc.), Mathematics (measurement, timing etc.), History and Citizenship (traditional games and dances) linking classroom and field learning to real-life contexts.

Pedagogical and instructional skills

- Capacity to design and implement learner-centred approach, participatory and inclusive lessons using demonstrations, games, exercises and exercises, group activities and problem-solving tasks.
- Competence in integrating cross-cutting issues in Physical Education and Sports lesson.
- Creativity and innovation in developing and applying diverse teaching resources including standard sports materials, locally made sports equipment, digital resources (including Artificial Intelligence) and visual aids and community-based facilities.
- Ability to adapt instruction to students' developmental stages, ensuring participation, engagement and safety for all.

Assessment skills

- Proficiency in designing and applying formative and summative assessments aligned with Physical Education and Sports competences (Knowledge and understanding, skills, attitudes and values).
- Effective use of assessment tools used in assessing Physical Education and Sports such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.
- Skill in giving constructive feedback that motivates students to encourage improvement and fosters resilience.

Classroom and field management skills

- Ability to establish a safe, respectful and inclusive learning environment during both indoor and outdoor activities.
- Proficiency in organizing students, various sports equipment and space efficiently for group work, games and cooperative learning.
- Awareness of safety standards and first aid in managing risks and injuries during physical activities.

Communication and interpersonal skills

- Strong verbal and non-verbal communication to demonstrate physical movements clearly and provide effective instructions.
- Active listening and empathy to respond to students' needs, abilities and concerns.
- Collaboration with colleagues, parents, school leaders and community stakeholders to promote a culture of health, fitness and sportsmanship.

Guidance and counselling skills

- Ability to provide moral, emotional and motivational support to students, fostering confidence, teamwork and perseverance.
- Demonstrating fairness, inclusivity and genuine care for students' physical and emotional well-being.
- Supporting students in adopting healthy lifestyles and positive attitudes toward lifelong fitness.

Professional and ethical competence

- Commitment to continuous professional development through training, workshops and reflective practice in sports pedagogy.
- Integrity, impartiality and ethical conduct, serving as a role model in discipline, teamwork and fair play.
- Capacity to balance skill development with the cultivation of values such as respect, cooperation and sportsmanship.

Research and innovation skills

- Engagement in reflective practice and classroom-based research to improve instruction and adapt to students' needs.
- Use of innovative teaching methods and digital resources (videos, computer, projector, digital apps, performance tracking tools, Artificial Intelligence, etc.) to enhance how Physical Education and Sports is prepared and delivered.
- Ability to contextualize global knowledge of sports, games and physical fitness within Rwanda's socio-cultural environment and available resources.

6. SYLLABUS UNITS

6.1. Presentation of the structure of the syllabus units

The Physical Education and Sports syllabus is designed as a single, integrated syllabus implemented uniformly across all grades. Its structure follows a logical progression that ensures clarity, consistency and alignment with the Competence-Based Curriculum approaches and principles.

At each grade level, the syllabus is organized into topic areas which are further broken down into sub-topic areas. Each sub-topic area is composed of units and every unit is characterized by the following features:

- **Alignment with lessons:** Each unit corresponds to a specified number of lessons by ensuring effective time allocation and instructional planning.
- **Key Unit Competence:** Every unit is built around a Key Unit Competence that guides all teaching and learning activities. This competence represents the overall learning goal to be achieved by both the teacher and students.
- **Learning objectives:** Each Key Unit Competence is translated into specific learning objectives, categorized as follows:
 - **Type I (Knowledge and understanding):** Focused on foundational knowledge and comprehension, often referred to as Lower Order Thinking Skills (LOTS).
 - **Type II and Type III (Skills, Attitudes and values):** Aimed at developing practical skills, critical thinking, ethical values and positive attitudes. These objectives, known as Higher Order Thinking Skills (HOTS) and form the core focus of the adapted Competence-Based Curriculum.
- **Content specification:** Each unit outlines the scope of content to be taught and learned by ensuring that teachers and students work within the boundaries set by the stated learning objectives.

- **Link with other subjects:** Physical Education and Sports (PES) connects with various subjects to enhance holistic learning. It links with Mathematics through measuring, counting and calculating in sports activities; with English through communication and writing; and with Science by exploring body systems, movement and energy. Physical Education and Sports (PES) also promotes cultural identity and moral values through History and Citizenship and General and Religious Studies, while Entrepreneurship and Information and Communication Technology (ICT) foster creativity, innovation and healthy living. Additionally, Geography and Environment helps students to understand how the physical environment influences performance and encourages environmental responsibility through sports.
- **Assessment criteria:** Focus on participation, technical and tactical skills, understanding and application of rules of the game, teamwork, progress and talent. Both formative and summative assessment are used.
- **Teaching and learning resources:** Include standard sports materials, locally made sports materials, visual aids, digital resources (including Artificial Intelligence) and community experts.

6.2. Physical Education and Sports

The Physical Education and Sports subject in upper secondary education consists of thirty-four units: Senior Four consists of 12 units, Senior Five consists of 10 units and Senior Six consists of 12 units. At each level, the syllabus begins by outlining the key competences intended for that class.

SENIOR FOUR

6.3. Syllabus for Senior Four/S4

6.3.1 General competences of the subject at the end of Senior Four/S4

- Develop movement skills to improve fitness levels.
- Practice techniques of Rwandan traditional games and dances.
- Develop techniques of floor gymnastics.
- Develop techniques and tactics of running skills.
- Develop Football technical skills.
- Develop Volleyball technical skills.
- Develop Basketball technical skills.
- Develop Handball technical skills.
- Perform basic skills of Rugby game.
- Develop Netball technical skills.
- Develop Goalball technical skills.
- Develop Sitting Volleyball technical skills.

6.3.2 Table units for Senior Four/S4

Topic area: Health, hygiene and safety			Sub-topic area: Importance of physical exercise for good health	
S4: Physical Education and Sports		Unit 1: Physical exercises and health		No. of periods: 4
Key Unit Competence: Develop movement skills to improve fitness levels.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify basic safety rules and hygiene practices required during physical and sports activities. - Describe the physical, mental and social health benefits resulting from regular participation in physical and sports activities. - Explain the importance of maintaining personal hygiene	- Demonstrate correct use of safely equipment and appropriate sportswear during physical and sports activities. - Demonstrate appropriate physical exercises that promote cardiovascular fitness, muscular	- Appreciate the importance of maintaining safety and hygiene as a shared responsibility during physical and sports activities. - Develop a positive attitude toward respecting safety rules, using protective gear	- Safety and hygiene during physical and sports exercises. - Effects of physical and sports activities to health.	- In groups, students act out a hygiene check. They find problems like dirty tools or no handwashing place and suggest how to fix them. - Students take part in exercises in which they move through different activities stations that focus on endurance and teamwork,

and following safety guidelines for hygiene before, during and after doing physical exercises.	strength and mental well-being. • Apply hygiene practices such as handwashing, sanitizing shared equipment and maintaining personal cleanliness before and after exercise.	and promoting cleanliness in group settings. • Value the role of personal and collective hygiene in fostering a healthy, respectful and prevention of injuries in sports activities.		flexibility , relaxation , coordination and social skills. Afterwards, they reflect on how physical and sports activities affect their health.
--	---	---	--	---

Link to other subjects

Biology: Students demonstrate understanding of how physical activities benefiting the body systems such as the muscular, respiratory and cardiovascular systems.

General and Religious Studies: Students promote holistic health awareness including personal well-being, hygiene and lifestyle choices.

Mathematics: Students use tracking fitness progress, calculating Body Mass Index (BMI), heart rate zones and interpreting performance data.

ICT (Information and Communication Technology): Students can use digital tools to learn various physical and sports exercises, recording and analysing their performance.

Assessment criteria

The teacher assesses students on their understanding and practice of safety and hygiene during physical and sports exercises as well as their knowledge of the effects of physical and sports activities to health. Students are also assessed on their ability to apply safe practices and how they demonstrate positive attitudes toward health and well-being. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Playground or open and safe space available at school, whistle, cones, stop watch, ropes, first aid kit (basic supplies like bandages, antiseptic and gloves) and mat.
- **Locally available sports materials:** Open and safe field or playground available at school, water containers for handwashing demonstrations, soap and hand sanitizer, clean towels or cloths, posters or charts made from manila paper showing hygiene rules, sports shoes and sports uniform, ropes for skipping or agility exercises, stones or bricks for obstacle courses or balance training, wooden sticks or poles for stretching and posture exercises, chairs or benches for step-ups and flexibility routines, locally made balls (e.g.: from banana fibres or rubber), chalk for marking movement patterns or zones on the ground, water-filled jerry cans or sandbags, mats or woven rugs, drums.
- **ICT tools, digital resources and visual aids:** ICT can enhance the teaching of safety and hygiene during physical and sports exercises, as well as the effects of physical and sports activities on health by using videos, animations and simulations to demonstrate proper practices, prevention of injuries and illustrate how regular exercise contributes to overall well-being and fitness.

Topic area: Games and Sports			Sub-topic area: Traditional games	
S4: Physical Education and Sports		Unit 2: Rwandan traditional games	No. of periods: 3	
Key Unit Competence: Practice techniques of Rwandan traditional games and dances.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify common Rwandan traditional games and dances. - Explain cultural significance and occasions in which Rwanda traditional games and dances are performed. - Explain the basic techniques, movements involved in selected Rwandan traditional games and dances. - Highlight the role of Rwandan Traditional games and dances in promoting physical fitness and cultural identity.	- Appreciate the cultural significance of Rwandan traditional games and dances as means of preserving heritage and promoting unity within the community. - Demonstrate basic techniques used to perform selected	Develop respect and pride in practicing traditional movement techniques, recognizing their role in fostering identity, discipline and social cohesion.	Practice tradi- tional games and dances	- Individually or in teams, students perform traditional games movements (referring to Rwandan Traditional games from lower secondary). - Individually or in groups students perform Intore footwork. They practice also movement

	Rwandan traditional games. • Demonstrate fundamental steps and body movements of Rwandan traditional dances with appropriate posture, timing and cultural expression.			patterns, rhythmic timing and team coordination. • Students perform Umushayayo and Ikinimba dance. They practice posture, timing and expression.
--	--	--	--	---

Link to other subjects

- **General and Religious Studies:** Students promote cultural awareness, national identity and appreciation of traditional practices.
- **History and Citizenship:** Provides context on the origins, evolution and cultural significance of Rwandan traditional games and dances.
- **Kinyarwanda:** Encourages use of local language in naming, describing and narrating traditional activities.
- **ICT (Information and Communication Technology):** Students can use digital tools to analyse Rwandan traditional games and dances performance, track progress or study professional dancing techniques.

Assessment criteria

- The teacher assesses students on their ability to practice traditional games and dances correctly, how they demonstrate understanding of the rules, movements and cultural significance of Rwandan traditional games and dances. Students are also assessed on their participation, teamwork, cooperation and respect for cultural traditions. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning material

- **Standard sports materials:** Whistle, cones or markers (for setting play areas), chalkboard or chart with rules of the games, bibs, watch or stopwatch, first aid kit (for safety during physical activities).
- **Locally available sports materials:** Open space (a clean, safe area for movement and group practice), ropes or chalk (to mark boundaries), locally made balls, wooden sticks or poles, whistles or drums (to signal game starts, stops or rhythm cues), simple costumes or coloured sashes (to identify teams or roles), traditional instruments (to provide authentic rhythm and timing), audio recordings of traditional music (for practice and performance), visual aids (posters or drawings showing dance poses and sequences), traditional sportswear (such as umushanana, headbands to enhance cultural expression), mirrors or video recording tools (if available to help students observe and improve their posture and technique).
- **ICT tools, digital resources and visual aids:** The teacher can teach using videos or pictures demonstrating movements, rhythms and techniques of dances and games; projector or smart screens showing live or recorded performances from cultural festivals or community experts; traditional music or drumming patterns; digital journals and mobile apps to reinforce traditional practices.

Topic area: Gymnastics and movements			Sub-topic area: Physical Fitness	
S4: Physical Education and Sports		Unit 3: Floor Gymnastics exercises		No. of periods: 5
Key Unit Competence: Develop techniques of floor Gymnastics.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify the foundational techniques and support mechanisms necessary for safely executing a headstand. - Describe the correct body alignment and safety precautions involved in performing forward and backward rolls.	- Perfectly perform forward and backward rolls. - Correctly perform on the ground hand stands exercises. - Perform head stands exercises correctly on the ground.	- Appreciate the importance of persistence and self-discipline in mastering rolling techniques safely and effectively. - Demonstrate confidence and a positive mind-set while practicing challenging balance skills like handstands.	- Refine forward and backward roll exercises. - Refine hand stand exercises. - Head stand exercises.	- Individually, students perform correctly forward and backward roll exercises on the ground. - In groups, students help each other to perform correctly hand stand exercises on the ground. - In groups, students help each other to perform correctly head stand exercises on the ground.

• Explain the key muscle groups engaged and the steps required to achieve balance in a handstand and headstand.		• Value patience, body awareness and mutual support when learning and practicing headstands, handstands, forward and backward rolls.		• Using a wall or another safe supportive material, individually or in pairs, students perform head stand exercises.
---	--	--	--	--

Link to other subjects

- **Biology:** Students understand about human anatomy, muscle function and body systems helps students to grasp how movements affect the body and how to prevent injuries.
- **ICT (Information and Communication Technology):** Students can use digital tools (computer, tablet, projectors, internet connection etc.) to watch different Gymnastics exercises to improve their performance.

Assessment criteria

- The teacher assesses students on their ability to perform and refine forward and backward rolls, handstands and headstands with correct technique and body control. Students are also assessed on safety, effort and consistency during practice. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Playground, gymnasium, whistle, videos related to gymnastics exercises, mats, Gymnastics mattresses (soft foam), cones and first aid kit.
- **Locally available sports materials:** Locally made gym mats using foam and canvas or recycled materials (e.g.: old mattresses covered with tarpaulin or fabric), grass fields filled with remainders from beans for safe landings during rolls and inverted positions, classroom or school compound walls for practicing handstands and headstands with support, wooden benches or planks for balance and body alignment exercises, posters or charts showing correct body positions for: rolls, handstands and headstands, hand-drawn visuals for classroom use, chalk or tape to mark body alignment lines on the floor, cushions or folded blankets for extra padding during headstands.
- **ICT tools, digital resources and visual aids:** The teacher can teach Gymnastics by showing video demonstrations of techniques and by using interactive presentations and animations related to Gymnastics.

Topic area: Games and Sports		Sub-topic area: Individual sports		
S4: Physical Education and Sports		Unit 4: Athletics		No. of periods: 9
Key Unit Competence: Develop techniques and tactics of running skills.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Describe the baton exchange techniques used in relay races. - Describe how pacing and breathing techniques affect performance in endurance races. - Explain the correct body posture and stride pattern for clearing hurdles efficiently. - Explain the importance of warming up before performing Athletics exercises.	- Perform techniques and tactics of relays and hurdles races. - Perform hurdle exercises focusing on lead leg and trail leg. - Practice endurance training. - Apply resistance training techniques to improve sprint power and acceleration	- Demonstrate teamwork and mutual trust by cooperating effectively with peers during baton exchanges. - Show resilience and self-confidence by attempting to overcome hurdles despite challenges or initial failure. - Exhibit determination and discipline	- Relays Running - Hurdles running. - Middle distance running.	- In teams, students run and transmit baton in relay exercises (4×100m and 4×400m). - Individually, in pairs or groups students perform sprint hurdles exercise on the Athletics track. - Individually, in pairs or groups students perform middle distance running on the Athletics track.

	Analyse pacing strategies and breathing techniques used in long-distance running.	by committing to resistance training with consistent effort. - Display patience and mental strength by maintaining focus and motivation throughout long-distance runs. - Practice fair play and respect for others.	- Long distance running. - Perform various Athletics exercises.	- Individually, in pairs or groups students perform endurance races on the road or hills. - Individually or in groups, students perform various Athletics exercises on appropriate open safe space.
--	---	---	--	--

Link to other subjects

- Biology:** Students understand body systems (muscular, respiratory and circulatory) that influence Athletic performance.
- General and Religious Studies:** Students promote teamwork, discipline and communication essential for relay races and group training.
- Mathematics:** Useful for measuring distances, calculating times and analysing performance data.
- ICT (Information and Communication Technology):** Students can use digital to collect data and analyse their performance during Athletics activities and track their progress or study for advanced Athletics techniques.

Assessment criteria

- The teacher evaluates students' ability to demonstrate correct form and timing in baton exchange and hurdle clearance, apply tactical strategies (e.g.: lane discipline, rhythm) during races, execute exercises with proper posture, leg coordination and rhythm, maintain consistent pacing throughout the session. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Flat running surface (school field or track) baton, marking cones or chalk for exchange zones, stopwatch for timing, whistle for starting signals, adjustable hurdles, measuring tape for spacing hurdles correctly, safety mats or sand for landing zones, illustrated charts showing hurdle technique, water stations for hydration, fitness logbooks for tracking progress, videos related to racing technical skills, first aid kit, baton, decametre, starting block and sticks.
- **Locally available sports materials:** Stopwatch or phone timer, measuring tape, cones or markers, improvised adjustable hurdles using sticks, benches or PVC pipes, shot put balls (or safe alternatives), sand pit for long jump.
- **Digital resources and visual aids:** ICT can be used in Athletics teaching by showing video demonstrations of correct techniques for running, jumping and throwing, recording and analysing student performance and using interactive presentations and online tutorials to enhance learning process.

Topic area: Games and Sports		Sub-topic area: Team Sports		
S4: Physical Education and Sports		Unit 5: Football techniques		No. of periods: 9
Key Unit Competence: Develop Football technical skills				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify the key steps and body mechanics involved in accurate and powerful shooting. - State the purpose of the ball juggling and describe the basic technique using feet, thighs and head when juggling the ball. - Outline the fundamental responsibilities and techniques of a	- Accurately perform short, long and through passes using the inside and instep of the foot. - Maintain close control of the ball while dribbling at varying speeds. - Shoot the ball toward goal with power and accuracy using proper technique.	- Demonstrate teamwork and trust by consistently sharing the ball with teammates during play. - Show determination and focus while practicing the ball control under pressure or movement.	- Passing the ball. - Controlling the ball while running.	- In pair or groups, students perform exercises of passing the ball (short , long and through passes). - Individually, students perform exercises of controlling the ball using different body parts (feet, thigh and chest) while running.

goalkeeper, including positioning, catching and diving. - Describe the correct techniques and types of passes used in Football (e.g.: short , long , through passes). - Explain how to maintain the ball control while moving including the use of different body parts (feet, thighs and chest).	- Juggle the ball continuously using feet and thighs to improve touch and coordination. - Catch, block and dive to stop shots effectively using correct goalkeeping techniques.	- Show responsibility and courage in protecting the goal and supporting their team defensively. - Exhibit patience and persistence while improving their juggling skills through repeated practice. - Value fair play and self-confidence when attempting to score during competitive situations.	- Jug- gling the ball. - Shoot- ing the ball. - Goal- keeping exer- cises.	- Individually, students perform exercises of juggling the ball. - Individually, students perform exercises of shooting the ball (instep drive shot, chip shot, toe pint shot and volley shot). - Individually or in teams, students perform exercises of goalkeeping (positioning, catching and diving exercises).
---	--	---	--	---

Link to other subjects

- General and Religious Studies:** Students reinforce values like teamwork, discipline, leadership and fair play essential in Football game.
- Entrepreneurship:** Students explore sports-related careers (e.g.: coaching, sports management, fitness training, etc.).
- English :** Students enhance communication through reporting match events, writing reflections or analysing team strategies.

- **ICT (Information and Communication Technology):** Students can use digital tools to learn new skills or improve their performance.

Assessment criteria

- The teacher assesses students on their Football skills, including passing, ball control, shooting, juggling, defending and teamwork, focusing on technique, coordination, decision-making and leadership. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Footballs, cones and markers, goalposts and nets, training bibs or vests, agility equipment (ladders, hurdles and poles for footwork and speed exercises), whistle and stopwatch, mannequins or training dummies, rebounders or walls, goalkeeper gloves and protective gear, tactical boards or flipcharts and first aid kit.
- **Locally available sports materials:** Grass fields or open grounds for practice sessions, locally made Footballs (e.g.: banana fibre balls or recycled plastic balls), cones or markers (made from bottles, stones or sticks), goalposts (constructed from wood, bamboo or metal pipes), nets (woven from sisal or reused fishing nets), plastic bottles for dribbling exercises or obstacle courses, old tires for agility and footwork exercises, cardboard or paper for drawing tactical diagrams or player positions, used clothing or fabric strips for team identification (e.g.: bibs), sticks or chalk for marking boundaries or zones on the ground, stones or bricks for anchoring goals or marking corners.
- **ICT tools and digital resources and visual aids:** ICT can enhance the teaching of Football skills by using videos and animations to demonstrate how to perform correctly techniques such as dribbling, passing, shooting and tackling, juggling and goalkeeping and by analysing student performance through recorded and simulated game scenarios.

Topic area: Games and Sports			Sub-topic area: Team Sports	
S4: Physical Education and Sports		Unit 6: Volleyball techniques		No. of periods: 5
Key Unit Competence: Develop Volleyball technical skills				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify and demonstrate different types of services in Volleyball. - Identify the key principles of blocking in Volleyball game, including timing and hand positioning.	- Perform an underhand and overhand serve with correct technique and consistent accuracy. - Receive and pass the ball using proper forearm technique and body positioning during the play.	- Demonstrate confidence and responsibility when serving the ball, respecting the rules and encouraging fair play. - Show cooperation and mutual support during reception and passing. - Valuing teamwork and effective communication.	- Serving the ball. - Passing the ball. - Reception of the ball.	- Individually or in groups, students perform exercises of developing service skills. - Individually or in groups, students perform exercises of developing passing skills. - Individually or in groups, students perform exercises of developing receiving skills.

- Describe the basic techniques involved in serving the ball in Volleyball game. - Explain the correct body positioning and movement required for effective reception and passing in Volleyball game.	- Execute a two-handed block at the net with correct timing, footwork and hand placement. - Use different types of services during Volleyball game situation.	- Exhibit determination and respect for opponents while blocking the ball. - Promoting a positive and competitive spirit.	Blocking the ball.	- In groups, students practice blocking exercises. - Through an organized Volleyball game, students apply learned developed Volleyball technical skills in the real game.
--	--	--	--	--

Link to other subjects

- Physics:** Students explain concepts like force, motion, balance and projectile motion (e.g.: ball trajectory and jump mechanics).
- Mathematics:** Students analyse angles, calculating speed, distance and understanding scoring systems.
- English/language studies:** Students enhance communication skills which are vital for team coordination and leadership on the court.
- ICT (Information and Communication Technology):** Students can use Volleyball supports video analysis of performance, learning through Volleyball simulations and accessing online Volleyball training resources.

Assessment criteria

- The teacher evaluates students' ability to perform correct serving, passing, receiving and blocking techniques and how students coordinate with teammates and maintain proper body alignment and timing. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Footballs, cones and markers, goalposts and nets, training bibs or vests, agility equipment (ladders, hurdles and poles for footwork and speed exercises), whistle and stopwatch, mannequins or training dummies, rebounders or walls, goalkeeper gloves and protective gear, tactical boards or flipcharts and first aid kit.
- **Locally available sports materials:** Locally made Volleyballs (e.g.: banana fibres ball or recycled plastic balls), nets, cones and whistles (available at local sports shops or school supply centres), chalk or tape for marking court boundaries, posters or diagrams illustrating Volleyball court layout and player positions.
- **ICT tools, digital resources and visual aids:** The teacher can use videos and animations to demonstrate how to perform correctly techniques such as serving, passing, setting, attacking, blocking and digging, analysing student performance through recorded and simulated game scenarios.

Topic area: Games and Sports			Sub-topic area: Team Sports	
S4: Physical Education and Sports		Unit 7: Basketball techniques		No. of periods: 7
Key Unit Competence: Develop Basketball technical skills				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify and describe different types of Basketball shots (e.g. set shot, jump shot and lay-up) and understand the conditions under which each is most effective. - Describe the correct techniques for receiving and passing the ball including chest, bounce and overhead passes.	- Accurately receive and execute chest, bounce and overhead passes with proper technique during game situations. - Control the ball while dribbling at varying speeds and directions of using both hands to navigate around defenders.	- Demonstrate cooperation and respect for teammates by passing the ball responsibly and supporting team play. - Show self-discipline and fairness by using dribbling skills ethically and avoiding unsportsmanlike behaviour during the play.	- Reception and passing the ball. - Dribbling the ball.	- Individually or in groups, students perform exercises of reception and passing the ball (chest , bounce and overhead passes). - Individually, students perform exercises of dribbling the ball (pull back, front crossover, behind, between the legs crossover, behind the back crossover,

• Explain the basic principles of effective dribbling such as ball control, body positioning and movement strategies used to evade defenders.	• Perform set shots, jump shots and lay-ups with correct form and aim toward the basket under game situations.	• Exhibit confidence and perseverance by taking shots with a positive mindset and accepting both success and failure gracefully.	• Shooting the ball.	spin dribble, inside and outside and crab dribbles). • Individually, students perform different exercises of shooting the ball (set and jump shots). • Individually, students perform different footwork and handwork exercises of lay-up (left and right lay ups).
---	--	--	--	---

Link to other subjects

- **Biology:** Students cover human anatomy, muscle function and body systems relevant to movement and Athletics performance.
- **Mathematics:** Students apply to measuring angles, calculating trajectories and understanding scoring systems.
- **Physics:** Students explain motion, force and energy that are key concepts in ball movement and shooting techniques.
- **General and Religious studies:** Students promote teamwork, discipline and leadership core values in sports like Basketball.
- **ICT (Information and Communication Technology):** Students can use digital tools to learn new Basketball skills or refine their technical ability.

Assessment criteria

- The teacher evaluates students' ability to use correct passing forms (chest, bounce and overhead), pass to target with control, maintain control while moving, use both hands effectively, avoid double dribble, apply correct shooting form, aim accurately and follow through after shot. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Marked court surface with clear boundaries, official Basketballs, training cones, passing targets, whistle and stopwatch, instructional charts or posters, dribbling lanes or agility ladders, cones or poles, mirror or video recording equipment, standard Basketball hoop and backboard, shooting arc markers, ball rack or basket, scoreboard or shot counter, instructional videos or diagrams, and first aid kit.
- **Locally available sports materials:** Flat open space (school playground, cemented area or cleared ground), chalk or tape to mark passing zones or targets on walls or floors, plastic cones or water bottles as passing obstacles or accuracy targets, old tires or hoops to practice passing through targets, bricks or sticks to create dribbling courses, locally made balls (e.g.: stitched leather or rubber balls), ropes or strings to guide footwork and ball control exercises, Basketball hoop (can be improvised with metal ring and net or old bicycle rim), wall targets (chalk circles or painted squares to simulate hoop), plastic buckets or basins for shooting accuracy practice, wooden boards or poles to simulate backboards.
- **ICT tools, digital resources and visual aids:** ICT can enhance the teaching of Basketball skills by using videos and animations to demonstrate techniques such as dribbling, passing, shooting, rebounding and defending, analysing student performance through recorded and simulated game scenarios.

Topic area: Games and Sports			Sub-topic area: Team Sports	
S4: Physical Education and Sports		Unit 8: Handball techniques		No. of periods: 7
Key Unit Competence: Develop Handball technical skills				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Identify different types of shots in Handball (e.g.: jump and standing shot). • Explain when to use jump and standing shots during the game. • Describe the correct techniques for receiving and passing the ball in Handball including chest, bounce and overhead passes. • Outline the basic goalkeeping techniques in Handball such as positioning, blocking and reacting to different types of shots.	• Accurately receive and pass the ball correctly using chest, bounce and overhead passes. • Demonstrate controlled dribbling with different speeds and directions • Execute various Handball shooting techniques	• Demonstrate teamwork and cooperation by consistently supporting teammates. • Show self-discipline and respect for the rules. • Exhibit confidence and determination by taking appropriate shooting opportunities.	• Reception and passing the ball. • Dribbling the ball. • Shooting the ball.	• In pair or groups, students perform exercises of receiving and passing the ball. • Individually, students perform exercises of dribbling the ball. • Individually, students develop exercises of shooting the ball into the goal.

• Explain the techniques of dribbling in Handball.	• (e.g. standing and jump shots) with correct form and aim toward the goal. • Perform basic goalkeeping skills such as catching, blocking and diving to stop shots from different angles and distances.	• Display commitment and resilience by actively participating in goalkeeping exercises and encouraging teammates during defensive play.	• Goalkeeping exercises.	• In pairs or groups, students perform exercises of goalkeeping.
--	--	---	--	--

Link to other subjects

- **Biology (Human anatomy and physiology):** Students understand how muscles, joints and movement mechanics help students to refine Handball techniques like passing, shooting and defending. Students are also introduced to safe practices and body awareness during training and games.
- **Physics (Force and motion):** Students explain how to optimize throwing power, ball trajectory and defensive positioning. (Friction and impact) students understand grip, bounce and ball control on different surfaces (centre of mass and balance) students get knowledge about crucial for agility, jumping and maintaining stability during play.
- **English:** Supports students on their communication skills, especially when they are explaining techniques, writing reflections or analysing performance.

Assessment criteria

- Students are assessed on how well they receive and pass the ball, dribble with control, shoot accurately and perform goalkeeping skills such as catching and blocking. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- Standard sports materials: Playground, official Handballs, whistles, stopwatch, cones, chasubles, goalposts, nets and first aid kit.
- **Locally available sports materials:** Grass fields or open grounds for practice sessions, locally made Handballs (e.g.: banana fibre balls or recycled plastic balls), cones or markers (made from bottles, stones or sticks), goalposts (constructed from wood, bamboo or metal pipes), nets (woven from sisal or reused fishing nets), used clothing or fabric strips for team identification (e.g.: bibs or armbands), sticks or chalk for marking boundaries or zones on the ground and watches or phone timer.
- **ICT tools, digital resources and visual aids:** (Video analysis) Students can record and analyse Handball techniques to improve their form and tactics which is useful for visualizing game scenarios through digital simulations.

Topic area: Games and Sports		Sub-topic area: Team Sports		
S4: Physical Education and Sports		Unit 9: Introduction to Rugby		Nº. of periods: 4
Key Unit Competence: Perform basic skills of Rugby game				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitude and values		
• Describe the correct techniques used in catching and passing the ball in Rugby game. • Describe the points awarded for each scoring method. • Explain the principles of the ball control and body positioning while running in Rugby game.	• Identify scoring zones and apply strategic movement. • Demonstrate correct technique for catching the ball (chest and overhead catches). • Demonstrate correct technique for running with the ball. • Demonstrate correct technique for scoring a goal in Rugby accurately and effectively.	• Demonstrate cooperation by supporting teammates during the game play. • Exhibit fair play and determination by respecting rules and given instructions.	• Catching and passing the ball. • Running with the ball.	• In pairs or small groups, students practice ball catching techniques including chest catches(hands in a "W" shape, absorb the ball with arms)and overhead catches(arms extended, eyes on the ball). • Students practice the ball passing techniques including push pass (short distance, two hands and step forward) and spin pass(longer distance, one hand guides and other pushes).

• Explain the different methods of scoring in Rugby game including try, conversion, penalty kick drop goal.	• Execute accurate short and long passes (spin and push passes). • Apply catching and passing skills in a dynamic game like situation. • Apply running skills in a game situation. • Maintain control and balance while evading opponents. • Collaborate with teammates to create scoring opportunities.		• Scoring the goal.	• Individually or in groups, students practice running with the ball in straight lines then zigzag through cones with proper grip, body posture and change of direction. • Individually, students practice technique of scoring the goal in a marked zone without defenders.
---	--	--	---	---

Link to other subjects

- **Biology:** Students understand body systems (muscles, respiration and coordination) involved in basic skills of the Rugby game.
- **Physics:** Students apply concepts of motion, force and balance during running, catching and passing the ball.
- **General studies:** Students promote values like teamwork, discipline and fair play through doing sports activities like playing Rugby game.

Assessment criteria

- The teacher assesses students on their ability to catch and pass the ball accurately and smoothly, run with the ball using proper grip, balance and control and how they score effectively by grounding the ball correctly in the scoring area. Students are also assessed on their teamwork, communication, participation and effort during exercises and mini-games. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Official Rugby balls, cones or markers, goal posts or try lines markers, bibs, stop watch and first aid kit.
- **Locally available sports materials:** Open and safe space available at school, Football playground, soft balls of Rugby similar size (plastic balls or stuffed cloth balls), plastic bottle filled with sand or banana stems used as cones, wooden poles for goals, bamboo sticks for goals, white powder or ash to make boundaries of the court, coloured cloth used as bibs, whistle, stopwatch or phone timer.
- **ICT tools and digital resources and visual aids:** ICT can enhance the teaching of basic Rugby skills by using videos, animations and simulations to demonstrate correct techniques such as catching and passing the ball, running with the ball and scoring a goal, while also analysing students' performances through recorded and simulated game situations to help improve their overall fitness and skill development.

Topic area: Games and Sports		Sub-topic area: Team Sports		
S4: Physical Education and Sports		Unit 10: Netball techniques		No. of periods: 6
Key Unit Competence: Develop Netball technical skills				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Identify different types of passes and their appropriate use in Netball. • Describe the correct techniques used to receive the ball in Netball game. • Explain the basic footwork techniques and movement patterns used in Netball game.	• Demonstrate correct hand positioning and body posture when receiving a Netball pass. • Perform basic footwork techniques such as pivoting, landing and stepping without violating footwork rules.	• Show respect and trust by being attentive and supportive when receiving passes from teammates. • Demonstrate discipline and perseverance by consistently applying correct footwork techniques during practice.	• Receiving the ball • Footwork exercises • Passing the ball	• Individually or in pairs, students develop receiving techniques • Individually, students develop footwork exercises (One-foot land, two feet land and pivoting). • Students develop passing technical qualities such as shoulder, chest, bounce and lob passes.

	• Execute different types of passes (e.g.: chest, bounce and overhead passes) with accuracy and control. • Apply proper shooting technique to aim and score points from various positions within the goal circle.	• Exhibit cooperation and teamwork by making accurate and timely passes to support team play. • Display confidence and fairness by taking responsible shots and respecting turn-taking in exercises.	• Shooting the ball	• Individually, students perform exercises of shooting the ball in Netball game situation.
--	--	---	---	--

Link to other Subjects

- **Biology:** Students understand how body systems such as the muscular, skeletal and nervous systems are involved in physical movement and motor performance.
- **Physics:** Students apply concepts of motion, force, balance and angles in passing and shooting.
- **Mathematics:** Students measure distances, calculate angles and analyse performance statistics.
- **English:** Students communicate rules, write reflections and develop vocabulary for teamwork and sportsmanship.
- **General and Religious studies:** Students promote values like discipline, cooperation and gender equity through sports.

Assessment criteria

The teacher evaluates students' ability to show correct hand position and body posture, time reception accurately, apply correct landing and pivoting techniques, move with balance and control, use appropriate pass type (chest, bounce and overhead), pass with accuracy and timing, demonstrate proper shooting form, aim and score consistently from different spots. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Playground, official Netballs, whistle, stopwatch, cones, ropes and lines, chasubles, rim, videos related to Netball technical skills and first aid kit.
- **Locally available sports materials:** Plastic balls, rolled-up clothes or banana fibre balls, stuffed sacks or wrapped paper bundles, bottles filled with sand or banana stems to mark boundaries, stations or goals, coloured cloth strips, locally made ropes for warm ups, benches or wooden planks, buckets, baskets or cardboard boxes, wooden poles or bamboo sticks for posts with Netball rings, old tires for footwork exercises, jumping or obstacle courses.
- **ICT tools and digital resources and visual aids:** ICT can enhance the teaching of Netball skills by using videos and animations to demonstrate techniques such as passing, shooting, rebounding and defending, analysing student performance through recorded and simulated game scenarios.

Topic area: Games and Sports		Sub-topi c area: Team Sports		
S4: Physical Education and Sports		Unit 11: Goalball techniques		No. of periods: 4
Key Unit Competence: Develop Goalball technical skills				
Learning objectives			Content	Learning objectives
Knowledge and understanding	Skills	Attitudes and values		
- Identify different offensive techniques of playing Goalball game. - Identify technical skills for playing Goalball in defence. - Describe the correct body positioning and movement patterns used to block the ball effectively in Goalball game.	- Perform offensive techniques of playing Goalball. - Perform defensive techniques used in Goalball. - Perform accurate and powerful Goalball throws using proper body mechanics and aiming techniques.	- Demonstrate confidence and determination by actively participating in Goalball throwing exercises and aiming to score. - Show responsibility and teamwork by staying alert, supporting teammates and respecting fair play during defensive actions.	- Offensive system exercises - Defensive system exercises	- Individually or in groups, students develop tech- niques to use during offensive phase in Goal- ball such as ball throwing, passing, possession, court movement and penalty throws). - In groups, students develop defen- sive techniques in Goalball such as positioning, block- ing, laying out, ball possession, defen- sive movement and penalty defence.

• Explain the correct techniques and strategies used to throw the ball effectively and aim for scoring goals in Goalball game.	• Demonstrate effective blocking techniques by positioning their body correctly and reacting to the ball using auditory cues.			• Individually or in teams, students apply developed defensive and offensive techniques in Goalball game situations.
--	---	--	--	--

Link to other subjects

Biology: Students learn about human sensory systems (especially hearing and touch), muscular coordination and reflexes.

Physics: Students apply motion and force (ball rolling, impact and trajectory), sound waves and auditory cues while playing Goalball.

Mathematics: Students apply Geometry (court layout and angles of ball throws) and measurement (distance, time and scoring) during playing Goalball game.

Assessment criteria

- The teacher evaluates students' ability to roll the ball accurately with proper grip and technique, use correct body posture and arm motion during throws, aim toward strategic zones with consistency, coordinate with teammates before and after attack, use correct body position to block incoming balls, respond effectively to sound cues (ball bells, teammates), maintain position and adjust based on ball direction and work collaboratively to cover defensive zones. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Hall, whistle, Goalballs, stopwatch or watch, cones, first aid kits, knee and elbow pads and goal posts with nets and mats. .
- **Locally available sports materials:** Playground, bell balls, cones, tactile lines, blindfolds or eyeshades, stop watch or phone timer.
- **ICT tools and digital resources and visual aids:** ICT can enhance the teaching of Goalball skills by using videos and animations to demonstrate techniques such as shooting and defending, analysing student performance through recorded and simulated game scenarios.

Topic area: Games and Sports		Sub-topic area: Team Sports		
S4: Physical Education and Sports		Unit 12: Sitting Volleyball techniques		No. of periods: 3
Key Unit Competence: Develop sitting Volleyball technical skills				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Describe the correct technique and rules for serving the ball in Sitting Volleyball including hand position, ball contact and body posture. - Explain the principles of effective ball reception and passing in Sitting Volleyball, focusing on proper hand placement, clear communication and coordinated seated movement.	- Perform an accurate underarm or overarm serve in Sitting Volleyball using correct hand technique, body posture and seated balance. - Receive and pass the ball effectively while seated.	- Demonstrate confidence and perseverance when serving the ball. - Encouraging and supporting peers regardless of ability. - Show respect, cooperation and empathy when receiving and passing the ball.	- Serving the ball. - Receiving and passing the ball.	- Individually, students develop underarm serve and overarm serve using correct: - Hand technique. - Body posture and - Seated balance. - In groups, students develop receiving and passing effectively while seated.

	• Demonstrating control, coordination and communication with teammates.	• Promoting teamwork and inclusion during the game situation.		• In teams, students practice developed Sitting Volleyball skills during the game situations.
--	---	---	--	---

Link to other subjects

- **Biology:** Students learn about muscular coordination and reflexes during seated movement, sensory systems and body balance.
- **Physics:** Students learn about force and motion (ball trajectory, impact), friction and stability while seated.
- **English:** Students write instructions, rules or reflections on teamwork and inclusion and engage in debates on disability rights.
- **General and Religious Studies:** Students demonstrate inclusion and empathy, rights of persons with disabilities, teamwork and values.

Assessment criteria

- The teacher evaluates students' ability to use correct hand contact and seated posture, direct the ball into the opponent's court consistently, repeat the serve with control and minimal errors, receive the ball with proper hand position and stability, pass the ball to a teammate with direction and control, communicate and adjust position to support teammates. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

Standard sports materials: Whistle, stopwatch, score sheets, Sitting Volleyballs, Volleyball net adjusted to sitting height, marked Sitting Volleyball court, cones, bibs, video clips for technical analysis, whiteboard or flip chart and marker pens, mats and first aid kit.

Locally available sports materials: Rope or string used as a net, locally made balls (from wrapped cloth or banana fibres), chalk or sticks for marking court boundaries, stones or bottle tops for target zones, benches or mats for seated practice and locally fabricated score counters (using cardboard or wood), coloured cloths (as bibs), local mats or sacks to cushion sitting zones for safety.

ICT tools, digital resources and visual aids: ICT can enhance the teaching of Sitting Volleyball skills by using videos and animations to demonstrate techniques such as serving and reception of the ball, passing the ball, attacking and defending the ball, analysing student performance through recorded and simulated game scenarios.

SENIOR FIVE

6.4 Syllabus for Senior Five/S5

6.4.1 General competences of the subject at the end of Senior Five/S5

- Perform tactical and technical skills of apparatus Gymnastics activities.
- Perform tactics of jumping and throwing implements effectively in Athletics activities.
- Perform various individual skills and team tactics needed to play effective Football.
- Perform Volleyball tactics in the game situation.
- Perform Basketball tactics in the game situation.
- Perform Handball tactics in the game situation.
- Practise basics tactics of playing Rugby game.
- Perform Netball tactics in the game situation.
- Perform Goalball tactics in the game situation.
- Perform Sitting Volleyball tactics in game situation.

6.4.2. Unit table for Senior Five/S5

Topic area: Games and Sports			Sub-topic area: Individual Sports	
S5: Physical Education and Sports		Unit 1: Apparatus Gymnastics		No. of periods: 5
Key Unit Competence: Perform tactical and technical skills of apparatus Gymnastics activities.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Identify types of apparatus Gymnastics. • Identify common mistakes in parallel and horizontal bar techniques and how to correct them. • Understand the basic and intermediate techniques involved in parallel and	• Improve coordination, balance and strength required for bar exercises. • Demonstrate basic movements on the parallel bars (e.g.: support swing, shoulder stand and dismount).	• Demonstrate respect, cooperation and teamwork during group and partner activities. • Show perseverance, confidence and discipline while learning and practicing Gymnastics skills.	• Techniques and tactics of parallel bar. • Techniques and tactics of horizontal bar.	• The teacher demonstrates or asks an able student to demonstrate, correct techniques on parallel and horizontal bars including grips, body positions, mounts, swings and dismounts. • Students practice parallel bar techniques (support holds, controlled forward and backward swings,

horizontal bar exercises such as mounts, swings, support holds and dismounts. • Recognize tactical principles like timing, grip adjustment, momentum control and body alignment during bar routines.	• Demonstrate basic movements on the horizontal bar (e.g.: chin-up, glide swing and back hip circle). • Apply correct body posture, grip and coordination. • Apply tactical skills by adjusting grips, timing swings for maximum momentum and maintaining body control throughout movements. • Show tactical application by combining techniques into simple routines.	• Follow strictly to safety guidelines and show responsibility in handling equipment.		mounting the bars safely and dismounting with balance). • Students practice horizontal bar techniques (proper hanging grip, swinging forward and backward, beginner mounts like pullovers or leg swings). • Students practice bar tactics (timing swings to generate momentum, adjusting grips during movements, maintaining body alignment and balance and conserving energy through rhythm). • In pairs or groups, some students practise bar exercises while others observe and give feedback on technique and tactical executions. • Students create and perform a mini-routine on both apparatus (3 to 4 moves).
---	---	---	--	---

Link to other subjects

- **Physics (Science):** Students discuss momentum, angular momentum and centripetal force in swings.
- **Mathematics:** Students measure apparatus dimensions (bar height, distance between parallel bars) and calculating ratios or proportions.
- **Biology:** Students get knowledge about muscle groups used (core, arms and legs) during parallel and horizontal bar techniques and tactics. .
- **ICT (Information and Communication Technology):** Students can use digital tools to analyse performance, track progress or doing advanced parallel and horizontal bar techniques and tactics.

Assessment criteria

- The teacher assesses students on their ability to perform techniques and apply tactics on the parallel and horizontal bars, demonstrating correct body posture, control and smooth execution. Students are also assessed on safety, consistency and effective use of movement strategies. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Parallel bars, horizontal bar, gym mats, whistle, stopwatch, posters or charts, assessment rubrics and checklists, first aid kit, video related to Gymnastics tactical and technical skills.
- **Locally available sports materials:** Wooden benches or planks, strong poles or bamboo (well secured), old mattresses or cushions, plastic bottles filled with sand or stones, chalk or charcoal, ropes or sisal and mobile phone.
- **ICT tools, digital resources and visual aids:** ICT can enhance the teaching of Apparatus Gymnastics by using videos and animations to demonstrate correct performance of techniques such as mounts, dismounts, swings, balances and rotations by analysing student performance through recorded and simulated routines.

Topic area: Games and Sports			Sub-topic area: Individual Sports	
S5: Physical Education and Sports		Unit 2: Advanced tactics of Athletics		No. of periods: 8
Key Unit Competence: Perform tactics of jumping and throwing implements effectively in Athletics activities.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify the phases of each event (e.g.: approach, take-off, flight, landing in jumping; preparation, delivery and recovery in throws). - Understand how body position, rhythm and timing influence performance in each event.	- Demonstrate correct positioning and timing during take-off and jump or landing phases. - Apply appropriate tactics for each event, such as using an optimal approach run in jumps or proper	- Respect and cooperate with peers - during group and pair activities. - Show discipline, focus and persistence during practice.	Long jump, high jump and triple jump tactics.	- The teacher demonstrates or asks an able student to demonstrate tactical phases for each event (approach, take-off, flight and landing in jumps; preparation, delivery and recovery in throws). - Students practice approach runs with markers to develop rhythm, speed and take-off accuracy in long jump, triple jump and high jump. - The teacher guides students through the phases of the triple jump (hop, step and jump), focusing on coordination and timing.

• Explain the tactical principles involved in field events such as long jump, triple jump, high jump, shot put, javelin and discus.	angle and force application in throws • .Perform at least one field event with a focus on tactical improvement (e.g.: improving release angle in shot put or coordination in triple jump phases). • Analyse and adjust their technique based on performance feedback.	• Follow to safety rules when using throwing implements and jumping zones. • Demonstrate responsibility in setting up and clearing equipment safely.	• Shot put, discus and javelin throwing tactics.	• Students practice the J-shaped run-up and body posture for the high jump using soft markers or ropes for guidance. • The teacher guides students through the recall of techniques and tactics for throwing shot put, discus and javelin. • The teacher organizes pair or small group practice in which students take turns performing and giving peer feedback on tactical elements such as grip, release angle and momentum control. • The teacher divides students into groups based on event type (jumping or throwing) and assigns each group to demonstrate tactical application through a short routine or sequence.
---	---	---	--	---

Link to other subjects

- **Physics:** Students understand about force, motion, angles, gravity and momentum involved in jumps and throws.

- **Mathematics:** Students measure distances, record data, calculate averages and compare performance.
- **Biology:** Students understand principles of injury prevention during movement.
- **ICT (Information and Communication Technology):** Students can use digital tools in Athletics such as stopwatches and recorded videos that demonstrate good technique and tactics for different Athletics events.

Assessment criteria

- The teacher assesses students on their ability to apply tactics and perform techniques in jumps and throws, focusing on proper execution, safety, coordination and consistency. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Playground, javelin, discus, shot put ball, high jump bar, landing mat, long jump sandpit, measuring tape, whistle, stopwatch, cones, assessment checklist, first aid kit, videos related to jumping and throwing tactical skills.
- **Locally available sports materials:** Bamboo sticks or strong wooden poles (as javelins), stones or sandbags (as shot put), plastic lids or flat stones (as discus), old mattresses or sacks (for high jump landing), chalk or charcoal (for marking zones), ropes or sticks (for approach guides), empty bottles filled with sand (used as cones or markers).
- **Digital resources and visual aids:** The teacher can use videos and animations to demonstrate correct techniques for jumping and throwing implements, analysing student performance through recorded and simulated practice routines.

Topic area: Games and Sports		Sub-topic area: Team Sports		
S5: Physical Education and Sports		Unit 3: Advanced tactics of Football		No. of periods: 9
Key Unit Competence: Perform various individual skills and team tactics needed to play effective Football in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify various players' positions and their roles on the field. - Describe the basic responsibilities and techniques of goalkeeping. - Describe the principles of ball possession, movement and counterattacks.	- Demonstrate basic goalkeeping skills (catching, diving, distribution and positioning). - Perform set pieces (goal kick, penalty and throw-in) with proper technique.	Show team-work, cooperation and fair play during group and competitive activities.	- System formations. - Ball possession and movement.	- The teacher forms small teams and assign system formations (e.g.: 4-3-3, 4-4-2); allow students to practice positioning, spacing, forward's movement, winger specific challenges, full-back challenges and centre-backs exercises. - In groups, students practice the ball possession and movement exercises (triangle passing, passing and receiving exercises, 4 vs 1 ball passing, passing, games and basic team-play principles exercises).

• Understand the importance of execution for set pieces in both attacking and defending contexts. • Explain different system formations (e.g.: 4-4-2, 4-3-3) and their tactical implications.	• Apply ball control, passing and movement to maintain possession and create space. Position themselves correctly according to the system of play. • Defend effectively in open play and during set pieces. • Execute counterattacks and respond to them tactically.	• Display responsibility and leadership in their roles (e.g.: team captain and goal-keeper) • Encourage peers and show a positive attitude regardless of performance outcome.	• Counter attack exercises. • Set pieces (goal kick, penalty kicks, throw-in and corner kick). • Defending set pieces. • General defending. • Goalkeeping.	• Students set up counterattack exercises using live situations from midfield turnovers. • Students practice attacking and defending set pieces such as penalty kicks, corners and throw-ins. • In groups or individually, in groups or individually, students practice set pieces defending exercises (wall building for free kick, defending throw-ins taken near the goal, defending a corner kick). • Individually or in groups students practice general defending exercises (man to man, zonal marking defence, mixed system, blocking the ball, clearing the ball, protecting the ball exercises). • Individually, students perform goalkeeping exercises (dealing with high balls recovery saves, get down to the ground, clearing back passes along with the ground, goalkeeping 1vs1 and save long shots).
--	--	--	--	--

				• The teacher organizes a mini-match in which students apply the learned tactics with coaching input provided during breaks. • Students analyse a short Football match clip (if available) to identify tactical formations and player movements.
--	--	--	--	---

Link to other subjects

- **Mathematics:** Students apply measurements (e.g.: for passing or set pieces), time management during games and analysing game statistics.
- **English:** Students improve their communication during team play, giving instructions, presenting tactical ideas or feedback.
- **Information and Communication Technology (ICT) :** The teacher can use videos or animations to demonstrate correct individual skills and team tactics of playing Football or through recorded or simulated practice routines for improving students' performance.

Assessment criteria

- The teacher assesses students on their understanding and application of Football tactics, formations, ball possession and movement, counter-attacks, set pieces (goal kicks, penalty kicks and throw-ins), defending set pieces, general defending and goalkeeping. Students are also assessed on teamwork, decision-making and communication during play. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Playground, Footballs, cones, bibs or training vests, goalposts and nets, whistle, stopwatch, chalk or field markers, first aid kit, videos related to individual and team tactical skills in Football.
- **Locally available sports materials:** Handmade balls (banana fibres or tied plastic bags), stones or bricks (as cones or boundary markers), old T-shirts or cloth (as bibs), sticks or bamboo poles (to mark goals or corners), used plastic bottles (as markers) and ropes (to mark field boundaries).
- **ICT tools and digital resources and visual aids:** ICT can enhance the teaching of Football by using videos and animations to demonstrate how to perform correctly individual skills such as dribbling, passing and shooting as well as team tactics, analysing student performance through recorded practice and providing simulations and feedback to improve overall game effectiveness.

Topic area: Games and Sports		Sub-topic area: Team Sports		
S5: Physical Education and Sports		Unit 4: Advanced tactics of Volleyball		No. of periods: 8
Key Unit Competence: Perform Volleyball tactics in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify different players' positions on the Volleyball court and their specific roles. - Understand the principles and purposes of key tactics such as serving, passing, setting, blocking and digging.	- Demonstrate correct techniques for serving, passing, setting, blocking and digging. - Apply appropriate tactical decisions during the game play such as positioning and communication.	- Show teamwork and cooperation during exercises and matches. - Demonstrate discipline and commitment to learning and practicing Volleyball skills	- System formations. - Serving tactics. - Passing tactics. - Setting tactics.	- Students practice different system formations by organizing into teams and taking on assigned roles. - Students conduct serving exercises emphasizing accuracy and strategic placement. - Students practice passing exercises focusing on communication and ball control. - Individually, students practice setting exercises (long distance sets, one and freeze and side to side).

• Explain system formations used in Volleyball and their tactical advantages.	• Coordinate with teammates effectively to execute system formations and tactical plays.	• Respect teammates, opponents and referees respect fair play rules.	• Blocking tactics. • Digging tactics.	• Individually or in groups, students practice blocking exercises (mirror blocking, blind blocking drill, block and smash drill and side to side blocking drill). • Individually or in groups students practice digging tactics exercises (double decker, knockout digging drill, team on 3 digging drill). • In groups or small teams, students play modified games that focus on applying learned tactics in realistic game situations.
---	--	--	---	---

Link to other subjects

- **Physics:** Students apply principles of force, trajectory and angles during serving, setting and spiking the ball.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations related to good performance of Volleyball tactics.

Assessment criteria

- The teacher assesses students on their tactics of playing Volleyball game including serving formations, passing, setting, blocking and digging, focusing on technique, positioning, teamwork and decision-making. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Volleyballs, nets, court markings, cones, whistles, bibs or training vests, stopwatch, first aid kit, posts, flag, videos related to Volleyball tactical skills.
- **Locally available sports materials:** Handmade balls (plastic bags or banana fibres), ropes or sticks (to mark court boundaries or nets), stones or bricks (as markers or cones), old T-shirts or cloth (as bibs), whistles (if available or improvised) and trees.
- **ICT tools and digital resources and visual aids:** The teacher can use videos and animations to demonstrate individual tactical skills such as serving, passing, setting, attacking and blocking, as well as team tactics, analysing student performance through recorded practice and simulated actions or scenarios.

Topic area: Games and Sports		Sub-topic area: Team Sports		
S5: Physical Education and Sports		Unit 5: Advanced tactics of Basketball		No. of periods: 9
Key Unit Competence: Perform Basketball tactics in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify and describe players' positions and their roles on the Basketball court. - Understand system formations and their tactical purposes in offense and defence. - Explain key tactics such as motion offense, counterattack, boxing out, rebounding, zone	- Demonstrate correct positioning and movement during offense and defines. - Apply effective boxing out and rebounding to gain possession.	- Show teamwork, cooperation and respect for teammates and opponents. - Demonstrate discipline, focus and commitment during exercises and games.	- Offensive formation. - Counter attack.	- The teacher uses court diagrams and practical exercises to teach players' positions and system formations. - Individually or in groups, students practice offensive exercises (give and go, pick and roll, screens and cuts) that emphasize player movement, passing and spacing. - In the game situation, students conduct counterattack exercises that simulate fast breaks following turnovers.

marking defence and defending with or without the ball.	• Execute zone marking defence strategies and defend opponents with and without the ball. • Communicate and coordinate effectively with teammates during the play.	• Exhibit fair play, sportsmanship and respect for referees.	• Boxing out and rebounding. • Zone marking defence. • Defending opponent with or without the ball.	• Students perform exercises on boxing out and rebounding through partner exercises and competitive games. • Students practice zone marking defence through positioning exercises with an emphasis on communication. • Students practice defending scenarios with and without the ball to practice anticipation and positioning. • In teams or small groups, students play mini-Basketball games that focus on applying tactics in realistic game situations.
---	---	--	---	--

Link to other subjects

- **Physics:** Students explain concepts such as motion, force and angles involved in rebounding.
- **Mathematics:** Students measure distances, time, scoring calculations and understanding angles in shots and passes.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations related to good performance of Basketball tactics.

Assessment criteria

- The teacher assesses students on their understanding and application of Basketball tactics and system formations, motion offense, counter-attacks, boxing out and rebounding, zone defence, defending opponents with the ball and defending opponents without the ball. Students are also assessed on teamwork, communication and decision-making during play. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Basketball court, Basketballs, cones, whistle, Basketball hoop with net and backboard, stopwatch, scoreboard, bibs or training vests, assessment checklists and first aid kit.
- **Locally available sports materials:** Handmade balls (e.g.: from wrapped plastic or cloth), bricks or stones (as cones or markers), old T-shirts or coloured cloth (as bibs), wooden boards or metal rings (as improvised hoops) and ropes or chalk (for marking court boundaries).
- **ICT tools and digital resources and visual aids:** ICT can help teach Basketball by showing videos of skills like dribbling, passing, shooting and defending, demonstrating basic team tactics, analysing performance through recordings and giving feedback to improve game play.

Topic area: Games and Sports		Sub-topic area: Team Sports		
S5: Physical Education and Sports		Unit 6: Advanced tactics of Handball		No. of periods: 7
Key Unit Competence: Perform Handball tactics in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify the main Handball players' positions (goalkeeper, centre back, wing, pivot and backcourt players). - Describe correct positioning for both offense and defines.	- Position themselves correctly during offense and defines. - Demonstrate offensive strategies by moving, passing and creating space.	- Respect teammates, opponents and refer-ees. - Demonstrate teamwork, cooperation and a sup-portive spirit in all tasks. - Show re-sponsibility, discipline and respect during activ-ities.	Offensive systems.	- The teacher introduces different Handball players positions using a diagram or drawn court layout. - Students identify different players' positions on the court and explain their roles in small groups. - Individually, students take different Handball playing positions on the court. - In groups or game situations, students practice offensive positioning and movement through passing and shooting exercises. - In groups, students perform exercises of developing offensive systems (left and right winger, left and right backcourt, pivot, centre backcourt and goalkeeper).

• Highlight zone defines systems and their tactical advantages. • Explain the purpose and structure of offensive systems (e.g.: 3-3, 4-2 etc.).	• Apply zone defines strategies effectively to protect the goal area. • Transition quickly between offense and defines. • Work cooperatively with teammates during tactical exercises and game play.	• Show perseverance when learning and practicing new tactics.	• Defensive systems.	• In team, students develop attacking systems of 3-3, 4-2 etc. • Students practice moving into correct offensive positions during a simulated attack(spacing, movement without the ball and timing of runs). • Individually or in group, students take defensive positions on the court and practice exercises of zone defines systems according to the attacking. • In pairs, one student attacks and tries to get past while the other practices defending using proper positioning focusing on marking, positioning and anticipating the opponent's movements. • Students perform zone defines exercises focusing on blocking, marking space and team communication. • Students engage in small-sided games (e.g.: 5vs5 or 6vs6) applying both offensive and defensive tactics.
--	--	---	--	---

Link to other subjects

- **Physics:** Students understand about force, motion and angles during throwing, passing and blocking.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations related to good performance of Handball tactics.

Assessment criteria

The teacher assesses students on their understanding and application of Handball tactics, offensive systems, offensive and defensive positioning and zone defense systems. Students are also assessed on how they demonstrate teamwork, communication and decision-making during play. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

Standard sports materials: Handball court, Handballs, cones, whistles, goalposts and nets, stopwatches, bibs or vests for teams, assessment checklists, first aid kit, videos related to Handball tactical skills.

Locally available sports materials: Handmade balls (e.g.: wrapped cloth or plastic), stones or bricks (used as cones or markers), ropes or chalk (for marking court boundaries), old T-shirts or coloured cloth (as team bibs), wooden boards or metal rings (improvised goalposts).

Digital resources and visual aids: ICT can enhance Handball teaching by demonstrating key skills and team tactics using videos and animations, analysing student performance with their recorded videos while performing different tactics.

Topic area: Games and Sports			Sub-topic area: Team Sports	
S5: Physical Education and Sports		Unit 7: Basic tactics of Rugby		No. of periods: 4
Key Unit Competence: Practise basic tactics of playing Rugby game.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Define offensive and defensive tactics in Rugby game. • Identify examples of offensive and defensive tactics used in Rugby matches. • Explain the importance of tactical awareness when attacking and defending during Rugby matches.	• Demonstrate offensive tactics such as supporting the ball carrier, passing the ball, creating space and line running. • Demonstrate defensive tactics such as tackling, marking and maintaining a defensive line.	• Demonstrate teamwork, respect and cooperation with teammates and opponents. • Show discipline, fairness and sportsmanship during the play.	• Offensive tactics. • Defensive tactics.	• Students practice offensive tactics such as passing and support play, creating space and performing overlap runs. • Students practice dummy runs to mislead defenders and open attacking gaps. • The teacher observes and corrects players’ movement, timing and communication during offensive play. • Students practice defensive tactics such as safe tackling, marking opponents and maintaining a defensive line. • In groups, students move together in defensive exercises to block attacks and cover space effectively.

	• Apply defending and attacking tactics appropriately during small-sided Rugby games.	• Appreciate the importance of safety, communication and strategic thinking during Rugby game.		• Students play small-sided games (7vs7 or 10vs10) applying both offensive and defensive tactics in realistic game situations.
--	---	--	--	--

Link to other subjects

- **Physics:** Students develop an understanding of force, motion, impact and angles during passing, tackling and running activities.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations related to good performance of Rugby tactics.

Assessment criteria

- The teacher assesses students on their understanding and application of Rugby tactics including offensive tactics (correct ball movement, support play and attacking lines) and defensive tactics (good tackling, marking and defensive alignment). Students are also assessed on how they demonstrate teamwork, communication decision-making during play. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Rugby balls, cones, whistle, Rugby goalposts or marked scoring zones, stopwatch or timers, bibs or vests, assessment checklists, first aid kit, videos demonstrating Rugby tactics and skills.
- **Locally available sports materials:** Handmade Rugby balls made from wrapped cloth or plastic, stones or bricks used as cones or markers, ropes or chalk for marking field boundaries and defensive lines, old T-shirts or coloured cloth pieces used as team bibs or vests, wooden poles or sticks improvised as goalposts or scoring targets.
- **ICT tools and digital resources and visual aids:** ICT can enhance Rugby teaching by demonstrating key skills such as passing, tackling, rucking and scrummaging, as well as tactics like offensive plays, defensive formations and set-piece strategies through videos and animations.

Topic area: Games and Sports			Sub-topic area: Team Sports	
S5: Physical Education and Sports		Unit 8: Advanced tactics of Netball		No. of periods: 7
Key Unit Competence: Perform Netball tactics in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify and differentiate between offensive and defensive tactics in attack and defines situations. - Describe offensive and defensive playing positions in Netball .	- Demonstrate correct offensive and defensive positioning. - Perform effective dodges with changes of speed and direction. - Apply blocking and rebounding techniques during the game.	- Show teamwork, cooperation and fair play during the game. - Demonstrate discipline and focus during activities. - Respect teammates, opponents and officials.	- Offensive and defensive playing positions. - Dodging and change direction and speed - Blocking and rebounding.	- In groups, students review offensive and defensive playing positions (GA, GS, WA, C, GD, GK and WD) and identify their movement zones on the court. - The teacher demonstrates dodging and changing direction. - Students in pairs practice quick side steps, fake movements and speed changes to evade defenders. - In pairs, students practice blocking and rebounding by contesting for the ball after a bounce or throw focusing on balance and timing.

• Explain how skills such as dodging, blocking, rebounding, shadowing, intercepting and zone defending support effective teamwork and game success. •	• Practice one on one shadowing (man to man defines). • Intercept passes and throws successfully. • Use a good communication and coordination in zone defending.	• Develop confidence, persistence and a positive sporting attitude.	• One on one shadowing (man to man). • Intercepting a pass and a throw. • Zone defending.	• Students take turns performing one on one shadowing (man to man defines) ensuring the defender stays close and between the attacker and the ball. • In groups of three, students practice intercepting exercises, two players make passes while one defender anticipates and intercepts the ball. • The teacher explains and demonstrates zone defending technique. • In small groups, students position themselves in defensive zones, moving together and communicating to cover passing lanes. • In a mini game (5vs5 or 7vs7), students apply all practiced skills such as dodging, blocking, rebounding, shadowing, intercepting and zone defending during realistic game situation.
--	--	---	---	---

Link to other subjects

- **Biology:** Students understand how the human body systems are involved in movement (muscular and skeletal systems).
- **Physics:** Students apply force, motion and balance in passing, rebounding and dodging.
- **Mathematics:** Estimating distance, timing and angles when passing or intercepting the ball.
- **ICT:** Using video analysis tools to observe and improve Netball tactics.

Assessment criteria

- The teacher evaluates each student's ability to explain and demonstrate basic Netball tactics such as dodging, blocking, rebounding, shadowing, intercepting and zone defending, to apply these skills effectively during practice and mini games and to show positive attitudes including teamwork, discipline, respect and fair play. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Netballs, marked Netball court, posts, cones or markers, bibs of different colours, whistle, stopwatch, Netball hoop with net, first aid kit, videos related to Netball tactical skills.
- **Locally available sports materials:** Handmade balls (e.g.: from wrapped plastic or cloth), chalk or stones for marking court boundaries, recycled cloth or coloured bands as bibs, wooden poles or sticks for post simulation, locally made whistles or hand claps for signalling, wooden boards or metal rings (as improvised hoops).
- **ICT and digital resources and visual aids:** ICT can enhance the teaching of Netball skills by using videos and animations to demonstrate basic tactics of attacking and defending, analysing student performance through recorded and simulated game scenarios.

Topic area: Games and Sports		Sub-topic area: Team Sports		
S5: Physical Education and Sports		Unit 9: Advanced tactics of Goalball		No. of periods: 4
Key Unit Competence: Perform Goalball tactics in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Identify correct player positions in defence and their roles during the game. • Explain proper tactics for handling and throwing the ball. • Describe how handling, positioning and blocking tactics contribute to effective team defence and attack in Goalball game.	• Demonstrate correct the ball handling and throwing tactics. • Apply appropriate defensive positioning when the opposing team attacks. • Move quickly and adjust positions along the defensive line.	• Demonstrate discipline and fair play during practice and games. • Demonstrate patience, perseverance and resilience during practice and games.	• Handling and throwing the ball. • Players' positioning in defence.	• The teacher demonstrates the correct way of holding and throwing the Goalball ball using underarm bounce. The demonstration emphasizes proper body posture, balance and follow through. • Individually, students practice handling, swinging and throwing the ball using the demonstrated technique, focusing on accuracy, control and safe movement. • The teacher explains the defensive positions of players (centre, left wing and right wing) and demonstrates how to align and move together while maintaining communication through sound or touch.

• Describe how Goalball tactics can be applied in a safe, varied, effective and enjoyable way.	• Block incoming balls effectively and coordinate with teammates to defend the goal. • Perform effective blocking tactics using proper body posture and teamwork.	• Appreciate the importance of communication and trust in a team sport like Goalball. • Show cooperation, respect and inclusion for all teammates regardless of their ability. • Appreciate teamwork and inclusivity in adaptive sports.	• Blocking the ball.	• In groups, students organize themselves in defensive lines of three players. They practice lateral movements to defend the goal area and coordinate their actions using verbal cues or tapping signals to build teamwork and trust. • Working in pairs or small groups, students take turns rolling and blocking the ball while applying proper body posture and listening carefully to locate the ball's direction and speed. • The teacher organizes small sided Goalball games (3vs3), supervises the activity and provides corrective feedback on throwing, defensive positioning, blocking and teamwork.
--	--	--	--	---

Link to other subjects

- **Physics:** Students demonstrate understanding of motion, force and angle of release when throwing the ball.
- **Mathematics:** Students learn how to estimate distance, direction and timing for tactical movement in Goalball game.

Assessment criteria:

- The teacher assesses students on proper ball handling and throwing, effective defensive positioning and successful blocking with good timing and balance. Students are also assessed on how they demonstrate teamwork, communication, effort and participation are also evaluated during practice and small-sided games. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials:

- **Standard sports materials:** Goal balls, court with tactile lines, eye shades or blindfolds, whistle, stopwatch, scoreboard, goal posts with net, mat, first aid kit, knee and elbow pads.
- **Locally available sports materials:** Balls made from soft plastic or rubber filled with small stones or bells to produce sound, ropes or strings to make tactile lines, trees for marking goal post, pieces of cloth or scarves used as eye shades, empty tins or plastic bottles filled with stones to serve as sound markers, locally made whistle and locally marked playing area on the school ground, local mats or sacks to cushion landing zones for safety, coloured cloth as team identifiers.
- **ICT and digital resources and visual aids:** ICT can enhance the teaching of Goalball skills by using videos and animations to demonstrate attacking and defending tactics, analysing student performance through recorded and simulated game scenarios.

Topic area: Games and Sports			Sub-topic area: Team Sports	
S5: Physical Education and Sports		Unit 10: Advanced tactics of Sitting Volleyball		No. of periods: 5
Key Unit Competence: Perform Sitting Volleyball tactics in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Explain basic and advanced tactics for serving, receiving, setting, spiking and blocking. • Understand how positioning, communication and teamwork influence tactical success.	• Receive serves effectively using forearm and overhead passes. • Demonstrate accurate and tactical serving (float, deep, short and targeted).	• Demonstrate sportsmanship and respect toward others. • Show teamwork, cooperation and communication. • Display perseverance, discipline and a positive attitude during the play.	• Serving and receiving tactics.	• The teacher demonstrates different types of serves (float, short, deep and targeted) and explains how each can be used tactically to challenge opponents. • In pairs, students practice serving to specific zones on the court aiming for accuracy and control while their partners receive and pass the ball to simulate game conditions. • In groups, students practice receiving different types of serves and accurately passing to a designated setter focusing on communication and teamwork.

• Explain how tactics should be applied while playing Sitting Volleyball game.	• Execute quick and accurate sets and spikes based on blockers' positions. • Perform effective blocking tactics, including reading the attack, staying stable, timing the block, closing the net and working with teammates.	• Develop hard work and self-confidence while performing exercises.	• Setting and spiking tactics. • Blocking tactics.	• In teams, students participate in a "serve and chase" activity where one team serves tactically and the other receives and transitions quickly into attack by reinforcing tactical awareness under game like pressure. • The teacher explains and demonstrates correct setting and spiking tactics by highlighting the importance of timing, positioning and communication between the setter and spiker. • In groups of three, students perform a "triangle setting" exercises, practicing accurate and quick sets while maintaining constant communication. • In pairs, students practice spiking against a passive blocker aiming for open spaces, off the block hits or controlled tips to improve tactical variation in attack.
--	---	---	---	---

				• In small teams (3 to 4 players), students play a “set and attack” mini game focusing on quick transitions, decision making and proper coordination between setting and spiking. • The teacher introduces blocking tactics, explaining how players can read opponents’ body language, setter cues and hitting patterns to anticipate attacks. • Students practice blocking movements with or without the ball to master correct hand and arm positioning, balance and timing for blocking the ball during the game.
--	--	--	--	--

Link to other subjects:

- **Biology:** Students understand how the muscular and skeletal systems work together to produce movement and maintain posture during Sitting Volleyball activities.
- **Physics:** Students apply principles of motion, force and angles when serving, spiking or blocking in seated position.
- **Mathematics:** Students use geometry and spatial awareness to estimate distances, angles and positions on the court.
- **ICT:** Students use video recordings to analyse tactics and improve team performance.

Assessment criteria

- The teacher assesses student's ability to perform accurate and tactical serves, receptions, sets, spikes and blocks. Students are also assessed on how they apply appropriate Sitting Volleyball tactics in game situation and how they demonstrate teamwork, communication, discipline and sportsmanship throughout the game situation. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Whistle, stopwatch, score sheets, Sitting Volleyballs, Volleyball net adjusted to sitting height, marked Sitting Volleyball court, cones, bibs, video clips for tactical analysis, whiteboard or flip chart and marker pens, mats and first aid kit.
- **Locally available sports materials:** Rope or string used as a net substitute, locally made balls (from wrapped cloth or banana fibres), chalk or sticks for marking court boundaries, stones or bottle tops for target zones, benches or mats for seated practice and locally fabricated score counters (using cardboard or wood), coloured cloths (as bibs), local mats or sacks to cushion sitting zones for safety.
- **ICT tools and digital resources and Visual aids:** ICT enhances the teaching of Sitting Volleyball by using videos and animations to demonstrate key techniques such as serving, receiving, passing, spiking, blocking, attacking and defending. It also supports performance analysis through recorded and simulated game scenarios, helping students understand and apply Sitting Volleyball tactics in real game situations.

SENIOR SIX

6.5. Syllabus for Senior Six/S6

6.5.1. General competences of the subject at the end of Senior Six/S6

- Apply rules and regulations of Gymnastics activities.
- Apply rules and regulations in Athletics activities.
- Apply Football Laws of the game in the game situation.
- Apply Volleyball rules of the game in the game situation.
- Apply Basketball rules of the game in the game situation.
- Apply Handball rules of the game in the game situation.
- Apply basic rules of Rugby in the game situation.
- Apply Netball rules of the game in the game situation.
- Apply Goalball rules of the game in the game situation.
- Apply Sitting Volleyball rules of the game in the game situation.
- Provide basic first aid to victims in case of common injuries and accidents in especially in physical and sports activities.
- Perform successfully physical fitness and result interpretation.

6.5.2 Unit table for Senior Six/S6

Topic area: Games and sports		Sub-topic area: Individual sports		
S6: Physical Education and Sports		Unit 1: Rules and regulations of Gymnastics		No. of periods: 4
Key Unit Competence: Apply rules and regulations of Gymnastics in Gymnastics activities.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Identify safety rules to be followed during Gymnastic activities. • Explain correct use of different Gymnastics apparatus. • Describe the basic rules that guide Gymnastics performance.	• Demonstrate correct handling and use of Gymnastic apparatus safely. • Apply basic rules during Gymnastics performances and practice sessions. • Evaluate Gymnastics performances using simplified scoring and judging criteria.	• Show respect for safety and discipline during Gymnastics activities.	• Safety rules and correct use of apparatus. • Basic rules of Gymnastics.	• The teacher demonstrates how to safely use Gymnastics materials such as mats, beams , bars, etc. • Individually or in pairs, students practice placing and checking apparatus before use. • In groups, students list "Dos and Don'ts" for Gymnastics safety.

• State the scoring and judging criteria used in Gymnastics competitions.	• Display flexibility, balance, coordination and control during movements.	• Demonstrate teamwork, cooperation and fair play. • Develop confidence, responsibility and self-control. • Value neatness, accuracy and aesthetic presentation in performances.	• Scoring and judging criteria.	• Students work in groups to brainstorm rules for floor, vault and apparatus exercises. • The teacher explains the scoring criteria: difficulty, execution and artistry. • Students watch a short video or demonstration related to scoring and judging criteria. • The students perform Gymnastics exercises while peers act as judges using a simple rubric(e.g.: 10-point scale) to assess performers.
---	--	--	---	--

Link to other subjects

- **Biology:** Students understand how in Gymnastics, the muscles, bones and joints work together to produce movement, maintain balance and support the body's performance in various exercises.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations related to good performance of Gymnastics techniques or officiating Gymnastics.

Assessment criteria

- The teacher assesses students on respecting safety rules, using apparatus correctly, applying basic Gymnastics rules and showing teamwork and cooperation. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Gymnastic mats, balance beam, parallel bars, vaulting box, stopwatches, Gymnastics videos, computer, projector, a playground or an open safe area available at school, first aid kit, score sheets or judging forms, pens, whistles and cones.
- **Locally made sports materials:** Mats made from stuffed sacks or old blankets covered with canvas, balance beam made from smooth wooden planks, marking lines using ropes or chalk, score cards made from cardboard and clipboards, papers and score sheets.
- **ICT tools and digital resources and visual aids:** Videos showing Gymnastics exercises, computer and projector to display Gymnastics apparatuses, rules and body positions or techniques, online platforms for sharing learning materials or virtual training.

Topic area: Games and sports		Sub-topic area: Individual sports		
S6: Physical Education and Sports		Unit 2: Athletics rules and regulations		No. of periods: 6
Key Unit Competence: Apply rules and regulations in Athletics activities.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Identify and describe the roles of Athletics officials (the starter, the timer, the judge and the recorder). • Explain lane discipline and common fouls in Athletics.	• Apply track and field rules correctly during training and competitions. • Maintain correct lane discipline in races. • Demonstrate understanding of fouls by identifying and avoiding them in practice and competitions.	• Demonstrate respect for rules, fairness and honesty in competition. • Show teamwork and cooperation during group officiating. • Develop self-discipline, responsibility and sportsmanship.	• Track and field event rules. • Lane discipline and fouls.	• Through group discussions, students discuss about rules for sprints (100m, 200m, 400m), relays (4×100m, 4×400m), jumps (long jump, triple jump and high jump) and throws (shot put, discus and javelin). • Students observe demonstrations of correct starts, baton exchanges, jump take-offs and throwing techniques. • Through practice, students demonstrate how to stay within their assigned lanes, focusing on lane discipline and avoiding common fouls during races.

• Describe the main rules of track and field events (sprints, relays, jumps and throws).	• Perform the roles of officials effectively during Athletic events.	• Appreciate the importance of organization and order in sports events. • Recognize the importance of keeping safe environment during physical and sports activities. • Appreciate socio-economic benefits of sports to the society.	• Role of officials.	• The teacher introduces each official in Athletics events and their duties (the starter, the timer, the judge and the recorder). • The teacher can use digital resources to show rules for starting, relay exchanges or jump fouls. • The teacher organize practice where students act as competitors and officials. • Students discuss and evaluate fairness and rule compliance after each event.
--	--	--	--	--

Link to other subjects:

- **Mathematics:** Students measure distances and times in Athletic events while acting as officials.
- **English:** Students describe and present the rules and regulations of Athletics orally or in writing and write reflections and reports on their performance.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations related to good performance of Athletics techniques or officiating Athletics events.

Assessment criteria:

- The teacher assesses students on their understanding and respect of track and field event rules, proper lane discipline, avoidance of fouls and correct application of officials' roles. Students are also assessed on their cooperation and fair play during activities. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials:

- **Standard sports materials:** A playground or an open safe area available at school, stopwatches, whistles, batons (for relay), measuring tape, flags (red, white), cones/markers, shot put, discus or javelin (if available), Athletics videos, score sheets or record forms, pen or pencil, computer and projector.
- **Locally made sports materials:** Batons made from short PVC or bamboo pipes, flags made from sticks and coloured cloth or paper, measuring tape marked on ropes, marking lines using flour, white powder or chalk, mobile phone timers, score sheets made from manila paper or cardboard, paper score sheets.
- **Digital resources and visual aids:** Videos, projectors and digital charts help demonstrate correct techniques, show track layouts and illustrate body positions. These tools make lessons more interactive and allow students to visualize and analyse movements effectively.

Topic area: Games and sports			Sub-topic area: Team sports	
S6: Physical Education and Sports			Unit 3: Football Laws of the game	No. of periods: 7
Key Unit Competence: Apply Football Laws of the game in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify and describe the basic and advanced rules of Football game. - Explain field dimensions, duration, fouls, offside and types of restarts of the game (free kicks, goal kicks, throw-ins etc).	- Apply Football rules correctly during Football practice and game situations. - Demonstrate appropriate players' conduct and respect for officials.	- Show discipline, honesty, cooperation and respect during the game. - Promote fairness, tolerance and sportsmanship in games. - Value safety and inclusion in all Football activities.	- Basic and advanced rules of Football. - Player conduct and fair play principles	- Through brainstorming, students discuss rules of the game such as field of the play and equipment, match duration and stoppage time, start and restart of the play, offside, fouls and misconduct, free kicks and penalties). - In groups, students list fouls that could be committed by players in Football game and their consequences. - In the Football game situation, students play a 5 vs 5 match and correct rule violations during the game.

• State the roles and responsibilities of match officials. • Describe principles of fair play and players' conduct.	• Officiate the match while performing roles of officials in Football game. • Maintain safety and fair play in all game situations.		• Roles of officials.	• Students brainstorm or demonstrate examples of good and bad players' behaviour such as simulation, dissent, handshake and other actions that reflect sportsmanship and fair play. • The teacher demonstrates common fouls and students identify rules violations. • Through brainstorming, students discuss officials and their roles in Football game such as the referee, the assistant referees, the fourth referee and additional officials. • Individually or in groups, students reproduce hand signals used by Football officials to communicate decisions. • Students act as officials in a mini match simulation. • After mini-games, students discuss which rules were followed or violated and how officials applied the rules during gameplay. The teacher can use video review to analyse recorded game clips to identify rules applications or violations.
--	--	--	---	---

Link to other subjects

- **English:** Students learn how to communicate and follow different ways of communication while acting as officials.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations related to good performance of Football techniques and tactics or officiating Football game.

Assessment criteria

- The teacher assesses students on their understanding and application of basic and advanced Football rules, proper player conduct, fair play principles and the roles of officials. Students are also assessed on how they demonstrate teamwork and cooperation during play. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Footballs, a playground or an open safe area available at school, whistles, cones or markers, corner flags, stopwatches, videos related to Football matches, a computer and projector, first aid kit, red and yellow cards, substitution board, flags, notebook and pen or pencil, bibs or jerseys and score sheets.
- **Locally made sports materials:** Goalposts from bamboo or wooden poles, corner flags from sticks and coloured cloth, whistles made from plastic or metal tubes, lines drawn using flour, white powder or chalk, recycled plastic bottles as cones, hand-drawn rule charts and posters, red and yellow cards made from cardboard or coloured paper, Substitution board made from cardboard or wood with numbers written.
- **ICT tools and digital resources and visual aids:** The teacher can show videos of skills, display rules and tactics on projectors or smart boards and simulate match scenarios.

Topic area: Games and sports			Sub-topic area: Team sports	
S6: Physical Education and Sports			Unit 4: Volleyball rules of the game	No. of periods: 7
Key Unit Competence: Apply Volleyball rules of the game in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify and describe the rules of Volleyball game. - Explain players positions, rotation system and scoring rules. - State the types of faults (net touch, foot fault and double hit). - Describe refereeing signals and procedures used during matches.	- Apply Volleyball rules during the game play. - Perform and interpret refereeing signals accurately	- Show teamwork, discipline and respect for officials and teammates. - Display fair play and honesty during matches.	Court layout, player positions, rotation and scoring system.	- The teacher introduces simplified rules of the game and then progresses to full matches. - Students show the Volleyball court diagram with its zones and lines. They discuss roles and how to use these zones and lines during the game. - On the court, students demonstrate and take players positions (1 to 6) and rotation system (clockwise movement). - Using a short game situation, students discuss how to score a point after each rally to understand proper order.

		• Appreciate the importance of rules, safety and cooperation during matches. • Appreciate socio-economic benefits of sports to the society.	• Faults. • Role of officials.	• Students identify types of faults from different situations such as net fault, foot fault, service fault, ball handling fault, block faults and rotational fault. Students watch demonstrations of correct and incorrect actions, presented by the teacher or peers. • In small matches played under teacher supervision, students play the game by avoiding committing faults. • In pairs or groups, students brainstorm refereeing roles (1st referee, 2nd referee, scorer and line judges). • The teacher or able student demonstrates common signals for refereeing (service fault, net touch, ball in and out, double hit and substitution or timeout). • During the game situation, individually or in pairs, students rotate roles so each student acts as a referee, scorer or player.
--	--	--	---	--

				• After mini-games, students discuss about rules which were followed or violated and how officials officiated the game. The teacher can use video review to analyse recorded game clips to identify rules applications or violations.
--	--	--	--	---

Link to other subjects:

- **English:** Students learn how to communicate and follow different ways of communication while acting as officials.
- **ICT (Information and Communication Technology):** Students can use digital tools to analyse performance, track progress or study professional Volleyball techniques and tactics or officiating Volleyball game.

Assessment criteria:

- The teacher assesses students on their understanding of the Volleyball court layout, correct player positions, rotation and scoring system and identification of common faults such as net, foot, service, ball handling and rotational faults. Students are also assessed on their ability to interpret and apply refereeing signals and procedures, as well as teamwork and cooperation during play. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials:

- **Standard sports materials:** Volleyballs, a playground or an open safe area available at school, net and posts, whistles, scoreboard, flags (for line judges), chalk, cones and markers, first aid kit, score sheet or record form, red and yellow cards (for first referee) and referee stand.
- **Locally made sports materials:** Net made from ropes or string, poles from bamboo or wooden sticks, lines drawn using chalk, flour or white powder, flags from sticks and coloured cloth or paper, whistles made from small metal or plastic tubes, flash card, diagram or charts of to identify referee signals, red and yellow cards made from cardboard or coloured paper, handwritten on paper or cardboard as score sheet.
- **ICT tools and digital resources and visual aids:** The teacher can use videos to demonstrate skills, projectors or smart boards to show court layouts and rules and digital diagrams to explain rotations and strategies. Simulation apps and online resources help students practice decision-making and reinforce understanding.

Topic area: Games and sports		Sub-topic area: Team sports		
S6: Physical Education and Sports		Unit 5: Basketball rules of the game		No. of periods: 7
Key Unit Competence: Apply Basketball rules of the game in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Identify the basic rules and scoring system in Basketball game. • Explain players positions and their functions. • Describe the roles and responsibilities of referees and scoring officials. • Distinguish between violations (e.g.: traveling, double dribble) and personal fouls.	• Apply Basketball rules correctly during games and practice. • Demonstrate correct player positioning and movement during offensive and defensive play.	• Show discipline, cooperation and respect during practice and competition. • Demonstrate fair play and honesty in all Basketball activities.	• Basic rules.	• The teacher organize a mini-game where students start the game and play while the teacher pauses to correct rule violations (traveling, double dribble, out-of-bounds etc.) and fouls (personal and team fouls) with the target of scoring points using different ways (free throw or field goal). • In teams, students demonstrate correct or incorrect rule applications for their peers to identify them.

	• Perform scoring actions (lay-up, free throw and jump shot) according to the rules. • Officiate a game by performing referee, timer and scoring roles accurately.	• Value teamwork and inclusiveness in applying game rules. • Appreciate socio-economic benefits of sports to the society.	• Role of officials.	• Individually or in teams, students score points from different area on the court while one group can play while another keeps score. • On the court, the teacher or able student demonstrates and explains five main positions for players on the Basketball court. • Students form teams, take positions on the court and practice quick transitions between offence and defence through rotational play. • The teacher introduces and explains duties of officials in Basketball game (the referee, the umpire, the scorer and the timer). • Students imitate hand signals used by officials and learn how to complete score sheets.
--	---	--	--	--

				• Through mini-matches, the teacher requests selected students to officiate the match as a referee, umpires, a timer or a scorer. • After mini-games, students discuss which rules were followed or violated and how the game was officiated. The teacher can use video review to analyse recorded game clips to identify rules applications or violations.
--	--	--	--	--

Link to other subjects

- **Mathematics:** Students learn to analyse statistics and understand spatial patterns.
- **English language:** Students follow verbal instructions, reading game rules and communicating clearly while acting as officials.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations related to good performance of Basketball techniques and tactics or officiating Basketball game.

Assessment criteria

- The teacher assesses students on their understanding and application of basic Basketball rules including court and team regulations, starting the game, violations and fouls, scoring system and players' positions. Students are also assessed on their ability to apply the roles of referees and scoring officials as well as on how they are demonstrating teamwork and cooperation during play. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Basketballs, a playground or an open safe area available at school, whistle, scoreboard, cones for marking positions, bibs or coloured jerseys and stopwatches, score sheet or official scorebook, pen (black or blue and red) for recording, shot clock timer (to track the 24-second shot rule), first aid kit.
- **Locally made sports materials:** Hoops made from old metal rings or bicycle rims, backboard from smooth wood or plastic board, court markings using chalk, flour or white powder, score sheets made from manila paper, whistles made from small metal or plastic tubes and recycled bottles as cones, cardboard or wooden scoreboard.
- **ICT tools and digital resources and visual aids:** Videos or animations demonstrating dribbling, passing, shooting, fouls and violations, projector or smart board to show court layout, player positions and scoring rules.

Topic area: Games and sports			Sub-topic area: Team sports	
S6: Physical Education and Sports			Unit 6: Handball rules of the game	No. of periods: 7
Key Unit Competence: Apply Handball rules of the game in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Identify and explain the basic rules of Handball game. - Explain the roles and signals of the referee and other officials. - Distinguish between fouls, violations and legal plays.	- Apply Handball rules correctly during practice and games. - Perform referee signals and officiate a short game.	- Show discipline and respect for officials, teammates and opponents. - Demonstrate fair play and sportsmanship during the play. - Value teamwork, cooperation and inclusiveness in Handball.	- Basic rules. - Court markings and player positioning.	- Students work in small groups to play modified Handball games where they practice correct team composition, apply the rules of playing the ball, respect the goal area, perform proper scoring and throw-offs. They identify fouls or violations while taking turns as players and referees. - Working individually, in pairs or groups, students demonstrate legal and illegal actions such as 3 steps rule, double dribble and others for peer observation and discussion. - Individually or in groups, students identify and label key areas (goal area, goal line, centre line, side lines, free-throw line and substitution area).

			• Roles of officials.	• Students take player positions correctly according to their roles (goalkeeper, wings, backs and centre). • The teacher guides and corrects players' placements, then lets groups demonstrate positioning during a short practice setup. • The teacher sets up game situations where students apply defensive and offensive rules. • The teacher explains and demonstrates the main responsibilities of a referee such as starting and stopping play, enforcing rules and demonstrate signalling fouls. • Students watch short demonstrations or images of official Handball signals (for free throw, goal, foul, passive play, etc.). • In pairs or small groups, students practice and interpret referee signals by taking turns as referees during mini-games or rule simulations.
--	--	--	---	---

				• After mini-games, students discuss which rules were followed or violated and how the game was officiated. The teacher can use video review to analyse recorded game clips to identify rules applications or violations.
--	--	--	--	---

Link to other subjects

- **English:** Students learn how to communicate and follow different ways of communication during the game.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations related to good performance of Handball techniques and tactics or officiating Handball game.

Assessment criteria

- The teacher assesses students on their understanding and application of basic Handball rules including team composition, playing the ball, goal area, scoring, throw-offs and restarts and fouls or violations. Students are also assessed on correct court markings, player positioning and the ability to follow referee responsibilities and signals, as well as teamwork and cooperation during play. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials:

- **Standard sports materials:** Handballs, a playground or an open safe area available at school, whistle, score sheets, cones or markers, stopwatch, bibs (cloths of different colours), red, yellow and blue cards, pen or pencil, first aid kit.
- **Locally made sports materials:** Handball made from old clothes or plastic bags wrapped with string, court markings using chalk, rope or white powder, goalposts made from wood or bamboo, whistle made from small metal or plastic tubes, scoreboard made from cardboard or manila paper and flags made from coloured fabric for referees, red, yellow and blue cards made from cardboard or coloured paper, handmade on paper or cardboard as scoresheet.
- **ICT tools and digital resources and visual aids:** Videos showing proper passing, dribbling, shooting and defensive techniques, projector or charts displaying court zones, positions and scoring rules, simulation apps to practice game scenarios and rule application.

Topic area: Games and sports			Sub-topic area: Team sports	
S6: Physical Education and Sports			Unit 7: Basic rules of playing Rugby	No. of periods: 4
Key Unit Competence: Apply basic rules of Rugby in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
- Recall and describe the basic techniques and tactics used in Rugby game such as passing, tackling, rucking, scrumming etc. - Explain the main rules of Rugby for forward pass, knock-on, offside, scoring system and fouls. - Distinguish between fair play actions and rule violations.	- Apply Rugby rules correctly in game situations. - Demonstrate correct basic Rugby techniques by following official rules. - Perform and interpret referee hand signals appropriately.	- Show discipline, cooperation and respect for teammates, opponents and officials. - Demonstrate sportsmanship and fair play in all Rugby game situations.	Recall on techniques and tactics of playing Rugby.	- Students work in groups to recall and demonstrate key Rugby techniques such as passing (lateral and backward), catching, tackling (below shoulders and safe contact), rucking and mauling, basic formations (offensive and defensive lines), kicking and scoring. - In pairs or groups, students recall and demonstrate basic tactics like supporting the ball carrier, defending as a line and creating space in attack.

• Identify and describe referee responsibilities and signals during the game.	• Participate in a short game respecting Rugby rule of the game.	• Value teamwork, inclusion and safety in contact sports.	• Basic rules of Rugby.	• Students apply both techniques and tactics in a modified small-sided game (e.g.: 5vs5) under the teacher guidance. • In pairs or groups, students discuss and list the basic rules of Rugby game, such as passing backward, scoring by grounding the ball over the try line, tackling below the shoulders, staying onside and restarting play with a scrum or line-out. • In small groups, students demonstrate selected rules through short practical examples or mini-exercises (e.g.: correct passing direction, safe tackling position). The teacher observes, corrects mistakes and conducts a brief reflection on the importance of rules for fair play and safety.
---	--	---	---	---

			• Roles of officials.	• The teacher explains the main responsibilities of a Rugby referee such as enforcing rules, ensuring player safety, starting and stopping play and maintaining fair conduct. • Students observe demonstrations or visual aids showing common referee signals (for try, knock-on, offside, forward pass, scrum, penalty and advantage). • In small groups, students practice and interpret referee's signals, then take turns as referees during a short-modified Rugby game to apply them in context. • After mini-games, students discuss which rules were followed or violated and how officials applied rules of the game. The teacher can use video review to analyse recorded game clips to identify rules applications or violations
--	--	--	---	--

Link to other subjects

- **English:** Students learn how to communicate and follow different ways of communication during the game while acting as officials.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations related to good performance of Rugby techniques and tactics or officiating Rugby games.

Assessment criteria

- The teacher assesses students on their understanding and application of basic Rugby rules, techniques and tactics of play. Students are also assessed on their ability to follow referee responsibilities and signals as well as how they demonstrate teamwork, cooperation and fair play during the game. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Rugby balls, a playground or an open safe area available at school, whistle, cones, bibs (cloths of different colours), score sheet and stopwatch, first aid kit, red and yellow cards, flags, pen or pencil.
- **Locally made sports materials:** Ball made from tightly wrapped old clothes or plastic bags, goal posts made from wood or bamboo, cones made from plastic bottles or banana stems, court boundaries marked with chalk, white powder or string, referee flags made from coloured cloth or paper, red and yellow cards made from cardboard or coloured paper, handwritten on paper or cardboard as score sheet.
- **ICT tools and digital resources and visual aids:** Videos demonstrating tackles, passing, scrums, line-outs and safety rules, projector or charts to display field layout, scoring system and player roles, simulation apps to practice game situations and rule enforcement.

Topic area: Games and sports			Sub-topic area: Team sports	
S6: Physical Education and Sports		Unit 8: Netball rules of the game		No. of periods: 5
Key Unit Competence: Apply Netball rules of the game in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Identify and explain basic rules of playing Netball game. • Describe court zones and players positions during Netball game. • Explain the scoring system and umpire signals used during the play. • Distinguish between fair play actions and rule violations.	• Apply Netball rules correctly in game situations. • Demonstrate correct footwork, passing and defensive movements following the rules.	• Show respect, discipline and cooperation during practice and competition. • Demonstrate fair play and honesty when applying rules of the game. • Value teamwork, inclusiveness and safety during Netball game.	• Basic rules.	• Students into small groups rotate through practical stations focusing on the rule governing footwork, passing, contact and obstruction. • Students rotate through positions to understand movement restrictions in the Netball game. • The teacher uses the Netball court diagram (drawn or marked on the ground) to explain the main zones of Netball court and players' positions on the ground. • In groups, students practice quick positional changes during a short passing or attacking drill to apply knowledge of zones and positions in real play.

	• Show proper positioning and movement in respective court zones. • Perform umpire signals and officiate a short match.		• Scoring system and roles of officials.	• Through brainstorming, students explain the scoring system and demonstrates official umpire signals for goals, fouls, violations and free throws. • In pairs or groups, some students acts as officials while others performs the play. Groups change their roles to ensure everyone practices both playing and umpiring. • After mini-games, students discuss which rules were followed or violated and how the game was officiated. The teacher can use video review to analyse recorded game clips to identify rules applications or violations.
--	--	--	--	---

Link to other subjects

- **English:** Students learn how to communicate and follow different ways of communication during the game.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations related to good performance of Netball techniques and tactics or officiating Netball game.

Assessment criteria

- The teacher assesses students ability on their understanding and application of basic Netball rules including footwork, passing, contact and obstruction rules, court zones, player positions, scoring system and umpire signals. Students are also assessed on how they demonstrate teamwork, cooperation and fair play during the game. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Netballs, a playground or an open safe area available at school, bibs (cloths of different colours), whistle, cones, stopwatches and score sheet, scoreboard, pen or pencil and first aid kit.
- **Locally made sports materials:** Ball made from old clothes, banana fibres or plastic bags, court markings using chalk, white powder or string, goalposts made from wood, bamboo with metal rings, cones made from plastic bottles, scoreboard made from manila paper or cardboard and whistle made from small tubes or bottle caps, handwritten on paper or cardboard as score sheet.
- **ICT tools and digital resources and visual aids:** Videos or animations demonstrating passing, shooting and footwork rules, digital layouts showing player positions and court sections.

Topic area: Games and sports		Sub-topic area: Team sports		
S6: Physical Education and Sports		Unit 9: Goalball rules of the game.		No. of periods: 4
Key Unit Competence: Apply Goalball rules of the game in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Identify and describe the court layout and goal zones of Goalball. • Explain throwing, blocking and orientation rules. • State the roles of referees and players in a Goalball game.	• Demonstrate correct throwing and blocking techniques following Goalball rules. • Apply orientation rules effectively during play while blindfolded.	• Show respect, cooperation and inclusion while playing Goalball • .Demonstrate fair play and honesty in following rules. • Value the importance of sports for people with disabilities.	• Basic rules.	• The teacher explains the Goalball court layout, including dimensions, goal zones, team areas and tactile markings for orientation. • With the guidance of the teacher, students make small groups to walk around the court while blindfolded (using tactile lines for guidance) to understand boundaries and goal zones. • Students practice correct positioning in the goal zone during defensive and offensive exercises. • The teacher supervises to ensure safety and proper positioning.

	• Perform referee roles and signals accurately in practice situations.		• Roles of officials.	• Students into small groups practice throwing techniques (overhand, underhand and passing to a teammate) while adhering to rules on proper form. Then, they practice blocking in pairs, learning to intercept or defend without committing fouls. • Students participate in orientation exercises, moving in the correct directions based on their attacking and defending roles, staying within designated zones and respecting movement restrictions. • The teacher supervises, gives feedback and highlights rule compliance throughout the exercises. • The teacher explains the main roles of referees such as enforcing rules, signalling fouls, starting and stopping play, ensuring safety, etc. • Students into small groups, play a mini-game by taking turns as referees and players. During the activity, students apply rules and perform their roles correctly while the teacher observes and provides guidance.

Link to other subjects

- **English:** Students learn how to communicate and follow different ways of communication during the game.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations related to good performance of Goalball techniques and tactics or officiating Goalball game.

Assessment criteria

- The teacher assesses students on their understanding and application of basic Goalball rules including court layout, goal zones, throwing, blocking and orientation rules. Students are also assessed on their ability to follow the roles of referees, as well as teamwork, cooperation and fair play during the game. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- Standard sports materials: Goal balls (with bells inside), playground or an open safe area available at school, blindfolds, whistle, stopwatch, mats, score sheet, first aid kit, goal posts and nets
- Locally made sports materials: Ball wrapped ball filled with small metallic objects (bottle caps, coins or bells) to make sound, blindfolds made from thick cloth or pieces of old fabric, court markings string or rope covered with tape for tactile feel, goalposts made from bamboo or wooden poles (covered by cloths to avoid possible injuries) and cones made from plastic bottles, score sheets made from manila paper.
- ICT tools and digital resources and visual aids: Videos or animations demonstrating throwing, blocking and defensive techniques, projector or charts displaying court markings, scoring and penalty rules.

Topic area: Games and sports		Sub-topic area: Team sports		
S6: Physical Education and Sports		Unit 10: Sitting Volleyball		No. of periods: 5
Key Unit Competence: Apply Sitting Volleyball rules of the game in the game situation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Identify and explain the basic rules and court layout of Sitting Volleyball game. • Describe the roles of officials in Sitting Volleyball game.	• Demonstrate correct sliding, pivoting and reaching movements on the court. • Practise accurate serves, passes and attacks while seated. • Apply referee decisions accurately in practice games. • Correctly use and interpret hand signals during	• Demonstrate responsibility in following team roles. • Show respect for officials and decisions made during games. • Demonstrate fair play and integrity when acting as players or referees.	• Basic rules.	• On the court or using an illustrated image of the court, the teacher presents the Sitting Volleyball court and explains its dimensions, net height, team composition and rotation during the play. • The teacher explains and shows examples of common faults (e.g.: lifting buttocks and touching the net). • Individually, in pairs or group, students demonstrate seated movement and control exercises such as serving, blocking, passing and setting and attacking.

	exercises or mini-games. • Demonstrate correct seated movement and basic techniques (serving, passing, spiking or blocking). • Apply the rules of Sitting Volleyball correctly during the game situation.	• Show teamwork, cooperation and respect for teammates and referees. • Promote inclusivity and fair play while playing with others.	• Roles of officials.	• In pairs or groups, students brainstorm about the roles of referees and hand signals used in Sitting Volleyball officiating. Students play mini-games following official rules to apply what they learned. • Students change their roles (player, referee and scorer) to understand all aspects of the game. After mini-games, students discuss which rules were followed or violated and how the game was officiated. The teacher can use video review to analyse recorded game clips to identify rules applications or violations.
--	---	--	---	---

Link to other subjects

- **English:** Students learn how to communicate and follow different ways of communication during the game.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations related to good performance of Sitting Volleyball techniques and tactics or officiating Sitting Volleyball game.

Assessment criteria

- The teacher assesses students on their understanding and application of basic sitting Volleyball rules including court size, net height, team composition, rotation and recognition of faults. Students are also assessed on their ability to follow referees' instructions and hand signals as well as teamwork, cooperation and fair play during the game. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Sitting Volleyball net (adjustable height, 1.15m for men and 1.05m for women), official Volleyballs (size and weight as per World Para Volley standards), court marking tape or paint (10mx6m court), boundary flags or cones, referee's whistle and score sheets, scoreboard and timer, first aid kit and chairs or mats for seated warm-up and mobility exercises, red and yellow cards (for first referee).
- **Locally made sports materials:** Net made from rope, poles made from bamboo, PVC pipes or wooden sticks, ball made from wrapped plastic bags, banana fibres or old clothes tied securely with string, court lines marked using chalk, ash, flour, sisal rope, seating mats made from woven grass mats, old carpets or foam pieces, scoreboard made from cardboard, paper or small chalkboard, flags made from cloth pieces or paper attached to sticks, red and yellow cards made from cardboard or coloured paper.
- **ICT tools and digital resources and visual aids:** Videos (to show proper refereeing of Sitting Volleyball game or recorded videos of students' performance for analysis and feedback after the game situation or exercise), online resources (access educational websites with proper practical and refereeing exercises, workouts or instructional materials), digital fitness tracking (use of apps to track heart rate, steps distance and calories burned), E-portfolios (to maintain digital records of their progress and achievement), computer, projector and internet.

Topic area: Health, hygiene and safety.			Sub-topic area: Prevention and management of sports injuries.	
S6: Physical Education and Sports			Unit 11: Introduction to basic first aid	No. of periods: 5
Key Unit Competence: Provide basic first aid to victims in case of common injuries and accidents in especially in physical and sports activities.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Define first aid and explain its importance in sports and physical education. • Identify common sports injuries and describe basic first aid procedures for each. • List and explain the functions of materials found in the first aid kit.	• Demonstrate correct first aid techniques such as cleaning wounds, applying bandages and using splints. • Perform simple emergency responses like the recovery position and calling for help during sports activities.	• Show responsibility and confidence when responding to sports injuries. • Demonstrate care, teamwork and empathy when assisting injured players	• Meaning and importance of first aid in sports. • Common sports injuries.	• After practising physical and sports activities, students work in pairs or groups to brainstorm the meaning and importance of first aid in sports. • Using videos related to sports injuries, students discuss different common sports injuries and how to avoid them during physical and sports activities. • Through outdoor simulation, the teacher conducts a mock sports

	• Apply the DRABC (Danger, Response, Airway, Breathing, Circulation) principles when handling sports injuries.	• .Maintain calmness, safety and respect for others during first aid situations.	• Principles and procedures of first aid.	event where some students act as injured players while others provide first aid. • Using the first aid kit, the teacher demonstrates first aid procedures with a volunteer or a Manikin. • After the simulation, students discuss what went well and what could be improved in future simulations. The teacher can use video review to analyse recorded first aid clips, identify procedures and guide students on how to perform accurate first aid.
--	--	--	---	---

Link to other subjects

- **English:** Students learn how to communicate and follow different ways of communication during the game.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations demonstrating proper first aid techniques for assisting an injured player.

Assessment criteria

- The teacher assesses students on their understanding of first aid in sports and how they can state and explain common sports injuries and application of the principles and procedures of first aid. Students are also assessed on their ability to demonstrate safe and correct first aid practices. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** First aid kit with first aid materials such as bandages, scissors, ice packs, gloves, antiseptic, a playground or an open and safe area available at school, splints, pictures or charts of injuries, whistle or alarm (for emergencies).
- **Locally made sports materials:** Clean cloths (as bandages), wooden sticks or bamboo (as splints), banana leaves or polythene (for dressing wounds), plastic bottles (for washing wounds), rope or string (for securing splints).
- **ICT tools and digital resources and visual aids:** Videos showing different injuries that may occur in sports activities and how to provide first aid to the injured players, computer and projector.

Topic area: Body fitness and conditioning		Sub-topic area: Physical fitness testing and evaluation		
S6: Physical Education and Sports		Unit 12: Physical fitness		No. of periods: 5
Key Unit Competence: Perform successfully physical fitness and result interpretation.				
Learning objectives			Content	Learning activities
Knowledge and understanding	Skills	Attitudes and values		
• Identify and explain components of physical fitness (strength, endurance, flexibility, speed and coordination). • State different types of physical fitness tests and what they measure (e.g.: sit-ups for endurance, sit and reach for flexibility).	• Perform various physical fitness exercises correctly and safely. • Measure and record performance using appropriate methods (timing, counting repetitions and measuring distance).	• Demonstrate self-discipline, persistence and teamwork during tests. • Show honesty when recording results. • Value physical fitness as essential for a healthy lifestyle.	• Components of physical fitness test. • Physical fitness testing exercises.	• Students brainstorm and discuss the meaning of physical fitness and its components such as strength, endurance, flexibility, speed and balance. • The teacher explains and demonstrates different components of physical fitness and explain their importance. Students discuss about the how each component contributes to overall physical fitness.

• Explain how to record and interpret results based on set norms or personal progress.	• Interpret their physical fitness results to assess strengths and areas for improvement.			• Students observe the teacher's demonstrations of various physical fitness tests such as sit-ups, sprints or flexibility tests. • Individually or in groups, students perform different physical fitness test. • Working in pairs, students assess and record each other's results, interpret their performance and compare it with standard norms. • Students reflect on their strengths and weaknesses and discuss ways to improve their physical fitness through regular exercise.
--	---	--	--	---

Link to other subjects

- **English:** Students learn how to communicate and follow different ways of communication during physical fitness exercises.
- **ICT (Information and Communication Technology):** Students can use digital tools to watch videos or animations that demonstrate proper performance of physical fitness tests and explain how to interpret the results.

Assessment criteria

- The teacher assesses students on their understanding of the components of physical fitness and their ability to perform various physical fitness testing exercises correctly. Students are also assessed on their effort, technique and consistency during the tests. Assessment can be done using a variety of assessment tools such as checklists, rating scales or rubrics, skill tests or performance tests, fitness tests, peer assessment, self-assessment, practical projects or assignments, oral or written tests, video recording and portfolios.

Teaching and learning materials

- **Standard sports materials:** Stopwatch or phone timer, a playground or an open and safe space available at school, measuring tape or meter stick, cones or markers, chalk, sit and reach box or bench and fitness record sheets.
- **Locally made sports materials:** Rope (for sprint start line and jump tests), sticks or chalk (for marking distances), homemade weights (sand filled bottles), clean cardboard for sit and reach tests and recycled plastic bottles (as cones).
- **ICT tools and digital resources and visual aids:** Videos or pictures showing different exercises, computer and projector to show students rules to follow during performing fitness test and explain how each test is measured.
